

March 2026 Newsletter

The beginning of February was about sweets. Thank you to the children and families who brought Valentine's to share with their friends... The children really had fun passing out their special treats to their friends =) We don't do this often with sweet snacks but for a special occasion !!! Why not =) Which brings us to dental hygiene in February as well... The dentist visit this month was so much fun !!! It was very interactive and informational =) The children enjoyed learning about how to brush and floss their teeth, learning about the different dentist tools, and what types of food were healthier for us vs. not healthy for us to eat or for our teeth. Most importantly, the children can brush their teeth first but for parents to follow up with a thorough brush until at least 10 years of age !!

Aside from our March curriculum on Spring, our weather and St. Patrick's Day, we will have this special day where we talk about what happens and what to do in case of an emergency for a fire or an earthquake. The pre-k's and the tiger's will learn about how to stay low if there's smoke, how to stop, drop, and roll, and how to listen to the teacher when we say "EMERGENCY." How to stay in a ball and cover our heads in an earthquake or to go and duck under the table. This can also be a conversational piece on the drive home or at the dinner table to reinforce the importance of what to do in an emergency. Maybe, come up with an emergency plan as a family as well.

A few reminders that I wanted to bring up for the safety of our children...

1. Please don't let your child(ren) open the gate or the doors. We tell them that its for adults ONLY !!!
2. Please don't forget to sign your child in and out.
3. Please remember that drop offs are no later than 9:00am. We begin our daily program at this time.

Special Events/Projects

Thursday, March 5, 2026 *** Nature Walk

Thursday, March 12, 2026 *** Leprechaun Trap Day

Tuesday, March 17, 2026 *** St. Patty's Wear Green Day

Thursday, March 19, 2026 *** Dirty Worms
