Why We Want to Be Part of the Registry

WFS has a proven track record of expanding its impact by partnering with like-minded, mission-centric organizations through various corporate structures. These collaborations have enabled WFS to scale effectively, enhance sustainability, and foster a culture of innovation.

The registry serves as a valuable platform for WFS to express its ongoing interest in strategic partnerships—particularly to organizations that may not yet be aware of our openness to collaboration. It helps connect with organizations that share our vision of achieving more for more together than apart.

Philosophy on Mergers, Affiliations, and Acquisitions (MAA)

WFS believes that successful partnerships must create meaningful added value for those we serve. By combining resources, organizations can enhance efficiency, increase effectiveness, and strengthen long-term sustainability.

Moreover, WFS has found that working through an affiliation model has proven especially effective—offering greater speed of transaction, preservation of each organization's historic excellence, and the ability to leverage innovation and best practices already in place. This approach allows us to do more for more through collaborative strategies that honor legacy while accelerating impact. We believe that energized innovation flourishes when organizations unite around a shared mission—achieving far more together than they ever could alone.
