# porviva® surfaces & MATERIALS CATALOG

# introduction

## Who we are:

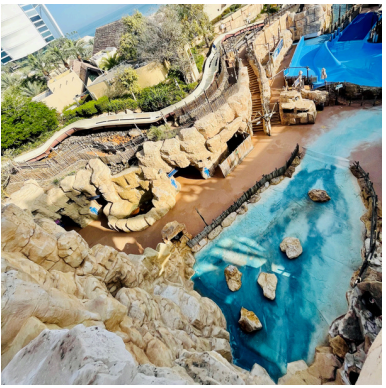

Since 2001, porviva has grown into an internationally active, family-owned company based in Germany. With a dedicated team and a strong focus on innovation, we develop advanced surface solutions tailored to our customers' needs. Depending on the selected system, our solutions offer durable anti-slip performance and innovative cooling technology.

Sustainability is at the heart of our development. We are committed to protecting the environment and conserving valuable resources such as raw materials, drinking water and energy.

## What we do:

**por**viva **GmbH** develops, manufactures and distributes innovative coating systems and surface solutions for a wide range of applications. Our solutions are used in water parks, theme parks, pools, buildings, transportation infrastructure and industrial environments worldwide.

porviva
innovative surfaces

# What is porviva®?

**porviva®** is a surface coating system combining design, durability and functionality for indoor and outdoor applications. From pool decks, water parks and terraces to retail spaces, restaurants and interiors, **porviva®** creates distinctive surfaces for floors, walls and a wide range of other applications.

At the heart of the system are **porbits®** – decorative particles available in a wide variety of colors, materials and finishes. Depending on the system, they provide properties such as UV stability, permanent slip resistance and a cooling effect.

The design possibilities range from acrylic-based synthetic particles to natural stone, mica, real metal and other decorative materials – allowing individual colors, blends and gradients to be created.

**Versatile. Durable. Made for distinctive surfaces.**

# design meets technology

We create customized **porviva®** surfaces that combine design freedom with advanced coating technology.

Every project is unique. Colors, textures, finishes and functional properties can be tailored to the individual requirements of the application – from distinctive architectural concepts to demanding leisure and aquatic environments.

Our team supports each project with technical expertise, material know-how and design guidance to create surfaces that are both functional and visually distinctive.

# why porviva®?

**porviva®** combines design freedom with advanced surface technology. A wide range of colors, textures and materials allows each surface to be individually tailored to the architectural concept and functional requirements of the project.

Our **porbits®** are available in different materials, including acrylic-based synthetic particles, minerals, natural stone, mica and real metal. Colors and materials can be combined to create custom blends, gradients and distinctive surface designs.

Depending on the selected **porviva®** system, surfaces can offer functional properties such as UV stability, permanent slip resistance and a cooling effect, making them suitable for a wide variety of indoor and outdoor applications.

**One system. Countless design possibilities.**

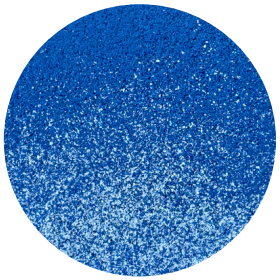

# porviva® product range

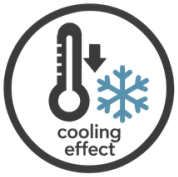

- Pool Coatings
- Indoor & Outdoor Coatings
- Water Slide Coatings
- Cooling Surface Coatings
- Primers & Waterblockers
- Transparent & Colored Top Coats
- Real Metal Coatings
- Natural Stone Coatings
- Decorative Granules
- Real Metal Granules
- Real Metal Trowel Finishes
- Customized Products / Private Label

# porviva®- fields of application

**porviva®** surface systems offer versatile solutions for a wide range of applications – from water parks, theme parks and leisure environments to hospitality, retail and public spaces. Each surface can be individually adapted to the design, performance and functional requirements of the project.

**Depending on the selected system, key benefits include:**

- cooling effect with porviva synthetic®
- permanent anti-slip properties
- high mechanical resistance
- minimal build-up height
- suitable for indoor & outdoor use
- application on new and existing concrete
- extensive color and design options
- easy to clean & repair

# porviva® Surface Systems

## SY – synthetic

Made with UV-stable acrylic-based particles, **porviva synthetic®** offers a wide range of colors and design possibilities. It provides permanent slip resistance and a cooling effect while allowing individual blends and smooth color gradients.

## MI / MC – mineral

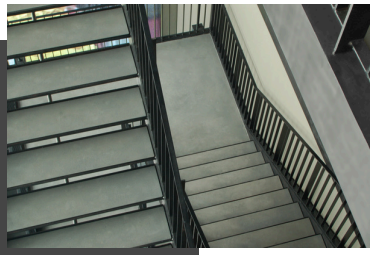

**porviva mineral®** combines selected natural minerals and stone particles to create distinctive mineral surfaces. Different colors and blends can be enhanced with gold or silver mica for subtle shimmering effects.

## PP – porpebble

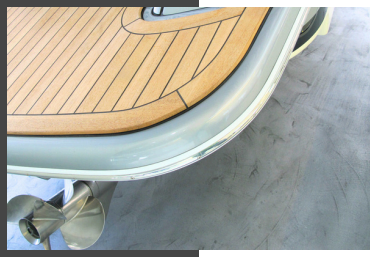

**porviva porpebble®** combines natural stone and glass particles to create decorative surfaces with subtle shimmer and natural color variations. Individual blends allow the appearance to be tailored to the architectural and design concept.

porviva
innovative surfaces

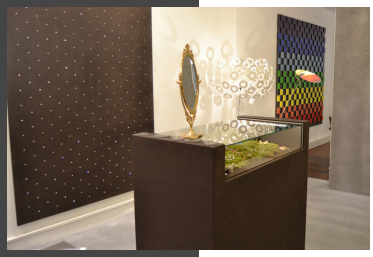

## ME – metal

**porviva metal®** combines real metal particles with our surface technology to create distinctive finishes. Available in aluminum, stainless steel and brass, each surface develops its individual character through the application and grinding process.

## MS – metal spatola

**porviva metal spatola®** creates refined surfaces using real metal in a hand-applied finish. Available in aluminum, stainless steel, copper, bronze and brass, the individual application and grinding process creates a unique appearance for every surface.

## NA – nature

**porviva nature®** combines natural and renewable materials to create distinctive decorative surfaces. Materials such as walnut shells, coconut shells and coffee grounds introduce unique textures and individual character into the design.

# porviva® synthetic

**porviva® synthetic** is our versatile surface system for demanding indoor and outdoor applications. Made with UV-stable acrylic-based particles, it combines extensive design freedom with permanent slip resistance and a durable cooling effect. Colors can be individually blended to create unique designs and smooth color gradients.

**Fields of application:**

- wave & surf pools
- pools, rivers & lagoons
- water features
- pool decks & sun decks
- walkways
- wet & changing areas
- restaurants & hospitality
- kitchens
- commercial & public areas

**Top features:**

- durable cooling effect
- permanent slip resistance
- UV-stable
- indoor & outdoor use
- 220+ colors available
- custom colors, blends & smooth color gradients

# porviva® mineral & mineral mica

**porviva® mineral** combines selected natural minerals and stone particles to create distinctive, natural-looking surfaces. A wide range of colors and blends offers versatile design possibilities, while gold or silver mica can add subtle shimmering effects. Individual combinations allow each surface to be tailored to the architectural and design concept.

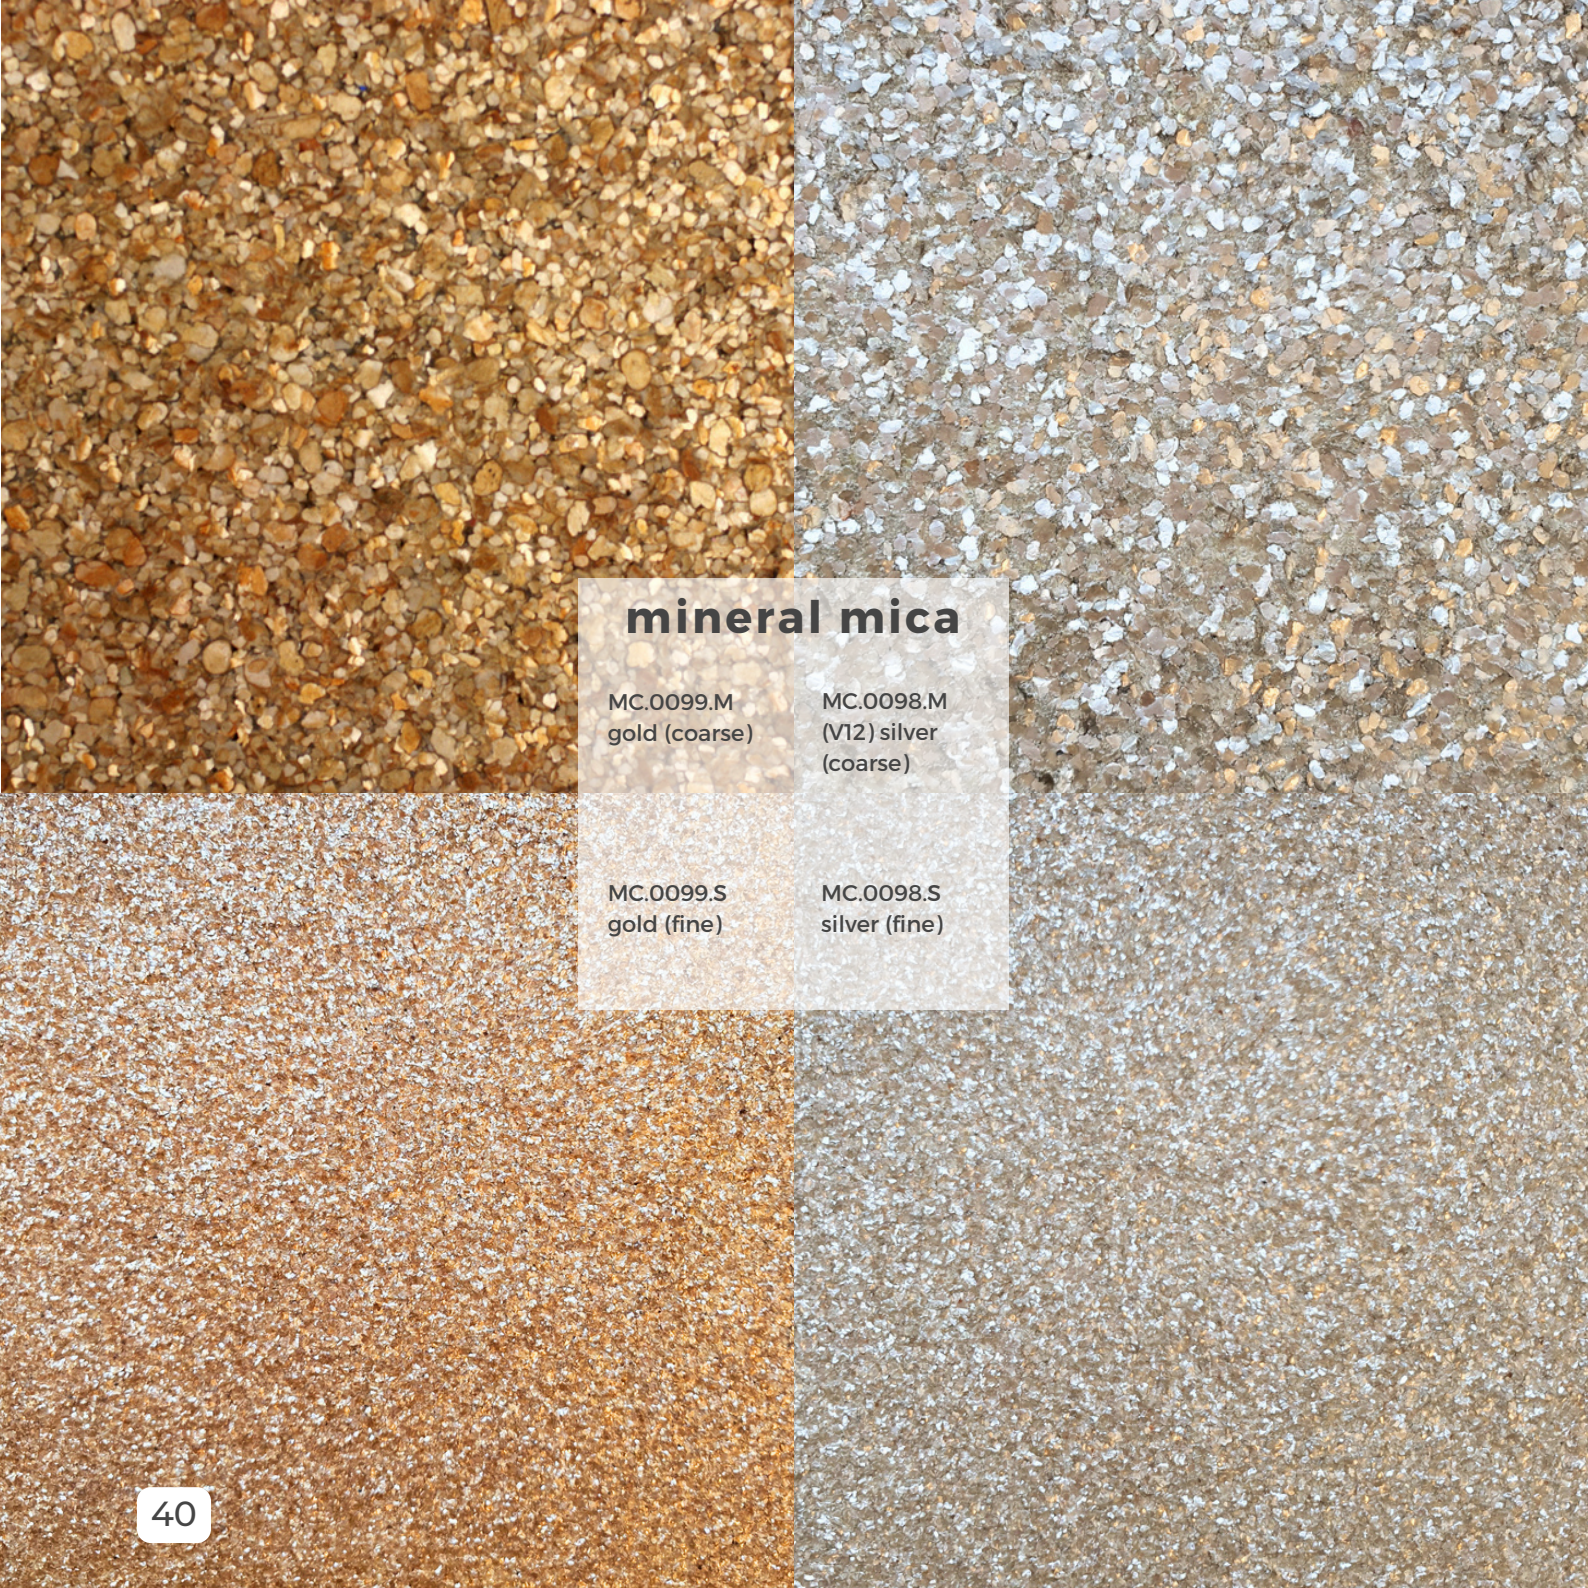

**Fields of application:**

- landscaping
- water features
- walkways
- pool decks & sun decks
- wet & changing areas
- restaurants & hospitality
- kitchens
- commercial & public areas
- parking areas

**Top features:**

- natural minerals & stone particles
- slip-resistant surface
- wide range of colors
- custom colors & blends
- gold or silver mineral mica available
- subtle shimmering effects
- indoor & outdoor use

# porviva® metal

**porviva metal®** transforms real metal particles into distinctive surfaces with an authentic metallic appearance. Available in aluminum, stainless steel and brass, the system offers exceptional design freedom for contemporary interiors. Specialized application and grinding techniques create an individual finish, making every surface unique. Depending on the selected metal, dissipative properties can be achieved.

**Fields of application:**

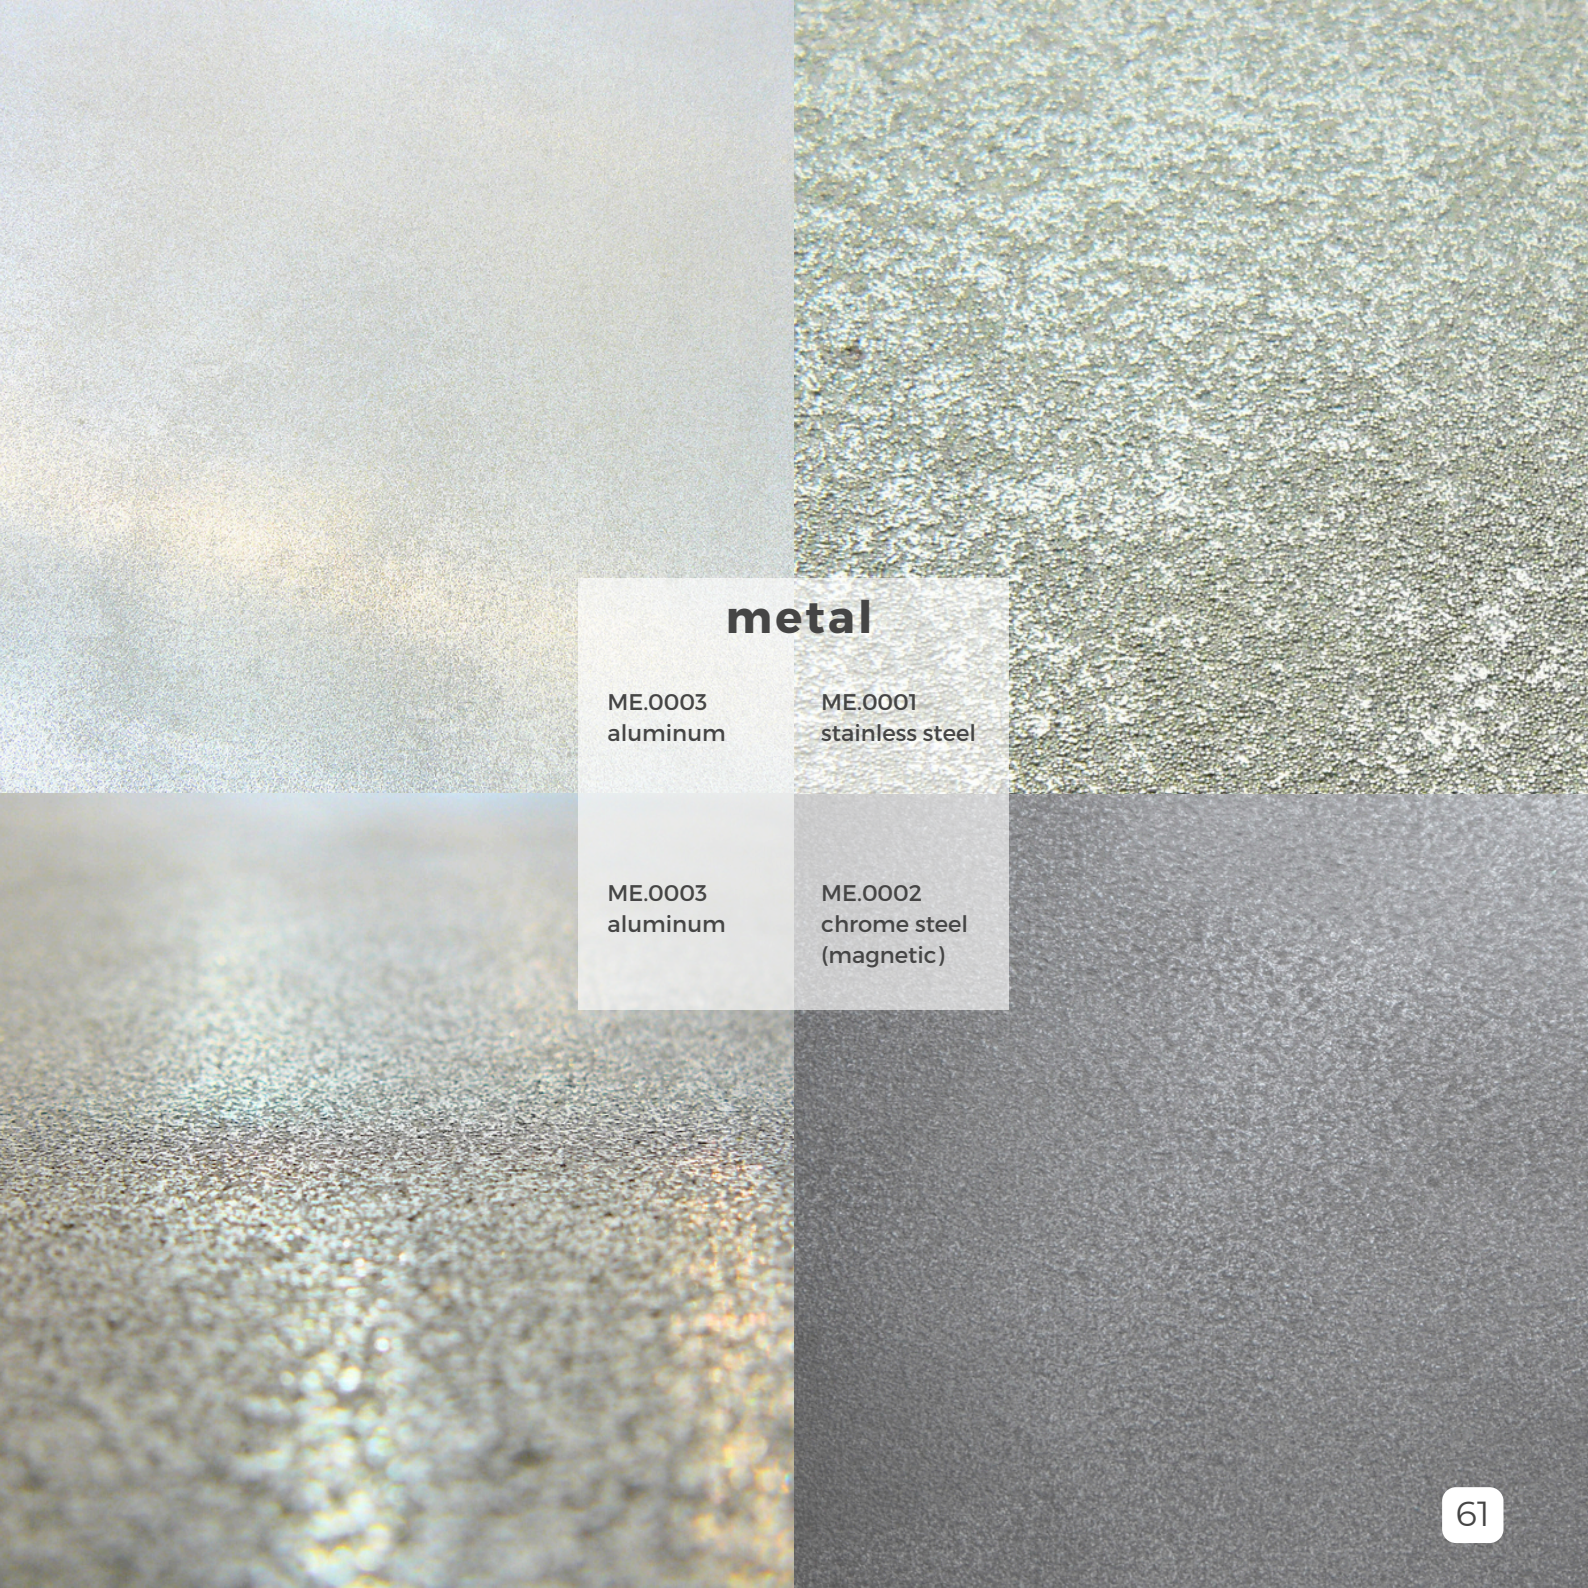

- walls & floors
- retail & showrooms
- restaurants & hospitality
- kitchens
- commercial & public areas
- offices & interior spaces

**Top features:**

- real metal particles
- exceptional durability
- unique surface character
- patterns & lettering possible
- dissipative properties*

# porviva® metal spatola

**porviva® metal spatola** combines real metal particles with a specialized spatula application technique to create distinctive surfaces with an authentic metallic appearance. Available in aluminum, stainless steel, copper, bronze and brass, the system offers exceptional design freedom. The specialized application and grinding processes create unique textures, patterns, lettering and three-dimensional effects, giving every surface its own individual character. Depending on the selected metal, dissipative properties can also be achieved.

**Fields of application:**

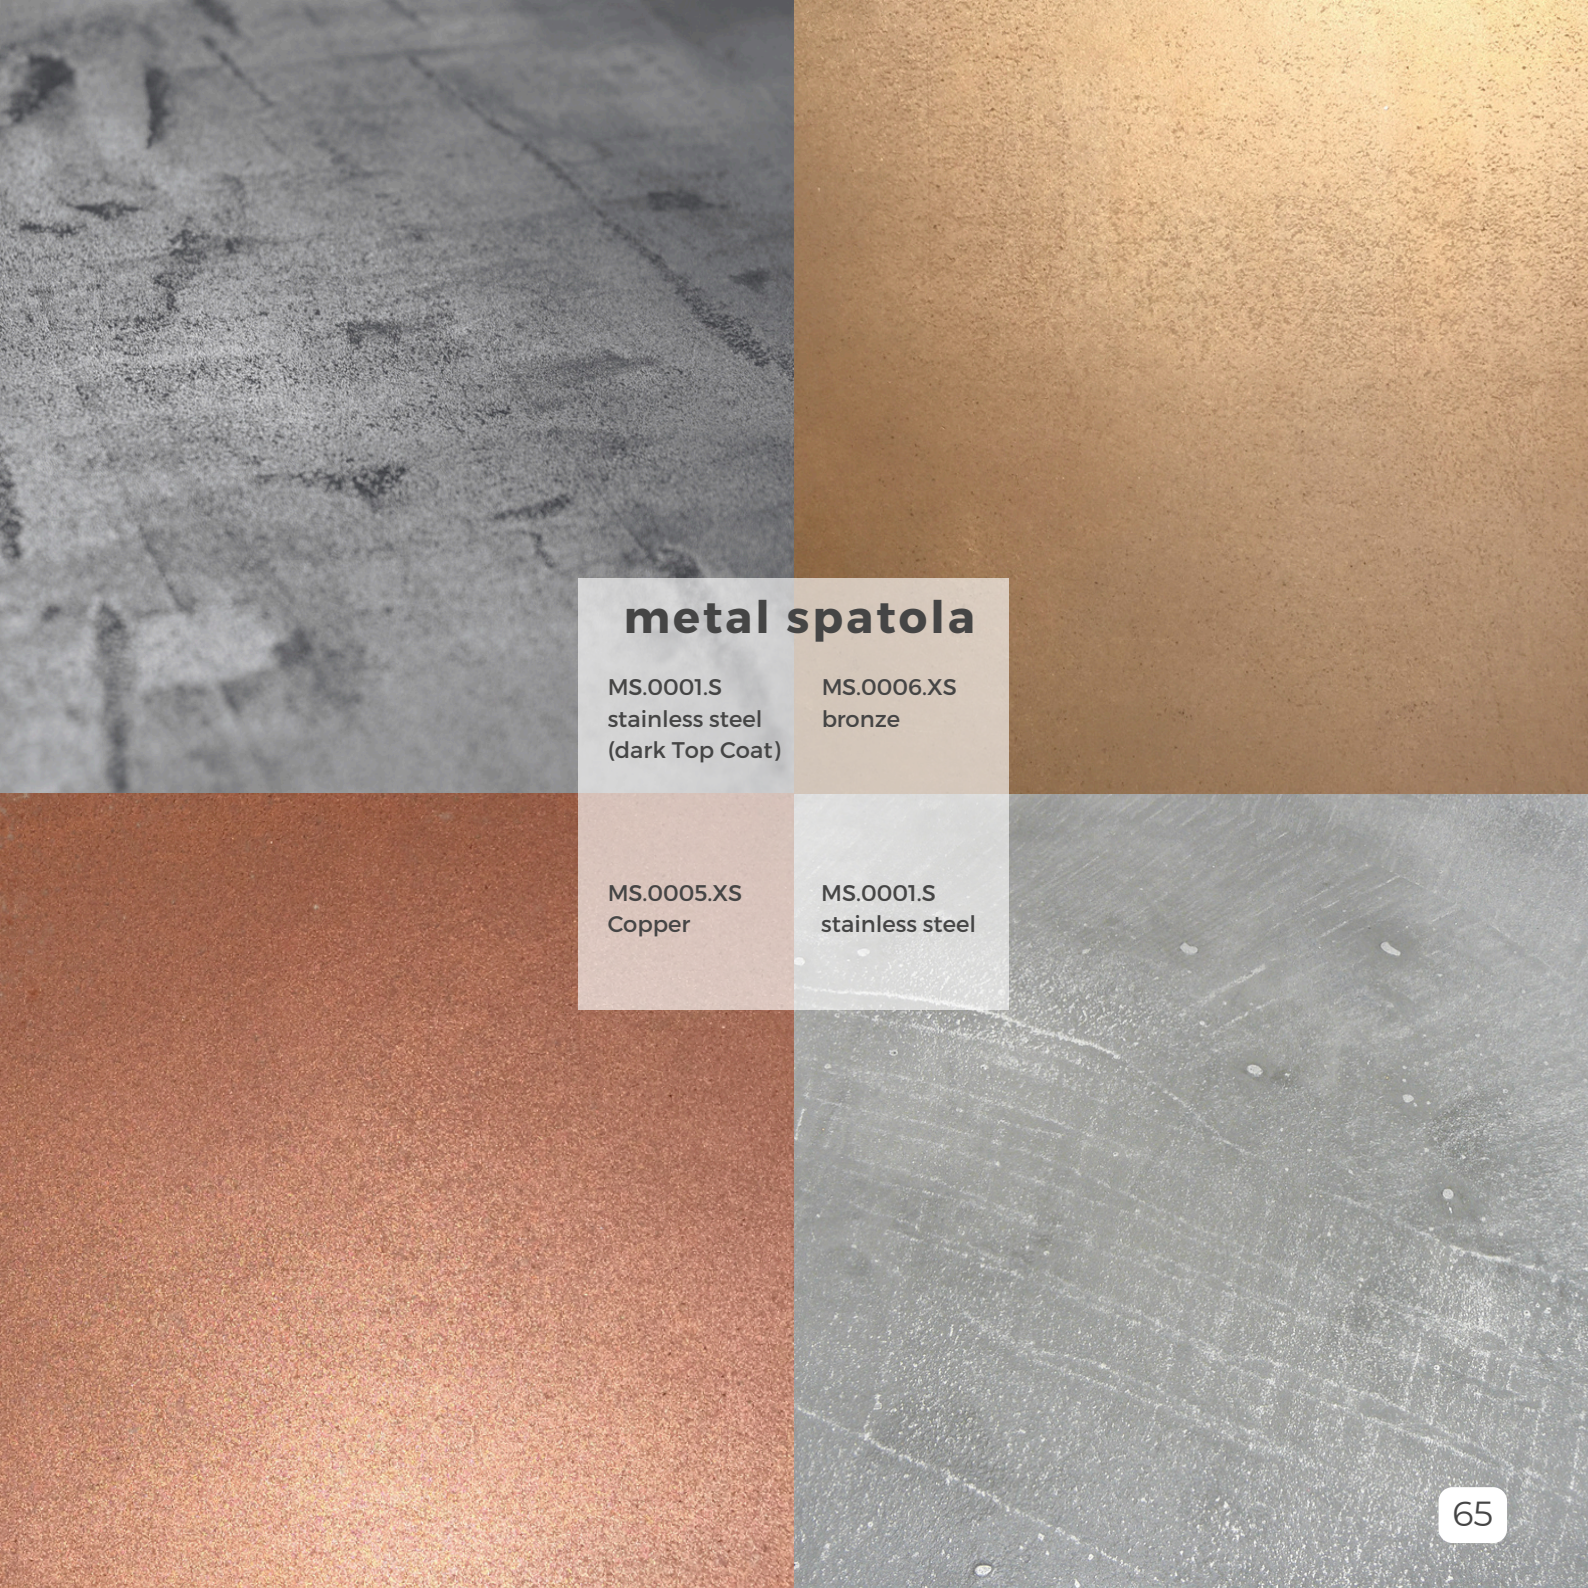

- walls & floors
- retail & showrooms
- restaurants & hospitality
- offices & interior spaces
- kitchens
- commercial & public areas

**Top features:**

- real metal particles
- unique 3D effects
- patterns, logos & lettering possible
- individual surface character
- exceptional design freedom
- dissipative properties*
