

THE NURSERY THAT HELPS LITTLE FEET TAKE BIG STEPS

## Sickness and illness

Children should not be left at nursery if they are unwell. If a child is unwell then they will prefer to be at home with their parent(s) rather than at nursery with their peers. We will follow these procedures to ensure the welfare of all children within the nursery:

- If a child becomes ill during the nursery day, their parent(s) will be contacted and asked to collect their child as soon as possible. During this time the child will be cared for in a quiet, calm area with their key person
- Should a child have an infectious disease, such as an eye/ear infection or sickness and diarrhoea, they should not return to nursery until they have been clear of symptoms for at least 48 hours
- It is vital that we follow the advice given to us by our registering authority and exclude specific contagious conditions, e.g. Covid-19, sickness and diarrhoea, conjunctivitis and chicken pox to protect other children in the nursery. Illnesses of this nature are very contagious and it is exceedingly unfair to expose other children to the risk of an infection
- If a contagious infection is identified in the nursery, parents will be informed to enable them to spot the early signs of this illness. All equipment and resources that may have come into contact with a contagious child will be cleaned and sterilised thoroughly to reduce the spread of infection
- It is important that children are not subjected to the rigours of the nursery day, which requires socialising with other children and being part of a group setting, when they have first become ill
- Should a child be on antibiotics to ensure they return to full health, we are happy to administer this as long as they have received 1 dose at home to ensure they are not allergic to this medication.
- The nursery has the right to refuse admission to a child who is unwell. This decision will be taken by the manager on duty and is non-negotiable
- Information about head lice are readily available and all parents are requested to regularly check their children's hair. If a parent finds that their child has head lice we would be grateful if they could inform the nursery so that other parents can be alerted to check their child's hair.

### Meningitis procedure

If a parent informs the nursery that their child has meningitis, the nursery manager should contact the Infection Control (IC) Nurse for their area, and Ofsted. The IC Nurse will give guidance and support in each individual case. If parents do not inform the nursery, we will be contacted directly by the IC Nurse and the appropriate support will be given.

### Transporting children to hospital procedure

- If the sickness is severe, call for an ambulance immediately. DO NOT attempt to transport the sick child in your own vehicle

- Whilst waiting for the ambulance, contact the parent and arrange to meet them at the hospital
- A senior member of staff must accompany the child and collect together registration forms, relevant medication sheets, medication and the child's comforter. A member of the management team must also be informed immediately
- Remain calm at all times. Children who witness an incident may well be affected by it and may need lots of cuddles and reassurance.

Internal use only
