

Innovative solutions
for water parks, pools
& leisure parks

Gerd Pleyers

PORVIVA FOUNDER & INVENTOR

Who we are:

Since 2001 we have been an internationally active, young family business based in Germany with a committed team that is constantly coming up with innovative solutions to our customers needs. We create coatings that provide waterproofing, durable antislip and different cooling solutions alongside with profound technical consultation.

Sustainability is in the foreground of our development. We highly value the protection of our environment and resources such as raw materials, drinking water and energy.

What we do:

Porviva GmbH develops, produces and distributes materials and product solutions which make an important contribution to our future. We offer solutions for specialized floor coatings and waterproofing in water/ theme parks, buildings, transportation infrastructure and industrial applications.

"Time dictates competition on the world market. Not the big defeat the small, but the fast the slow."

Eberhard von Kuenheim

porviva products

-  pool coatings
-  indoor and outdoor coatings
-  water slide coatings
-  coatings with cooling effect
-  primer (waterblocker)
-  top coats transparent & colored
-  metal coatings
-  natural stone coatings
-  decorative granules
-  metal granules
-  metal spatola
-  personalised products (private labels)

INNOVATIVE DESIGN – FUNCTIONALITY & ENDLESS POSSIBILITIES

The **porviva** system consists of porbits. Our porbits are small particles of various materials. Examples of these materials include coloured minerals, natural stone and mica glimmer. These porbits can be combined or mixed with each other.

The **porviva** porbits can be used nearly universally - be it in the living room, terrace or pool. **porviva** is suitable for floors, walls, bathrooms, even for furniture and other surfaces, both indoors and outdoors as our porbits are lightfast, uv-stable and water-resistant.

porbits. synthetic are acrylic-based crushed particles, coloured through with natural pigments. They are available in many tints, NCS and RAL-Colours. **porbits** can be mixed to fit individual taste and needs.

Not only are colourful designs possible, **porbits. synthetic** can even be mixed with our **porbits. mineral** and **porbits. metal** ranges of granules to create a variety of surfaces exhibiting different surface properties and looks that fit any budget whilst being based on the same technically sophisticated **porviva** coating system.

Each **porviva** surface is tailored to your unique technical and design-specific needs.
