

# The AI Platform for Behavioral Health

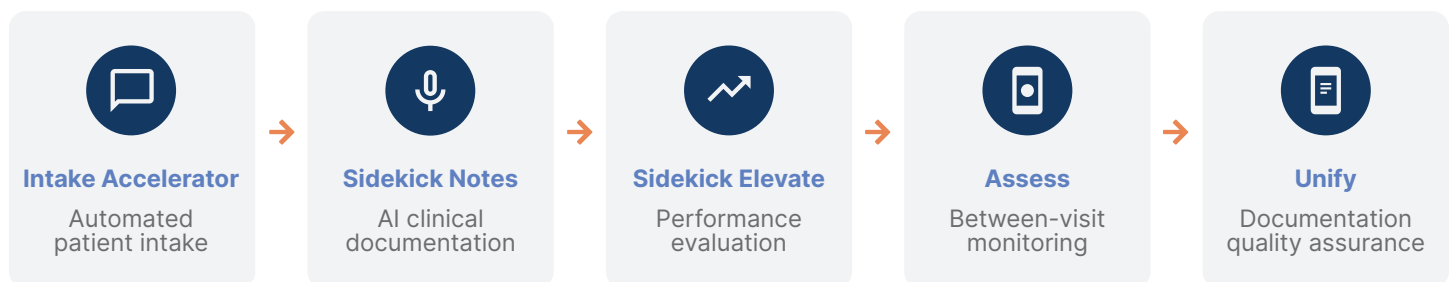

Your EHR + Videra. That's the stack.

## >> What is Videra Health?

Videra automates the work that buries your team: intake, notetaking, clinical performance evaluation, clinical assessments, and quality monitoring. It catches documentation gaps, cross-references patient records, and ensures forms are complete before submission. AI does the heavy lifting; your team reviews, approves, and stays in control. The result: more capacity, better clinical quality, cleaner claims, and more time for patient care. Running 24/7 across the entire care journey.

*"Videra has alleviated a lot of strain on our staff, and we are more efficiently, effectively using our clinicians."*  
- Dr. Rachel Wood, Discovery Behavioral Health

Each product works on its own. Together they share context so your team never starts from scratch.

## >> Why Videra is Different

- **One platform, full journey.** Every product connects. No blind spots.
- **Built for behavioral health.** Ground up for BH workflows and documentation.
- **Works with virtually any EHR.** No vendor changes. No rip-and-replace.
- **Always on.** 24/7 capacity, around the clock.
- **Trusted nationwide.** 300+ locations.

### IN PRACTICE

**Intake Accelerator** handles patient intake and delivers organized, EHR-ready information. During live appointments, **Sidekick** documents the encounter and can evaluate clinical performance. Between visits and after discharge, **Assess** checks in with patients and delivers actionable insights to your care team. Throughout it all, **Unify** monitors documentation quality across the EHR in real time.
