## *A message from Jo..*

Spring .... at last! Well, I hope we now get some warmer weather, and the ground gets a chance to dry out. I really can't remember a wetter or colder winter! I am sure past records probably tell a different story, but I found this one extreme. The daylight hours are getting longer so not getting home from work in the dark is good. I can hear the dairy farmers telling me to stop complaining 😊 How about the snow that fell in our area? I only saw photos and heard the stories – the photos were amazing. The loss of power and phone service was a major concern, with services not being restored for almost 3 days. Once again, we realise how much we rely on these essential services and wonder how the pioneers survived.

August was an interesting month at Stan Cork Machinery – for those of you who don't know, Peter Smith gave us all a big fright – a very quick trip to hospital and 4 stents later, he is on the road to recovery. Hopefully, he will be back at work in a few weeks, until then Paris, Brad, Jack and sometimes Gary have been doing his job. Big boots to fill, so please be patient.

See elsewhere in the newsletter the importance of having your machines regularly serviced. For warranty purposes it is imperative that services are carried out. Please check your Owner's Manual for how often these should be done. Most machines should be serviced every 200 hours.

I believe Ag-Quip was a very cold and wet experience this year. You can never pick what it will be like, the only year I went, I had to buy rubber boots and a raincoat – the drought broke that week, other years I hear stories of westerly winds (it is August). Once again, Australia is a land of many contrasts -the weekend after Ag-Quip I saw people on the beach at Mullaway in their bikinis working on their suntans.

Now.... don't forget Father's Day next Sunday, 7<sup>th</sup> September. A Zero Turn mower or even a new tractor would be a great gift for the dad (or mum) that has everything.

On that note, I would like to wish all the dad's, granddads, or those who are surrogate dads a very Happy Father's Day.

Until next month... *Jo*

## Spring is Just Around the Corner!

Get Your Kubota Equipment Ready for the Season

Spring is approaching, it's the perfect time to start thinking about servicing your Kubota machines. Regular maintenance is key to keeping your equipment running smoothly and avoiding costly downtime during your busiest months.

Don't forget to check your owner's manual for recommended service intervals specific to your machine — keeping up with servicing is essential **to ensure your warranty remains valid.**

We're here to help! Whether you prefer the convenience of **on-farm service** or want to bring your equipment to our **workshop**, we are ready to keep you up and running. Plus, we stock **all the parts, filters, and oils** you'll need for any job.

Book your service early to beat the spring rush!

We wanted to take a moment to gently remind the people of our community—especially those of us in rural areas—how important it is to make your health a priority.

Recently, we experienced a heart attack within our local business circle. Thankfully, the situation ended in a very fortunate way, but it's a sobering reminder that heart health is something we can't afford to overlook.

If it's been a while since your last check-up, please consider booking an appointment with your doctor. Heart disease often shows no early signs, and regular check-ups could make all the difference.

**Your health matters—to your family, your mates, and to this community.**

**Let's look after ourselves and each other.**
