COURSE OVERVIEW

The first Mid-Atlantic Bariatric Endoscopy Course (MALBEC) will be held at the prestigious Hyatt Regency New Brunswick Hotel in New Brunswick, New Jersey. MALBEC is the first of its kind in New Jersey.

This one-day course will update participants on novel approaches to medical management of obesity and endoscopic interventions to combat the obesity epidemic. Internationally and nationally recognized faculty will teach and demonstrate new technologies and procedures in the field.

Many advances have occurred in the last five years to add to the armamentarium of physicians managing patients with obesity, such as new medications and the burgeoning field of bariatric endoscopy. The purpose of MALBEC is to introduce the community to the advances in the field of obesity management by discussing new medications, diet regimen and the several new bariatric endoscopy procedures we can offer patients to help combat the obesity epidemic.

Attendee participation and interaction will be secured through lectures, Q&A sessions, interactive case presentations as well as hands-on training.

COURSE OBJECTIVES

- Identify advances in endoscopic procedures for the management of obesity.
- Discuss the management and diet regimen of pre & post obesity weight loss procedures.
- Recognize advances in therapeutic endoscopy for weight loss revisions, complication management from previously done weight loss procedures.
- Define updates in the diagnosis & management of comorbidities associated with obesity.
- Identify advances in devices and medications for weight loss and its impact on patients.

COURSE COMPETENCIES

- Patient care & procedural skills
- Interdisciplinary educational strategies to improve patient safety
- Medical knowledge to facilitate patient-centered care
- Practice-based learning and improvement
- Learn novel techniques and devices on hands-on stations

HANDS-ON STATIONS

8 hands-on stations will provide education and training for the following procedures and devices:

- Intra-gastric Balloon placement and retrieval
- Endoscopic Sleeve Gastroplasty
- TOrE - Transoral outlet reduction
- Fistula and perforation closure
- Septotomy
- Aspire Assist System Therapy
- Fractyl Station for duodenal mucosal resurfacing
