

A Note From Our Director

One of the things I value most about KidSafe Collaborative is that our work is built on a simple idea: no one person, organization, or system can keep children safe on its own. We bring people to the table, help build connections across systems, and create space to tackle issues that are bigger than anyone could do alone.

Whether we are helping professionals navigate a complex situation, organizing partners around a shared challenge, or creating space for new ideas, our efforts are about making it easier for people to work *together* on behalf of children and families.

We are proud that this work supported hundreds of children and families last year, but perhaps even more proud of the relationships and shared commitment behind it.

Thank you to everyone who showed up, shared their expertise, and continues to make this work possible.

Meghan Masterson

We convened...

- Child Protection and Family Support Team (CPFST)
- Children and Recovering Mothers Team (CHARM)
- Community Response Team Best Practices Workgroup
- National Perinatal Substance Use Disorder Community of Practice

We co-facilitated...
