Our doors are for residential purposes only and not for commercial use.

Introducing the FrontGuard collection

High thermal insulation

We offer two insulation options, the 46 mm FrontGuard 46 and the 65 mm FrontGuard 65. These doors provide excellent thermal insulation with U-values down to 1.1 W/m²·K for FrontGuard 46 doors and 0.87 W/m²·K for FrontGuard 65 doors. This is achieved through a heavily insulated door panel, thermal breaks built into the frame and rubber seals on both the door leaf and frame.

Security for peace of mind

All doors are manufactured with 5-point locking as standard, to provide extra security. All doors are fitted with 3 additional security bolts on the hinges, making it practically impossible to force the door open. RC2 security equipment as standard.

Choose from two variations of FrontGuard door

Choose from two variations of entrance door, FrontGuard 46 or FrontGuard 65. Our FrontGuard 46 doors provide excellent thermal performance and FrontGuard 65 has a further enhanced design.

Break in resistance

The FGS 700 / 900 / 010 / 015 and 100 FrontGuard door models come optionally without side elements and transom lights with RC2 equipment. The FrontGuard 65 range, including those with side elements and transom lights, are available with RC2 equipment as an option. The doors are also approved for fitting either opening inwards or outwards of the opening.

Front Guard 46 Features

Front Guard 65 Features

PU-foam filled 46 mm door leaf and thermal break built into panel design, provides excellent thermal insulation with U-values as low as 1.1 W/m²·K.

PU-foam filled 65 mm door leaf and thermal break built into panel design, provides excellent thermal insulation with U-values as low as 0.87 W/m²·K.

2 Frame

The 60 mm aluminium frame also has a thermal break built into its design to maintain a high thermal performance. Available in rounded frame (shown) or rectangular frame version.

The 80 mm aluminium frame also has a thermal break with insulating PU foam, built into its design to maintain a high thermal performance. Available in rounded frame (shown) or rectangular frame version.

3 way adjustable hinges

Fully adjustable 3 way hinges can be perfectly adjusted for a door that is lightweight in operation and seals perfectly. 3 additional security bolts make it practically impossible to force the door open. Aluminium hinge caps provide a sleek finish.

5-point security lock

2 conical swing bolts, 2 security bolts and 1 additional lock bolt all engage into the frame's lock plates whilst pulling the door further into the frame seals for maximum security. Features soft lock latch to close door quietly.

5 Internal handle

A stainless steel internal handle provides a quality robust feel to the door and the matching profile cylinder is supplied with 5 keys as standard.

6 Seals

A 20 mm threshold, constructed from aluminium and plastic, as well as double rubber seals on the bottom of the door helps to minimise heat loss.

A 20 mm threshold, constructed from aluminium and plastic, as well as triple rubber seals on the bottom of the door helps to minimise heat loss.

Modern designs

Our modern design FrontGuard doors have a superb high gloss surface finish. A flush fitting appearance on the interior and exterior, as well as a stainless steel glazing frame, underscore the door's elegant look.

9

Contemporary designs

The contemporary series of FrontGuard steel entrance doors feature modern accents to provide a new and contemporary design. A harmonious door appearance is created with a round-style composite glazing frame.

Classic designs

With their traditional appearance, our Classic design FrontGuard doors complement both modern and more traditional architecture. The profile style, with its composite glazing frame, perfectly blends in with the classic panel look.

FGS 100

FGS 200

FGS 400

FGS 430 *

Consider the position of your entrance door. If it leads into a hallway which lacks natural light, a glazed door model might be preferable. But if you live in a busy urban street, a door without windows gives you more privacy.

^{*} Only available in White (RAL 9016)

The perfect match

The wide range of designs, colours and glazing options allow you to create an entrance door that perfectly matches your property. We also offer a range of garage doors to complement your entrance door.

Handle options

Glazing options

Our glazed FrontGuard 46 and FrontGuard 65 entrance doors feature high quality, insulated laminated safety glass. Please refer to individual door models on page 16 for the full range of glazing options available.

Sand blasted Float glass

standard on Modern doors

Clear Float glass

standard on Modern doors

//Double Glazed

All FrontGuard 65 doors come with triple pane insulated glazing. FrontGuard 46 doors are supplied with double glazing.

Matching side elements and transom lights

Each FrontGuard 46 entrance door can be supplied with a matching side element and / or transom light. FrontGuard door side elements and transom lights have double-pane insulated glazing, whilst FrontGuard 65 doors have triple-pane insulated glazing.
