

Color Palette

porbits® mineral &
porbits® porpebble

porviva® mineral

Porviva Mineral creates striking visual accents and gives every surface a distinctive, natural appearance. Made exclusively from natural minerals and genuine stone, it delivers authentic surfaces with unique character. Available in a wide range of color blends, Porviva Mineral offers exceptional design flexibility and tailored solutions for diverse application.

porviva mineral and porviva porepebble can be beautifully combined to create harmonious compositions or seamless color gradients. Together, they open up inspiring design possibilities with smooth transitions and striking visual effects.

Fields of application:

- landscaping
- water features
- pools, rivers
- walkways
- sun & pool decks
- rest, locker & changing rooms
- restaurants/ bars
- kitchens
- warehouses
- carparks

porviva® porpebble/mineral system

3 layer

3.1 top coat: pleyers. WB800®

pleyers. WB800® transparent (matt/ gloss) is used as a scratch resistant and easy to clean top coat for interior and exterior use. The weathering and UV stability of the flooring increase.

2 layer

2.2 particles: porbits® mineral/ porpebble

The materials can be used individually blended together, or arranged in color gradients for different design effects.

2.1 primer: porfil. ECO®

transparent, solvent-free, non-yellowing epoxy primer, water blocker, binder for porviva particles, and surface stabilizer enhanced with tinted **white porfil. ECO Color Paste**.

1 layer

1.2 particles: porbits® mineral/ porpebble

patented porbits synthtetic® particles, UV-stable, with anti-slip and cooling effect.

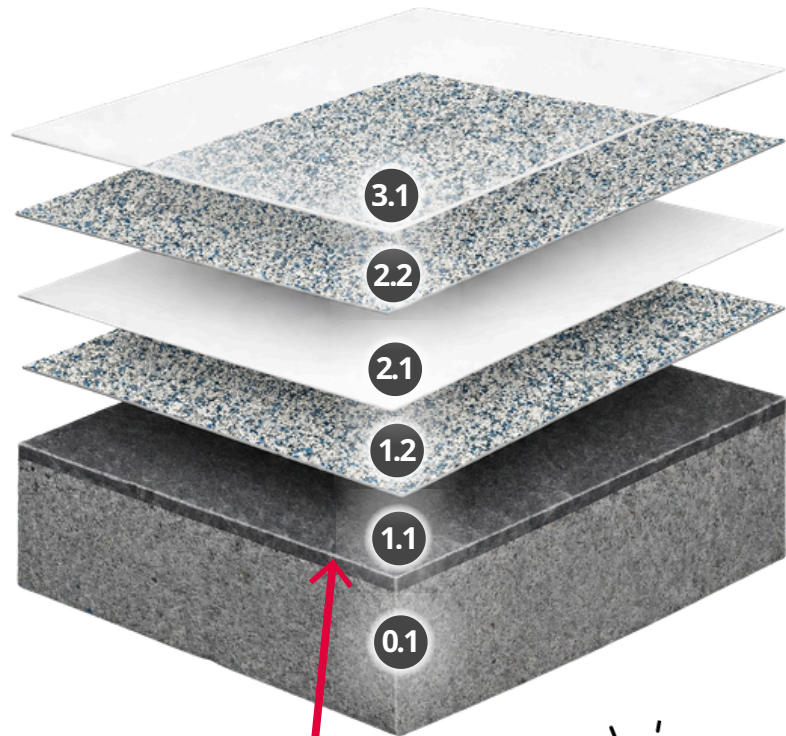

1.1 primer: porfil. PLUS X®

patented solvent free primer, waterblocker, binder for porviva particles and surface stabilizer.

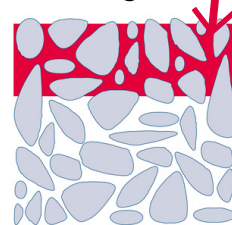

0 base

0.1 Concrete/ paver/ screed

Concrete, paver, screed or other suitable absorbent substrates according to specification and approval of porviva gmbh.

porfil.® method: Pore-filling

- excellent mechanical resistance
- promotes the curing of fresh (green) concrete
- reliable adhesion
- no blistering (prevents osmotic issues)
- low material consumption

» outstanding protection

1 primer:
porfil. PLUS X®

10,00 kg unit
(8,00 kg A/ 2,00 kg B)

patented transparent solvent-free epoxy primer, waterblocker, binder for porviva particles and surface stabilizer.

2 primer & glue:
porfil. ECO®

5,00 kg unit
(4,00 kg A/ 1,00 kg B)

patented transparent solvent-free non-yellowing epoxy primer, waterblocker, binder for porviva particles and surface stabilizer.

3 Color paste:
porfil. ECO® color paste

0,25 kg unit

High-quality pigment paste designed for tinting porfil. ECO. It provides strong color intensity and improves opacity, ensuring a uniform and streak-free finish.

4 porviva particles:
porbits porpebble®

S/M/L: 25,00 kg unit

porviva porpebble is made from pure minerals, natural stone, and glass. The two color mixes add a soft sparkle and smooth color variations for a unique surface feel.

5 porviva particles:
porbits mineral®

S/M/L: 25,00 kg unit
S/M/L: 1.000,00 kg unit

porviva mineral is made from pure minerals and natural stone. It offers a wide range of color variations, including mica gold and silver shimmer.

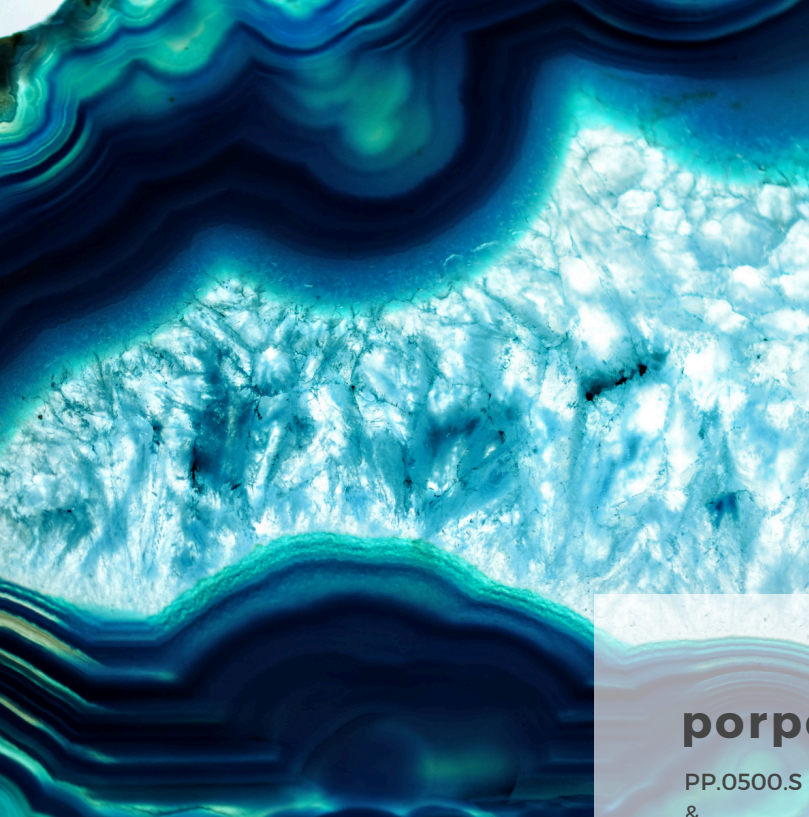

6 top coat:
pleyers. WB800®

10,00 kg unit
(8,34 kg A/ 1,66 kg B)

pleyers. WB800® transparent (matt/ gloss) is used as a scratch resistant and easy to clean top coat for interior and exterior use. The weathering and UV stability of the flooring increase.
