Performance-Based Contracting

Purpose

- ODP needs to establish regulatory authority for Performance-Based Contracting.

- Regulatory authority needs to include:
  - Ability to limit enrollment of new providers
  - Establish performance measures
  - Evaluate provider performance
  - Use alternative payment methods
  - Set timeframes
  - Allow for sanctions

Considerations

Regulations often do not change for 10 or more years because the process takes a long time.

The regulations need to give ODP flexibility to:

- Include additional services in the future if necessary
- Change timeframes and performance measures
- Establish new payment methodologies
