

YOUR SHELVES ARE MISSING SOMETHING

An Urgent Request Regarding Your Shelf Space

To the Manager/Owner/Person-in-Charge of Awesome Beverages,

Please excuse the bearer of this note. They are suffering from a chronic and serious condition known as **Acute Margarita Monotony (AMM)**. Symptoms include sad sighs in the tequila aisle, a general lack of fiesta-based enthusiasm, and the tendency to stare longingly at the horizon, dreaming of a better cocktail.

It's a tough diagnosis, but thankfully, there is a cure.

The prescribed treatment is a healthy stock of Sueños Artisan Tequila.

This isn't just any tequila. This is the Canadian-owned, small-batch, 100% estate-grown Blue Weber agave spirit that dreams are made of. Crafted in Jalisco, it's the perfect antidote to boring drinks, with a smooth, clean finish that's been known to cure even the most severe cases of AMM.

By stocking Sueños, you won't just be making this customer's day; you'll be making a serious statement about the quality of spirits you carry. You can expect more foot traffic (we know this person will be telling their friends), a reputation as a beacon of good taste, and the gratitude of everyone tired of the same old options.

We trust you'll make the right call.

Sincerely,

(Signature of a soon-to-be very loyal customer)
