

CALL FOR ARTICLES

Prepared by the *APT Bulletin* Editorial Advisory Group

Sharing experiences working with historic structures can help us all manage our projects with greater assurance of appropriate techniques. The *APT Bulletin* provides a venue for the processing of our efforts to apply both time-tested and new technologies to historic properties throughout the world. APT's mission engenders this approach, with the goal of promoting the longevity of the built environment and cultivating the exchange of knowledge throughout our international community.

Each issue of the *APT Bulletin* presents a diverse range of scientific and historical studies, materials, testing methodologies, and analyses that benefit the worldwide professional community and all APT members. The *APT Bulletin* is the ideal venue for sharing best practices. It is also a prime source of information and a professional avenue to support your scholarship and contributions to the fields of preservation and conservation worldwide. This reliable publication is a hallmark of APT and a major benefit to our members.

The *APT Bulletin* is a highly regarded international professional journal dedicated to the fields of preservation and conservation. The *APT Bulletin* is published three times a year, including one double issue. Each year typically includes one special issue that focuses on a specific subject, such as documentation or modern heritage. Full-length papers and suggestions for special issues are always welcome. Articles are peer-reviewed in a rigorous process and edited by the *APT Bulletin*'s professional editor.

Why publish in the *APT Bulletin*?

The *APT Bulletin* is the publishing arm of APT and has been the repository for the work of members throughout the world.

Founded in 1968, the Association for Preservation Technology International (APT) is a non-profit, multi-disciplinary, membership organization dedicated to promoting the best technology for protecting historic structures and their settings. As APT has expanded to regions and countries outside of North America, knowledge and expertise have grown exponentially. APT embraces over 2,000 members from nearly thirty countries.

APT members include preservationists, architects, engineers, conservators, consultants, contractors, craftspersons, curators, developers, educators, historians, landscape architects, technicians, and students who are directly involved in applying methods and materials to maintain, conserve, and protect historic structures and sites for future use and appreciation.

Members are encouraged to share their work with the greater community by submitting an article abstract to the *APT Bulletin* editor, Josie Madison, at bulletineditor@apti.org.

More information about the publication is available at <https://www.apti.org/apt-bulletin>.

Submission guidelines for authors can be found at <https://irp.cdn-website.com/4f321b91/files/uploaded/APT+Bulletin+Author+Guidelines.pdf>.
