

Family Resource and Referral Guide (1/21)

Educational Testing Services:

Each town has programs for screening children under 3, preschool children 3-5 and school age children over five. You can contact the office of Pupil Services in the Department of Education in your town or call 211 info line to find out more information about these programs. This route could take a long time. Studies show that early intervention is very valuable. Our recommendation is to start earlier rather than later AND utilize the expertise of private agencies and organizations.

Sunflower Developmental Pediatrics: accepts insurance and husky
