Accessing Your Team and Coach Profile in GotSport

Logging in, rosters, team email, and schedules for BAC coaches and team managers

This guide shows you how to log in to GotSport, confirm your compliance status, view your current roster, email your team, and find your game schedule. It applies to every season; the screens below are examples from a prior season.

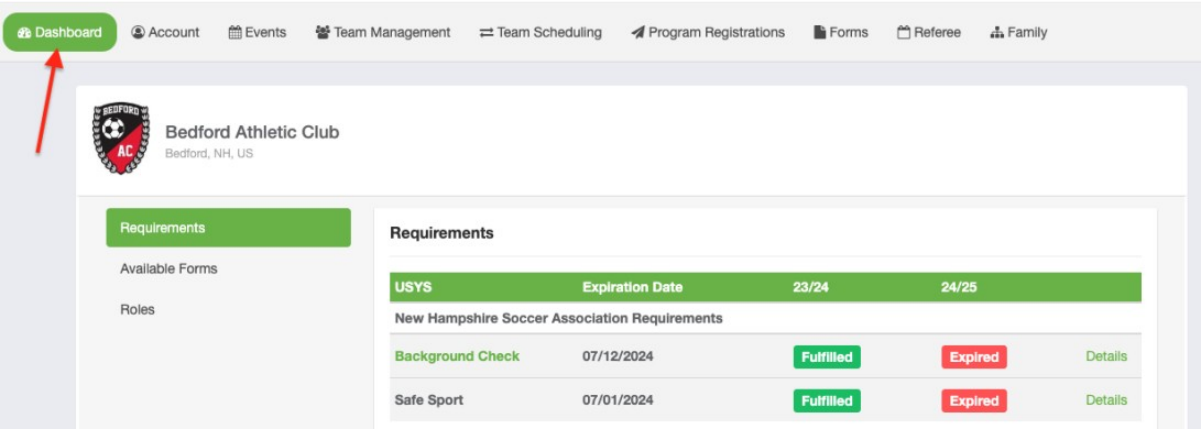

> **The one thing to remember**
>
> GotSport shows a team's full history by default, including players who are no longer on the roster. Whenever you view rosters or send messages, first select the current season's event from the Event dropdown (the one ending in **State Fee**, for example "NHSA Rosters & Passes 2026/2027 State Fee") and click **Search**.

Step by step

1. Log in at system.gotsport.com. Do NOT go to gotsport.com, which is a different site. Use a computer or laptop; not all functions are available on the mobile site.

   The default screen is your Account page, where you can see your roles, family members, and more. Click the **Dashboard** tab at the top to reach your main screen.

   Your **Background Check** and **Safe Sport** status appear in the lower right of the dashboard. Both should show **Fulfilled** for the current seasonal year. Both expire in early July and must be renewed each summer before the fall season. To update either one, click **Details** and follow the instructions. For SafeSport to link correctly, use the same email you use to log in to GotSport.

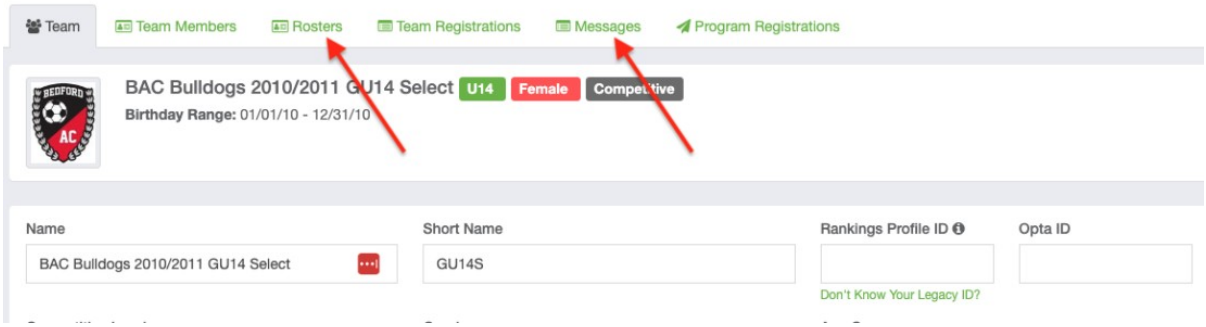

Example from a prior season. Your dashboard will show the current seasonal year (for example, 2026/27).

2. Click **Team Management** to see the teams you coach or manage, then click a team name to open that team's menu.

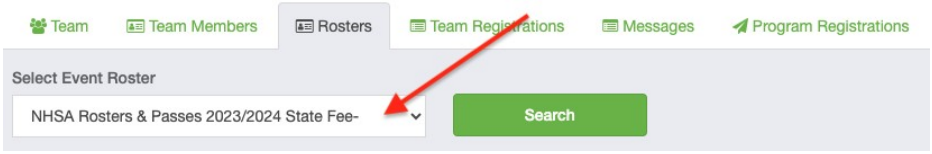

Example screen. Team names, ages, and events will reflect the current season.

3. On the team menu you will mainly use two tabs: **Rosters** and **Messages**. Do **NOT** change any fields on the main Team page; the club uses them to sort and filter teams in the system.

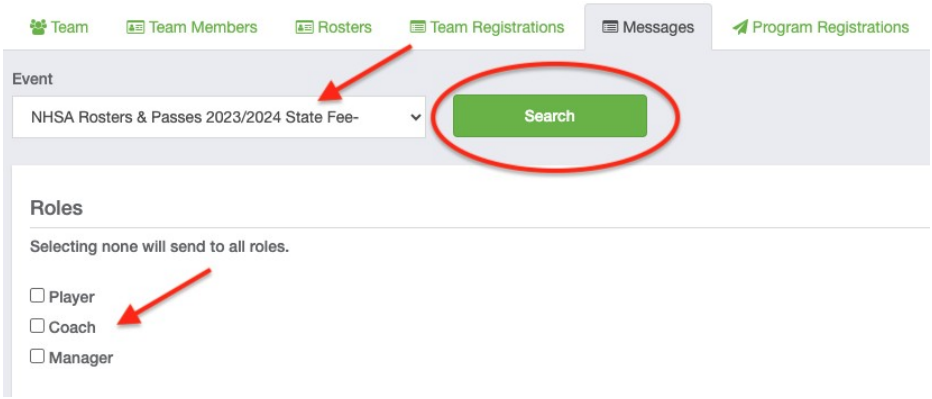

4. **See your current roster:** click the **Rosters** tab, select the current season's event (the one ending in **State Fee**) from the dropdown, and click **Search**. This shows the players and coaches actually assigned for the season.

   Until you select the current event, the list shows everyone who has ever been on the team, so it is not an accurate picture of your roster.

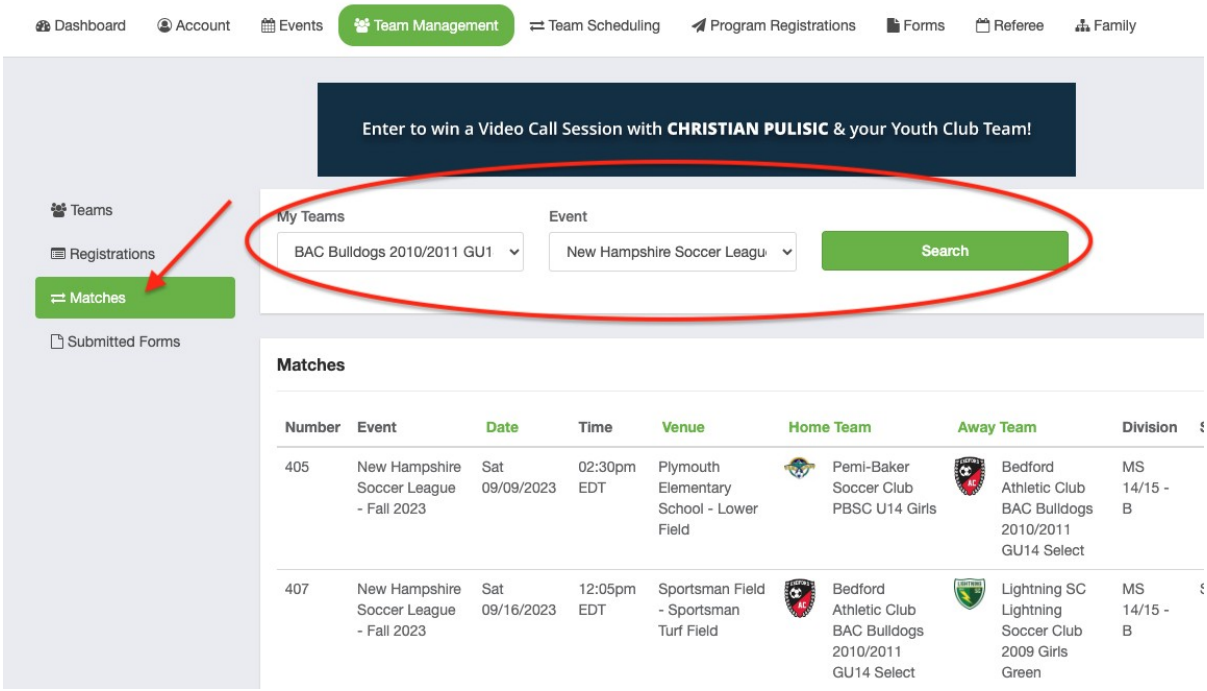

Select the event for the current seasonal year, for example "NHSA Rosters & Passes 2026/2027 State Fee."

5. **Email your team:** open the **Messages** tab, select the current season's event the same way, and click **Search**. Choose who to include (players, coaches, managers), fill in the fields, and send.

Selecting no roles sends your message to everyone on the current roster.

6. **Find your game schedule:** once the league publishes schedules, go to **Team Management** and click **Matches** in the left column. Filter by your team and the current event to see your games.

Example from a prior season. Filter by your team and the current event.

7. All NHSL schedules for every team are also posted on the league website at soccernh.com (Leagues → Game Schedule). You can see home and away matches for all teams and filter by field.
