SAFETY SUMMARY

For General Contractors

Safety Commitment

Solid Structures Construction, Inc. (SSCI) is committed to providing a safe and healthful work environment for our employees, clients, subcontractors, and the public. Safety is integrated into every phase of our work through planning, communication, training, and accountability. Our objective is to complete every project safely while delivering quality workmanship and professional service.

Our Safety Program

- Compliance with applicable OSHA and Cal/OSHA regulations
- Written company safety policies and procedures
- New employee safety orientation
- Ongoing safety awareness and training
- Jobsite hazard identification and risk assessment
- Personal Protective Equipment (PPE) requirements
- Safe operation of tools, equipment, and vehicles
- Good housekeeping and organized jobsites
- Supervisor leadership and safety accountability
- Incident reporting and continuous improvement

Employee Expectations

- Work safely at all times
- Follow established safety procedures
- Use required PPE
- Report unsafe conditions immediately
- Maintain clean and organized work areas
- Protect fellow workers, clients, and the public

Commitment to Our General Contractor Partners

SSCI recognizes that General Contractors depend on subcontractors who maintain safe, organized, and professional jobsites. We are committed to supporting each project's safety requirements through cooperation, communication, compliance with project-specific safety procedures, and professional field supervision.
