AUGUST 2026

A message from Jo..

And so begins the last month of Winter 2026, how has it been where you are?

There have been a few big frosts in Dorrig, but my nasturtiums survived until the last week of July. (That's how I gauge the severity of the frosts as they are about the only thing that survives in my "garden"). Amazingly the frost never affects the weeds, I excel in the growing of weeds (that is weeds, plural, not weed). There have been some brilliant photos on social media of the frosts in the Ebor, Armidale, and Walcha areas, and even at Glenreagh, reminding me of my childhood when the water troughs iced over and the hose made cylinders of ice, and of course the walk to school in the frost leaving footprints wherever we could. Ahhh.... the good old days :)

August sees the annual trek to Agquip at Gunnedah. I believe the dates are the 18th-19th-20th.

Most of our suppliers will have the products we sell on display if you wish to check out their stands and ask any questions.

Oliver has returned safely from his holiday which took in Campdrafting at Gloucester. No bruises, or broken limbs, so it must have been successful. He is missing again this week, at TAFE in Tamworth. Lucas had his week in mid-July. This year will be the last year the boys have to attend TAFE – another year then and they will have completed their apprenticeships.

It looks like road works will soon be starting on the road to Bellingen, with grants being made for the repairs. West of Dorrig, I believe there has been a lot of roadwork as well, judging by the dirt on cars and the delays experienced by many, let's hope we will see the improvements soon. The Coffs Harbour By-Pass is mind boggling. There seems to be roads, bridges, and roundabouts, appearing weekly, like a giant maze. It would be amazing to see from the air, maybe then I can see where everything will "fit". The end result will be worth it, the traffic through Coffs Harbour (even with all the fuel shortages) is horrendous.

It won't be long until the lawns will need weekly mowing again – we have some Zero Turn Mowers in stock and more on order, even through winter we have had people buying mowers. (Perhaps the weeds need mowing, as is the case at our house). We also have a great range of farm tractors and implements, just give Jack or Gary a call and I am sure they can help you.

Until next month..... *Jo*

THINGS YOU WON'T HEAR ON THE FARM:

- THAT WAS CHEAPER THAN I EXPECTED
- I HAVE NOTHING TO DO THIS WEEKEND
- EVERYTHING WENT ACCORDING TO PLAN

Perks of Farming

- Extra Money**
- Free Time**
- Low Stress**

HUSTLER

5 reasons to choose a Chainless TH205

1. MULTI BALE

- Load and unload round or square bales in the one machine.
- No manual handling and minimal maintenance required.
- Efficient and simple.

2. Feeds any Bale Type Shape or Size

The Chainless Trailed Bale Feeder is the most versatile Bale Feeder, it will feed out any bale round, square, tight, soft, short, long, dry and wet bales with ease.

3. Total Control 2 Loading System

This gives you total control overloading the bale. The simple, reliable and fool-proof single cylinder design of the Hustler loading system is safer than other loading systems and allows unwrapping of the bale above the feed cradle, reducing waste. The Hustler loading system can be reversed if the operator decides not to load that bale. It also has more support area for soft or square bales. The Chainless square and round Bale Feeder delivers more leverage, stronger design and larger 1.5-tonne (3,300 lb) capacity.

4. Easy Clean Hustler Move Panel

The easy clean move panel makes for an easier clean as you can raise the floor up and scrape it clean out the back of the feeder.

5. 5 year warranty!

All backed with the Hustler industry best 5-YEAR WARRANTY – for peace of mind, knowing you've got backup and support that's been well proven for 60 years.
