# Our Team

## Lucas Talbot *Director*

Lucas is the Director of Range Environmental and has over 20 years of experience in environmental management & consulting. His industry knowledge, understanding of regulatory frameworks and pragmatic mindset is highly regarded by our clients. Lucas is a Suitably Qualified Person (SQP) for contaminated land assessments in Queensland. Lucas' strengths are his attention to detail, applied industry experience and knowledge and diverse technical skills. Lucas works collaboratively with the client and field staff to achieve improved environmental performance by developing practical, common-sense solutions that fit with a project and its available resources.

## Sam Donald *Principal Environmental Scientist & Team Leader*

Sam has completed numerous land and water assessment projects throughout Queensland and New South Wales. He is a Suitably Qualified Person (SQP) for undertaking contaminated land assessments in Queensland. His experience includes water quality monitoring and management, agricultural land assessments, soil management planning and contaminated land assessment, management, and remediation. Sam is an established project and team manager who can think on his feet and develop innovative solutions to complex land and water problems faced by our clients.

## Will Gibson *Senior Ecologist*

Will is a Senior Ecologist delivering extensive flora and fauna monitoring and management solutions for species of Local, State and National environmental significance. Will has experience in vegetation mapping and rehabilitation, environmental planning and education, bushfire management and provides a unique perspective across a range of specialised areas. Will's practical application of the environmental planning legislation is highly sought after by many developers achieving seamless development assessment processes.
