# Enjoy the benefits of a FrontGuard door

Garador FrontGuard doors are available in a range of designs in steel and aluminium. No matter whether you choose a classic or a contemporary steel design, or one of our stylish aluminium doors, you will never compromise on quality and security. All doors are thermally insulated to prevent the loss of conditioned air and provide energy savings. In addition we supply multiple latching with each door to make your home more secure. Look for yourself to see which door style suits your home best to enhance it's aesthetic appeal and added value.

At Garador, we're committed to provide the best value for money. We therefore manufacture all of our FrontGuard entrance doors in line with ISO 9001 and regularly subject them to the strictest quality tests. This way you can always be sure to get the best value for money, no matter which door design you choose.

Since the company's policy is one of continuous improvement of its products, we reserve the right to make any alterations. Copyright. No part of this brochure may be copied or reproduced without our prior written permission.

Here is our range of classic FrontGuard entrance doors in steel. These traditional designs match almost any home and perfectly match a classic steel garage door with raised panels. All of our classic design steel doors come with a lever/lever handle as standard, in gold or silver to choose.

# State-of-the art engineering, manufacturing excellence

## Benefit from state-of-the art engineering and certified manufacturing excellence

All FrontGuard doors are manufactured in line with ISO 9001 and regularly subjected to the strictest quality tests in order to provide:

- Water-tightness under heavy rain
- Stability under heavy winds
- Airtightness
- Acoustic insulation
- Thermal insulation

## The best sealing possible increases energy savings

Double, all-round seals reduce heat loss. A standard drip angle and additional brush seal at the bottom provide optimum protection against bad weather.

For our range of FrontGuard doors we offer 2 types of frames: a flush timber frame, and a roundstyle aluminium frame. Choose the frame which suits your needs best and see the details below to make an informed choice.

**The flush timber frame**  
available for classic and contemporary FrontGuard steel designs

①

### Timber frame

A timber frame provides good thermal insulation and the surface is painted to match the door leaf.

②

### Aluminium/plastic threshold

The door has a 20 mm high threshold with thermal break to prevent heat from escaping near the floor.

③

### 8-point locking

Feel secure: 4 adjustable roller pivots and the deadbolt lock the door reliably and tighten it against the frame. 3 further security bolts on the hinge side provide extra safety from unauthorized access.

10

**The roundstyle aluminium frame**  
optional for classic and contemporary steel FrontGuard doors, standard on modern aluminium doors

①

### Aluminium frame

An aluminium frame with thermal break and roundstyle design gives your door a highly exclusive appearance.

②

### Aluminium/plastic threshold

The door has a 20 mm high threshold with thermal break to prevent heat from escaping near the floor.

③

### 8-point locking

Feel truly safe at home: 2 conical swing bolts engage with 2 additional security bolts and 1 deadbolt in the frame's lock plates and pull the door shut tightly. 3 further security bolts on the hinge side provide extra safety from unauthorized access.

# Enjoy the beauty and convenience of a matching garage door

Besides the entrance door, the garage door is one of the key elements of your property. We offer a wide range of up-and-over doors made of steel, PVC, timber, and GRP as well as steel sectional doors and roller doors, all along with matching operators, all providing the convenience, safety and security you deserve. Please ask for our detailed brochures to see the range of finest garage doors and operators available.

**GARADOR**
