

RECAP: WHAT'S NEW IN ENCORE

cluen[®]

**CENTRALIZED SYSTEM.
LESS BACK-AND-FORTH.**

AI-POWERED CAPABILITIES BUILT FOR HOW YOU WORK

Cluen Data Connector API

Directly connect Encore to the tools your team already uses like Outlook, Gmail, Excel, PowerPoint, and more. Build BD dashboards, engagement trackers, and search performance reports without duplicating data entry.

Role-Specific Training & Feedback Loops

Whether you're onboarding a new research associate or rolling out a firmwide BD process, Encore now supports training tracks tailored to your team's roles, ensuring faster time-to-value and stronger adoption.

AI-Powered Candidate Summaries

Auto-generate drafts of professional bios and search summaries with structured data pulled directly from the record. Great for shortlists, scorecards, and real-time client updates—especially when deadlines are tight.

Private, Compliant AI Infrastructure

Encore's AI tools are powered through a private OpenAI API, meaning no data is stored, reused, or exposed. They are fully GDPR-compliant, secure, and built for retained executive search confidentiality standards.

WANT TO SEE HOW THIS APPLIES TO **YOUR WORKFLOW?**

Encore is constantly evolving to make search easier and more effective. If you'd like to see how these updates could work for your team, we'd be happy to show you around.
