

CAPABILITY STATEMENT

Callide Plumbing Services is a trusted, Callide Valley-based provider of professional plumbing, water infrastructure, and specialised industrial services. Established in 2015, we deliver reliable, high-quality solutions across residential, rural, industrial, commercial, mining, and government sectors.

Our team is known for its ability to operate in complex environments, including remote locations, active industrial sites, and large-scale infrastructure projects. We combine practical expertise, modern equipment, and a strong safety culture to deliver efficient and compliant outcomes.

CORE SERVICES

- General plumbing services
- Sewer system installation, repairs and maintenance
- Stormwater systems
- Rainwater harvesting and filtration systems
- Hot and cold water services
- Sanitaryware and tapware installation
- Industrial and commercial water supply systems
- Trade waste systems (grease traps, oil separators, etc.)
- Backflow prevention
- Thermostatic mixing valves (TMVs)
- Hydro-jet drain cleaning
- Gutter cleaning and replacement
- LPG gas systems (low and high pressure, Type A)
- CCTV drain inspections

SPECIALISED SERVICES

- Hydro excavation
- Trenching and excavation
- Service locating
- Potable water cartage
- Liquid and regulated waste removal
- Storage tank cleaning
- Poly welding (Butt and Electrofusion)
- Fire systems
- Camp, crib and ablution block installation, demobilisation and maintenance
- Tree lopping

LICENCES & CERTIFICATIONS

- QBCC Company Licence: 1318184
- QBCC Contractor Licence: 1187071
- Gas Work Licence: L40443
- Food Business Licence (Potable Water Delivery): 31112
- Regulated Waste Transporter
- Backflow Prevention and TMV Endorsements
- High Risk Work Licence (WP, LF, DG)
- Working at Heights (RIIWH5204E).
- Confined Space (RIIWH5202E)
- Poly Welding Certifications (PMBWELD301E, PMBWELD302E)
- Agricultural Chemicals Distribution
- Chemical Safety Certificate
- Fall Trees Manually (Intermediate) and Operate Pole Saw
- Member of Master Plumbers Association Queensland (MPAQ)
- Public Liability: \$20M
- Professional Indemnity: \$6M

PLANT & EQUIPMENT

- Hydro excavation unit (4,000L tank, 6" boom, long-reach capability up to 50m)
- Potable water truck (15,000L, food-grade certified)
- Liquid waste vacuum truck (11,000L capacity, deep suction capability)
- Excavators (various sizes ranging from 1.8T to 8T on site, and up to 36T available)
- Tip trucks (2T to 12T capacity)
- Skid steer with multiple attachments (trencher, slasher, auger, etc.)
- Jet rodding and high-pressure drain cleaning equipment

PROJECT EXPERIENCE

- Ergon Energy – Hydro excavation for power pole removal/replacement across Central Queensland
- Queensland Nitrates Plant, Moura – Installation fire mains system and water cannons
- CS Energy, Callide Power Station – Design and install evaporation systems for ash dams
- Large-scale irrigation infrastructure – Design and installation of systems, including 8-inch PVC pipelines and poly welding
- CS Energy, Callide Power Station - Installation RO (Reverse Osmosis) water filtration plant
- Cattle Feedlot, Thangool – Water systems and underground waste management
- Mining infrastructure – Crib huts, septic systems, filtration and wastewater systems
- Banana Shire Council, Taroom - Demolish and removal large-scale expired STP
- Rural Funds Trust, Mackenzie - Design, supply, installation of septic and drainage systems, including two station camps

ADDITIONAL CAPABILITY

CALLIDE PEST SERVICES

From the team behind Callide Plumbing Services, Callide Pest Services was established in response to growing demand—backed by the resources, site capability, and extensive fleet required to deliver at scale.

We provide professional feral pest eradication and vegetation management services for industrial facilities, rural properties, and large-scale land management projects.

Our services are tailored to the location, scale, and regulatory requirements of each project, using a combination of trapping, ground-based control, and aerial operations (including helicopter support where required).

CAPABILITY

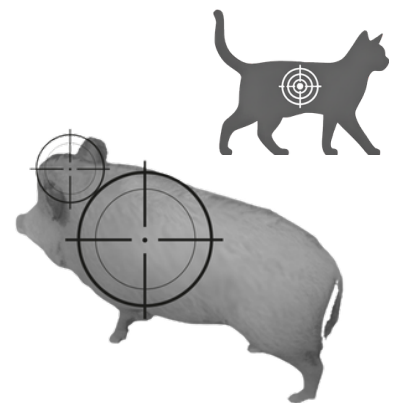

- Fully licensed feral animal controllers
- Qualified commercial herbicide operators
- CASA-accredited aerial shooters (where required)
- Fully insured, with specialised equipment for complex environments
- Access to an extensive fleet and site-ready resources to support large-scale operations

TARGET SPECIES

- Destructive bird populations (industrial sites)
- Feral pigs (rural and industrial land)
- Feral cats (property and environmental protection)

WHO WE WORK WITH

- Mining and industrial facilities
- Government and infrastructure operators
- Agricultural operations
- Large-scale land management projects

OUR APPROACH

All pest control projects are delivered with a strong focus on safety, compliance, and environmental responsibility. We undertake detailed planning and risk assessments, coordinate closely with site managers, and ensure all activities meet regulatory and site-specific requirements.

Using proven techniques and modern technology, we deliver targeted eradication programs that minimise disruption while achieving effective, long-term results.

Our experience across remote locations and complex operational environments allows us to safely manage pest control at scale while maintaining strict environmental and operational standards.
