porviva® mineral system

porviva® mineral creates striking visual accents and gives every surface a distinctive, natural appearance. Made exclusively from natural minerals and genuine stone, it delivers authentic surfaces with unique character. Available in a wide range of color blends, **porviva® porpebble / mineral** offers exceptional design flexibility and tailored solutions for a variety of applications.

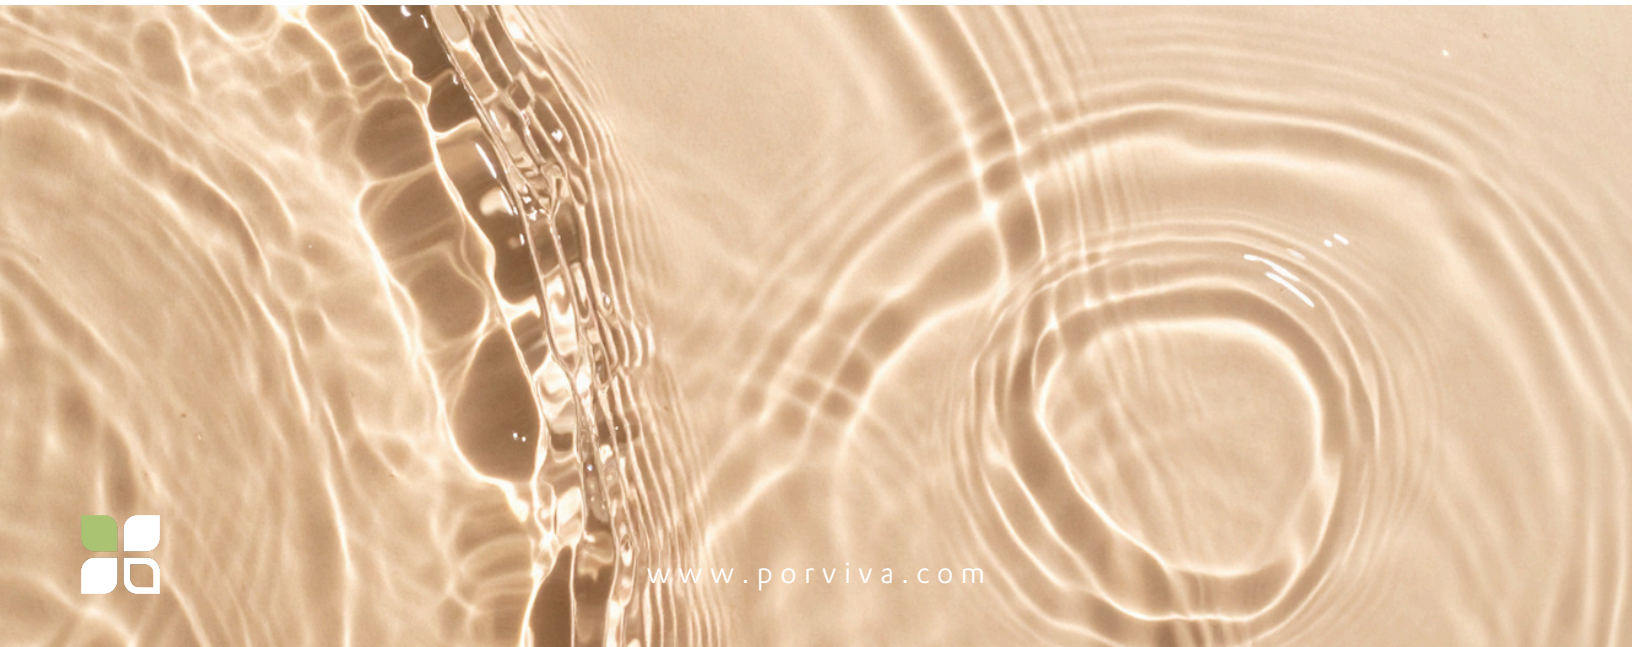

porviva® porpebble / mineral can be beautifully combined to create harmonious compositions, sophisticated color blends and striking visual effects. The wide variety of natural tones, structures and combinations opens up exceptional design possibilities for unique and expressive surfaces.

Fields of application:

- landscaping
- water features
- walkways
- pool decks & sun decks
- wet & changing areas
- restaurants & hospitality
- kitchens
- commercial & public areas
- parking areas

Top features:

- natural minerals & stone particles
- slip-resistant surface
- wide range of colors
- custom colors & blends
- gold or silver mica available
- subtle shimmering effects
- indoor & outdoor use

TECHNICAL DRAWING

porviva® mineral system

3 layer

3.1 top coat: pleyers. WB800®

pleyers. WB800® is a transparent protective top coat, available in matt or gloss. It provides high scratch resistance, an easy-to-clean finish and enhanced resistance to UV exposure and weathering

2 layer

2.2 particles: porbits® mineral

The materials can be used individually, blended together or arranged in color gradients to create various design effects.

2.1 primer: porfil® ECO

Transparent, solvent-free, non-yellowing epoxy primer and binder with water-blocking properties. It stabilizes the substrate and can be tinted with **porfil.® ECO Color Paste.**

1 layer

1.2 particles: porbits® mineral

Selected decorative particles forming the characteristic surface appearance and texture.

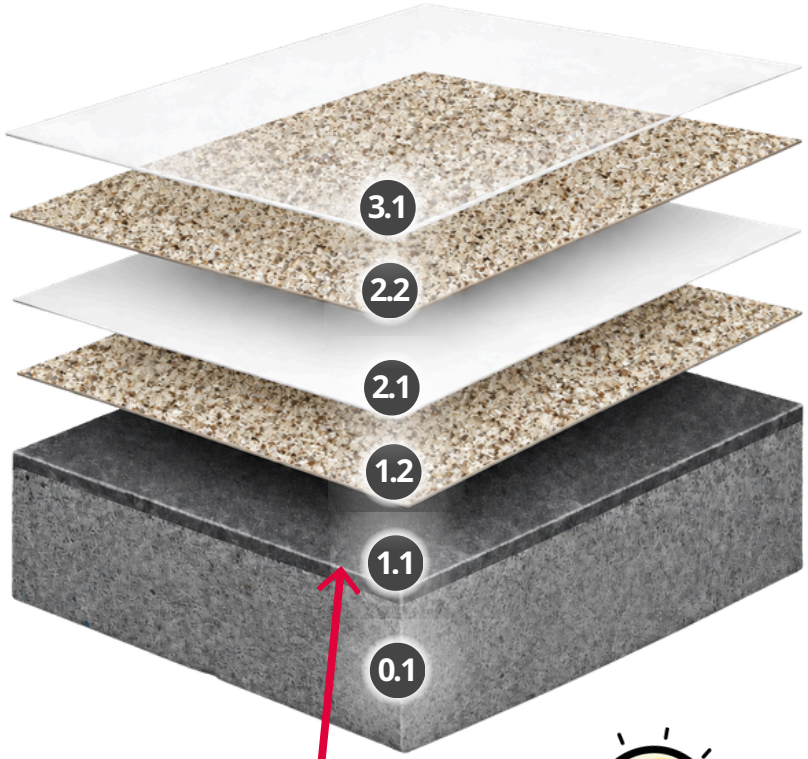

1.1 primer: porfil.® PLUS X

Patented, solvent-free primer with water-blocking properties, providing reliable adhesion and substrate stabilization.

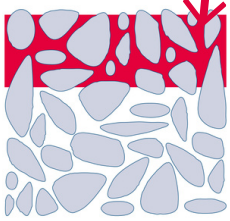

0 base

0.1 Concrete/ paver/ screed

Concrete/ pavers / screed or other suitable absorbent substrates according to specification and approval by porviva GmbH.

porfil.® method:
Pore-filling

- **excellent mechanical resistance**
- **suitable for application on fresh (green) concrete**
- **reliable adhesion**
- **no blistering (prevents osmotic issues)**
- **low material consumption**

» outstanding protection

1

primer: porfil.® PLUS X

10,00 kg unit
(8,00 kg A/ 2,00 kg B)

Patented, transparent, solvent-free epoxy primer with water-blocking properties, providing reliable adhesion and substrate stabilization.

2

primer & binder: porfil.® ECO

10,00 kg unit
(6,67 kg A/ 3,33 kg B)

Patented, transparent, solvent-free, non-yellowing epoxy primer and binder with water-blocking properties.

3

Color paste: porfil.® ECO color paste

0,50 kg unit
(290 ml)

High-quality pigment paste for tinting **porfil.®** ECO, providing uniform color and improved opacity.

4

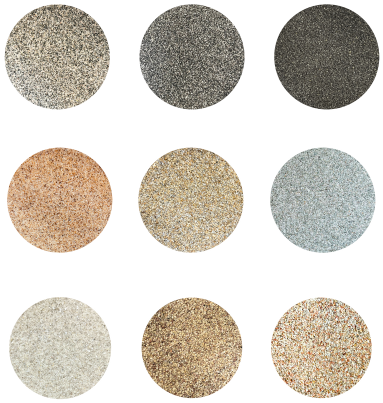

porviva® particles:
porbits® mineral

S/M/L: 25,00 kg unit
S/M/L: 1.000,00 kg unit

porviva® mineral is made from selected mineral and natural stone particles and is available in a wide range of color variations.

Color Disclaimer:
Please note that colors shown in brochures, samples, photographs and on screens may differ from the actual surface. Color perception can be influenced by lighting conditions, surrounding colors, natural material variations, camera settings, printing processes, individual monitor or display settings, and whether the surface is viewed dry or under water. For the most accurate color assessment, we recommend evaluating an original physical sample under the intended lighting and, where applicable, water conditions.

porviva® porpebble system

porviva® porpebble combines selected natural stone and shimmering mica particles to create sophisticated decorative surfaces with subtle sparkle, natural color variations and exceptional visual depth. Together with **porviva® mineral**, it offers almost unlimited design possibilities – from refined single-color surfaces to harmonious blends and smooth color transitions.

porviva® porpebble / mineral is suitable for both wet and dry areas and can be used indoors as well as outdoors. The slip-resistant surface makes the system particularly suitable for pools, rivers & lagoons, water features, wet & changing areas and landscaping, combining distinctive aesthetics with reliable performance.

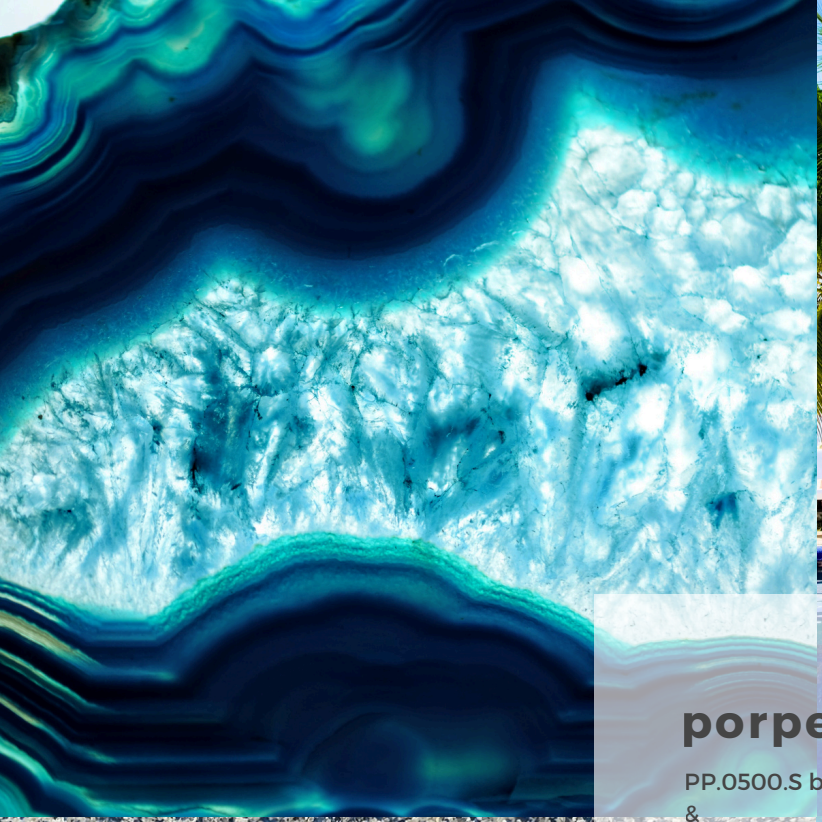

Fields of application:

- pools, rivers & lagoons
- water features
- surf pools
- wet & changing areas
- landscaping

Top features:

- natural stone & shimmering mica particles
- slip-resistant surface
- natural color variations
- custom colors & blends
- subtle shimmering effects
- indoor & outdoor use
