

Why FujiClean?

Proven Expertise:

With over 60 years of innovation, FujiClean delivers unmatched reliability. More than 50,000 systems are sold globally each year, supported by continuous Research & Development from a dedicated team of 40 engineers and scientists.

Efficient Operation:

Our compact single-tank system is engineered to save time, cost, and excavation work. Featuring intuitive plug-and-play controls, it's easy to transport, blends seamlessly into any environment, and can be installed effortlessly using a suitably sized excavator.

Durable & Lightweight (Under 500kg):

Built from high-strength Fibreglass Reinforced Plastics (FRP), FujiClean systems resist corrosion and harmful gases better than concrete tanks, while their lightweight construction allows for faster and easier handling and installation.

Advanced Treatment Performance:

Designed to deliver cleaner, higher-quality effluent, our systems reduce irrigation demands and fully comply with AS 1546.3:2017 certification standards. Cost-Efficient Operation: With an air blower that consumes just 68 watts, our systems offer quiet, energy-efficient performance backed by a trusted nationwide service network.

AS 1546.3:2017

Complete in 3 simple steps

Design & Approval

Council approval requires a Wastewater Report, which may be prepared by a Geotechnical Engineer. The report will confirm:
Required treatment level, Approved system type, Irrigation type and size, System location.

Supply & Installation

The system must be installed by a licensed plumber in accordance with the manufacturer's instructions. Its lightweight design allows easy handling and placement using a small excavator.

Servicing & Maintenance

Quarterly servicing by an accredited service technician is required for both warranty and council compliance. After each visit, a service report is lodged with council to ensure ongoing approval.

ABOUT US

FujiClean is a global leader in onsite wastewater treatment technology, specialising in high-performance domestic and commercial sewage treatment systems.

Our Advanced Secondary Treatment Plants are specifically engineered for Australian conditions and are proudly manufactured right here in Australia.

Backed by a trusted national distributor network, FujiClean is the preferred choice for industry professionals who value exceptional product quality and proven performance.

SYSTEM SPECIFICATIONS

Equivalent Person (EP)	8
Loading	1,200 L
Design Effluent	Advanced Secondary Treatment
Weight (empty)	440 Kg
Length	2,510 mm
Width	1,440 mm
Height	1,870 mm
Inlet Invert - No risers	410 mm
Inlet Invert - 300 risers	710 mm
Inlet Invert - 450 risers	860 mm
Air Pump	1 x FujiMAC100 (68Watts)
Material	Fibreglass Reinforced Polymer (FRP)
