

BIG BOSS VGT TURBOS

PRODUCT DESCRIPTION

PDI's VGT Turbo is a high quality replacement complete turbo with the actuator for those looking for a long life replacement turbo for a failed OEM product. With the price of OEM turbochargers on the rise PDI addressed the needs for a higher quality VGT at a fair price for our customers.

This new turbo is built with a higher strength billet compressor wheel for added reliability. It is an all new casting and assembly so that you can feel confident you are getting a new product and not remanufactured. With the actuator assembly included and calibrated, the installation process is simple and straightforward.

Each PDI product is thoroughly tested to verify conformance to specifications. We are confident that you will find these turbos as reliable as all of our PDI Big Boss Products!
