WHY CHOOSE ESTONE

QUARTZ STONE / SINTERED STONE /
ROMAN ESTONE / TRANSLUCENT STONE

Welcome to Estone, where innovation meets elegance. Estone specializes in 4 premier product categories: Quartz Stone, Sintered Stone, Solid Surface & Natural Stone.

Quartz Stone: Our quartz stone is crafted using 93% natural quartz combined with high-quality polymer resins and color pigments. This meticulous process, involving intense vibration, vacuum, and pressure, produces dense slabs with marble-like colors, a lasting shine, exceptional hardness, and a non-porous surface. The anti-pollution texture ensures superior resistance to liquid penetration, making it a preferred choice in architectural decoration for its unparalleled beauty and durability.

Sintered Stone: Estone's sintered stone is an embodiment of advanced technology and natural beauty. Created through a process that involves high temperatures and extreme pressure, sintered stone offers unmatched strength, UV resistance, and a scratch-resistant surface. Its versatility and aesthetic appeal make it ideal for both indoor and outdoor applications, providing a timeless elegance to any space.

At Estone, we are dedicated to delivering top-quality materials that enhance the aesthetic and functional value of your projects. Discover the perfect blend of luxury and performance with Estone's Quartz and Sintered Stones.

5-YEARS LIMITED WARRANTY

Enjoy lasting peace of mind with Estone's 5-Years Warranty. Our quartz and sintered stones are designed for durability and enduring beauty, ensuring your surfaces remain pristine for years. Terms and conditions apply.

CARE & MAINTENANCE

QUARTZ STONE / SINTERED STONE /
ROMAN ESTONE / TRANSLUCENT STONE

Estone (Quartz, Sintered Stone, Roman Estone and Translucent Stone) is crafted for superior performance with minimal maintenance, ensuring your surfaces remain like new.

For routine daily cleaning, we suggest wiping your Estone (Quartz, Sintered Stone, Roman Estone and Translucent Stone) benchtop with warm, soapy water using a pH-neutral household detergent or a mild detergent and a damp cloth. Being a non-porous material, Estone (Quartz, Sintered Stone, Roman Estone and Translucent Stone) maintains its glossy, smooth finish without the need for polishing, sealing, or waxing.

We advise against attempting to polish Estone (Quartz, Sintered Stone, Roman Estone and Translucent Stone) surfaces yourself and recommend avoiding prolonged rubbing in one area while cleaning. Rinse thoroughly with water. Avoid using bleach on or near Estone surfaces.

FOOD & CATERING PREPARATION

Estone (Quartz, Sintered Stone, Roman Estone and Translucent Stone) recommends always using a chopping board for food preparation. Cutting directly on the Estone surface can damage both your kitchen knives and the benchtop.

HOW TOUGH?

Estone (Quartz, Sintered Stone, Roman Estone and Translucent Stone) can be damaged by strong chemicals and excessive weight. Avoid placing heavy items on your benchtop, such as tradespeople standing on it while working. Keep away from high alkaline/pH products like oven cleaner, paint strippers, paint removers, bleach, and nail polish remover. If exposed, rinse immediately with clean water to neutralize the effect and follow normal cleaning procedures.

FOR INTERIOR APPLICATIONS ONLY

Estone (Quartz) is designed exclusively for indoor use. The Estone (Quartz) 5-Years Limited Warranty does not cover outdoor applications, as direct sunlight exposure can cause discoloration. To maintain the quality of your Estone surfaces, we recommend limiting exposure to direct sunlight.

HEAT RESISTANCE

Estone (Quartz, Sintered Stone, Roman Estone and Translucent Stone) offers high heat resistance for brief exposures to moderate heat. However, prolonged direct contact or radiated heat can cause damage or discoloration due to thermal shock. Avoid placing hot kitchenware (like oven trays, pans, pots, and electric frying pans) directly from the hotplate or oven onto the Estone surface. Always use a hot pad or trivet to protect the surface from hot items.
