NEWS YOU AUTO KNOW

www.MikePalmerAutomotive.com

Client of the Month

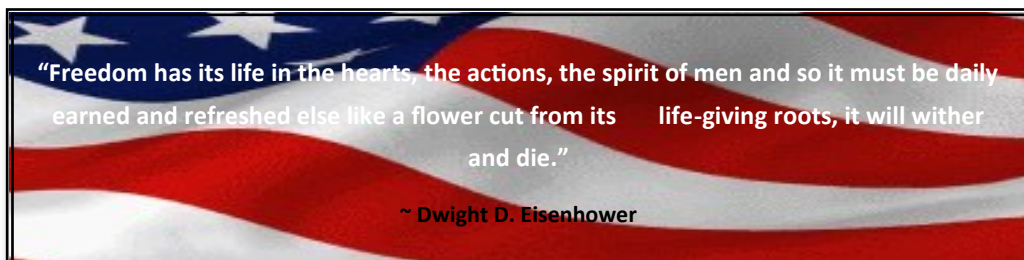

Jeffrey P.

Jeffrey has been a
loyal customer since 2016!
Thank you Jeffrey.

Thank YOU for Referring

Cristian B. referred Jamie D.
Erin S. referred Ben T.

We appreciate the trust that you show in our
shop and our service when you refer a
friend, family member, neighbor
or co-worker!

Celebrate a SAFE & HAPPY JULY 4TH!

Feeling the Summer Heat? Your Car Battery is, Too!

Summer highs rather than winter lows pose the greater threat to battery life, according to the non-profit Car Care Council.

"When most motorists think of dead batteries that cause starting failure, they think of severe winter weather, but summer heat is the real culprit," said Rich White, Executive Director. To get the most life out of your battery, the Car Care Council suggests the following simple steps:

- ◆ Be sure the electrical system is charging at the correct rate. Overcharging can damage a battery as quickly as undercharging.
- ◆ If your battery is the type that needs to be topped off, check it regularly, especially in hot weather. Add distilled water when necessary.
- ◆ Always replace a battery with one that's
- ◆ rated at least as high as the one originally specified.
- ◆ Keep the top of the battery clean. Dirt
- ◆ becomes a conductor, which drains battery power.

Improving Fuel Efficiency

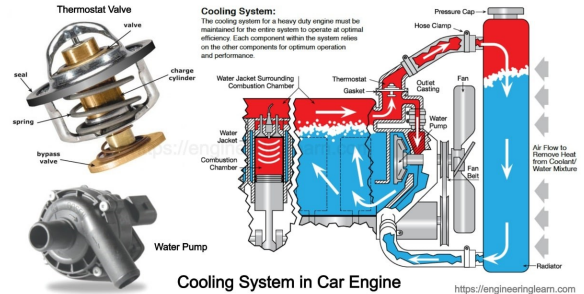

HAVE A CLEAN ENGINE AIR FILTER:
A DIRTY AIR FILER CAN REDUCE MILES PER GALLON, HURT ENGINE PERFORMANCE AND CONTRIBUTE TO HIGHER ENGINE EMISSIONS.

DID YOU FORGET ABOUT YOUR VEHICLE'S ENGINE COOLING SYSTEM?

Neglecting your vehicle's cooling system can and will lead to a progressive **failure of engine components such as water pumps, internal engine gaskets, freeze plugs and aluminum parts deterioration**. Also heater core and radiator leaks can occur. These failures can be costly to repair and can result in being stranded!!!

You see, **after about 2 years the lubricants and additives in the antifreeze start to lose their effectiveness** due to constant changes in engine temperature and electrical forces. A chemical reaction between engine coolant flowing over different metals within the engine cooling system and antifreeze will begin to react with the electricity from the numerous electrical components. This reciting will force a change in the pH balance of the coolant and turns it into an acidic state which in turn corrodes the engine metals and cooling system components which causes premature parts failures, gasket leaks and costly repairs.

By having us perform a COOLING SYSTEM FLUSH AND REFILL on your vehicle you can SAVE MONEY, the engine will RUN COOLER, and you'll have a MORE DEPENDABLE , SAFER vehicle.

The 4th of July is here, & it's time to celebrate! To help you get in a celebratory spirit, we present to you these "4th of July Fun Facts"...

- Not everyone was on board with celebrating Independence Day on July 4th, the day Congress approved the Declaration. John Adams wanted to celebrate on July 2nd, the day Congress voted for independence.
- Only two people signed the Declaration of Independence on July 4th - John Hancock & Charles Thomson, Secretary of Congress. Most of the others signed on August 2nd.
- America's 30th president, Calvin Coolidge, was born on July 4, 1872. Three US presidents have died on July 4th - John Adams, Thomas Jefferson, & James Monroe. In a bizarre twist of fate, Adams & Jefferson both died on July 4, 1826, the 50th anniversary of the country they helped found.
- **July 4th wasn't deemed a federal holiday until 1870, nearly 100 years after the nation was founded.**
- "Yankee Doodle," a popular American patriotic song, was originally sung prior to the Revolution by British military officers in mockery of the unorganized & buckskin-wearing "Yankees."
- The "Star Spangled Banner" was written by Francis Scott Key & was originally a poem stemming from his observations in 1814 concerning the British attack on Baltimore's Fort McHenry during the War of 1812. It was later put to music, based on the English drinking song "To Anacreon in Heaven". It was decreed our official national anthem in 1931.
- The average age of those who signed the Declaration of Independence was 45. The youngest, at age 27, was Thomas Lynch, Jr., of South Carolina. The oldest was Benjamin Franklin of Pennsylvania at age 70. Thomas Jefferson was 33.
- **The White House held its first 4th of July party in 1801.**
- The oldest continuous Independence Day celebration in the United States is the 4th of July Parade in Bristol, Rhode Island. It began in 1785.
- 87.5% (\$2.8 million) of imported US flags are from China. 97% (\$190.7 million) of imported fireworks are from China.
- Other countries - including Denmark, England, Norway, Portugal & Sweden - celebrate the 4th of July because many of their citizens moved to the US or simply to attract American tourists.

15 GENIUS DISHWASHING HACKS

Something to Smile About

Two old men are sitting in a bar.

One of them looks at the other & says

"You look familiar... where you from?"

The second old man replies "Ireland"

The first old man looks astonished & says

"No way I'm from Ireland myself, what a small world!"

The second old man then looks at the first "What city?"

The first old man says "Dublin?"

The second old man looks astonished

"No way I'm from Dublin myself! What a small world."

The first man looks at the second old man "What school you go to?"

The second old man replies

"Saint Mary's class of 89"

The first old man is absolutely baffled

"NO WAY Saint Mary's class of 89 myself! What a small world!"

At this point, another man comes into the bar & says to the bartender

"Hey, Joe! Anything interesting going on?"

The bartender says

"Not really... but the Murphy twins are drunk again."

First Responder Appreciation Special*

We are proud to support our local HEROES!

All First Responders receive 10%* off any service at Mike Palmer Automotive

Just show your valid ID or credentials at the time of service.

(Includes Law Enforcement, Medical Personnel & Teachers)

Thank You for ALL You Do!!
