Analysis by [Dr. Joseph Mercola](#)

In a January 2021 lecture, Jonathan Latham, Ph.D., introduced the term “the pandemic virus industrial complex,” to describe the academic, military and commercial complexes that are driving the pandemic agenda and obscuring facts that indicate SARS-CoV-2 is a manmade virus.

In the video above, David E. Martin, Ph.D., introduces shocking evidence that SARS-CoV-2 is indeed a manmade bioweapon, and has been in the works for decades. Much of this research was funded by none other than the National Institutes of Allergy and Infectious Diseases (NIAID) under the direction of Dr. Anthony Fauci.

Pandemic virus industrial complex indeed! You do not want to miss this bombshell interview, conducted by Reiner Fuellmich,<sup>1</sup> founding member of the German Corona Extra-Parliamentary Inquiry Committee<sup>2,3</sup> (Außerparlamentarischer Corona Untersuchungsausschuss or ACU<sup>4</sup>). A transcript<sup>5</sup> is available if you prefer to read it.

## **SARS-CoV-2 Is Not a Novel Coronavirus at All**

Martin has been in the business of tracking patent applications and approvals since 1998. His company, M-Cam International Innovation Risk Management, is the world’s largest underwriter of intangible assets used in finance in 168 countries. M-Cam has also monitored biological and chemical weapons treaty violations on behalf of the U.S. government, following the anthrax scare in September 2001.

According to Martin, there are more than 4,000 patents relating to the SARS coronavirus. His company has also done a comprehensive review of the financing of research involving the manipulation of coronaviruses that gave rise to SARS as a subclone of the beta coronavirus family.

In his testimony to ACU, he reviews some of the most pertinent patents, showing SARS-CoV-2 is not a novel coronavirus at all but, rather, a manmade virus that has been in the works for decades.

And what we found ... are over 120 patented pieces of evidence, to suggest that the declaration of a ‘novel coronavirus’ was actually entirely a fallacy. There was no novel coronavirus ... it’s not been novel for over two decades. ~ David Martin, Ph.D.

A comprehensive list of 120 patents relating to SARS-CoV-2-associated features can be found [here](#).<sup>6</sup> The features patented are referenced in two key scientific papers, “A Novel Bat Coronavirus Reveals Natural Insertions at the S1/S2 2 Cleavage Site of the Spike Protein and a Possible Recombinant 3 Origin of HCoV-19,” and “The Proximal Origin of SARS-CoV-2.”

On that list, we see numerous patents detailing manipulation of the polybasic cleavage site for SARS-CoV, the [spike protein](#), as well as ACE2 binding, all three of which are supposed to be unique features of SARS-CoV-2. As explained by Martin:

*“We took the reported gene sequence, which was reportedly isolated as a novel virus, indicated as such by the ICTV, the International Committee on Taxonomy of Viruses of the World Health Organization. We took the actual genetic sequences that were reportedly novel and reviewed those against the patent records that were available as of the spring of 2020.*

*And what we found, as you’ll see in this report, are over 120 patented pieces of evidence, to suggest that the declaration of a ‘novel coronavirus’ was actually entirely a fallacy.*

*There was no novel coronavirus. There are countless, very subtle modifications of coronavirus sequences that have been uploaded, but there was no single identified ‘novel coronavirus’ at all.*

*As a matter of fact, we found records in the patent records, of sequences attributed to novelty, going to patents that were sought as early as 1999. So not only was this not a novel anything ... it’s not been novel for over two decades.”*

### **Spike Protein Vaccine for Coronavirus Patented 22 Years Ago**

Up until 1999, coronavirus patents were all in the veterinary sciences. The first coronavirus vaccine to use the S spike protein was patented by Pfizer in January 2000 (Patent No. 6372224). It was a spike protein virus vaccine for canine coronavirus. You can look up the actual patents for yourself on the United States Patent and Trademark Office’s website,<sup>7</sup> if you like.

*“Ralph Baric’s work on ... rabbit cardiomyopathy ... and then canine coronavirus in Pfizer’s work, to identify how to develop S spike protein vaccine target candidates, [give] rise to the obvious evidence that ...*

*... neither the coronavirus concept of a vaccine, nor the principle of the coronavirus itself, as a pathogen of interest with respect to the spike proteins behavior, is anything novel at all. As a matter of fact, it’s 22 years old based on patent filings,” Martin says.*

### **From HIV Vaccine Development to COVID-19**

According to Martin, Fauci and the NIAID “found the malleability of coronavirus to be a potential candidate for HIV vaccines,” and in 1999, Fauci funded research at University of North Carolina Chapel Hill (where Baric has a lab) to create “an infectious replication-defective coronavirus” specifically targeted for human lung epithelium.

The patent for that replication-defective coronavirus that attacks human lung cells was filed April 19, 2002 (Patent No. 7279327). “In other words, we made SARS,” Martin says. Or perhaps more accurately, Fauci and UNC did. Several months after that patent filing, the SARS outbreak in Asia occurred.

*“That patent, issued as U.S. Patent 7279327 ... clearly lays out in very specific gene sequencing, the fact that we knew that the ACE receptor, the ACE2 binding domain, the S-1 spike protein, and other elements of what we have come to know as this*

*scourge pathogen, was not only engineered, but could be synthetically modified in the laboratory using nothing more than gene sequencing technologies.*

*Taking computer code and turning it into a pathogen, or an intermediate of the pathogen, and that technology was funded exclusively, in the early days, as a means by which we could harness coronavirus as a vector to distribute HIV vaccine.”*

### **Coronavirus — A Biological Weapon Candidate Since 2001?**

As mentioned, Martin has monitored biological and chemical treaty violations since 2001, following the anthrax attacks. Throughout the fall of 2001, an “enormous number” of bacterial and viral pathogens were patented through the National Institutes of Health, the NIAID, the U.S. Army Medical Research Institute of Infectious Diseases (USAMRIID) and their international collaborators.

“Our concern was that coronavirus was being seen as not only a potential manipulatable agent for potential use as a vaccine vector, but it was also very clearly being considered as a biological weapon candidate,” Martin says.

Before the SARS outbreak in China, Martin reported these concerns publicly. “So, you can imagine how disappointed I am to be sitting here ... having 20 years earlier pointed that there was a problem looming on the horizon with respect to coronavirus,” he says.

### **CDC Holds Patents on SARS Coronavirus**

In April 2003, after the SARS outbreak in China had occurred, the U.S. Centers for Disease Control and Prevention tried to file a patent for the entire gene sequence for the SARS coronavirus (Patent No. 7220852). This is a violation of 35 U.S. Code Section 101, which states you cannot patent a naturally-occurring substance.

That CDC patent also had several derivative patents associated with it, including U.S. patent 46592703P and U.S. patent 7776521. These two patents cover the gene sequence of SARS coronavirus and the means for detecting it using RT PCR testing. Together, these patents are highly problematic, because if you own both, then “you have a cunning advantage to being able to control 100% of the provenance of not only the virus itself, but also its detection, meaning you have entire scientific and message control,” Martin explains.

The CDC tried to justify the patent by saying they were being sought in order to ensure that everyone would be free to research coronaviruses. However, that is a lie, Martin says. The U.S. patent office rejected the patent on the gene sequence as unpatentable because it was 99.9% identical to a coronavirus that was already in the public domain. The CDC paid an appeal fine in 2006 and again in 2007. They also paid an additional fee to keep the application private. In the end, the CDC overrode the patent examiner’s rejection and secured the patent in 2007.

“Last time I checked, if you’re trying to make information available for the public research, you would not pay a fee to keep the information private,” Martin says. According to Martin, the gene sequence filed by the CDC in 2003, 2005 and 2006 is 89% to 99% identical to the sequence identified as SARS-CoV-2.

### **Sequoia Pharmaceuticals**

April 28, 2003 — three days after the CDC filed its patent for the SARS coronavirus — Sequoia Pharmaceuticals filed a patent on an antiviral agent for the treatment and control of infectious coronavirus (Patent No. 7151163). So, the CDC files a patent on SARS coronavirus, and three days later there’s a treatment?

This strongly suggests there was a working relationship behind the scenes. Sequoia Pharmaceuticals, founded in 2002, develops antiviral therapeutics with a special focus on drug-resistant viruses.<sup>8</sup> Its lead investors include the Wellcome Trust.

But there's yet another problem with Sequoia's 2003 filing for an antiviral agent. It was actually issued and published before the CDC patent on SARS coronavirus had been granted, which didn't happen until 2007, and the CDC had paid to keep the application private.

*"So, the degree to which the information could have been known by any means other than insider information between those parties is zero," Martin says. "It is not physically possible for you to patent a thing that treats a thing that had not been published, because CDC had paid to keep it secret."*

*This, my friends, is the definition of criminal conspiracy, racketeering and collusion. This is not a theory, this is evidence. You cannot have information in the future, and form a treatment for a thing that did not exist. It is a RICO case ...*

*And the RICO pattern, which was established in April of 2003 for the first coronavirus, was played out to exactly the same schedule when we see SARS COV-2 show up, when we have Moderna getting the spike protein sequence by phone from the vaccine research center at NIAID, prior to the definition of the novel subclade. How do you treat a thing, before you actually have the thing?"*

### **Sanofi Holds Patents to Novel Feature of SARS-CoV-2**

The next bombshell revelation occurred on June 5, 2008, when Ablynx, now a part of Sanofi, filed a series of patents detailing what we've been told are novel features of SARS-CoV-2, namely the polybasic cleavage site, the spike protein and the ACE2 receptor binding domain. The first of those patents, U.S. Patent No. 9193780, was issued November 24, 2015.

Between 2016 and 2019, a series of patents were issued to Ablynx and Sanofi covering the RNA strands and the subcomponents of the gene strands.

Between 2008 and 2017, a series of patents were also filed by a long list of players, including Crucell, Rubeus Therapeutics, Children's Medical Corporation, Ludwig-Maximilians-Universität in München, Protein Science Corporation, Dana-Farber Cancer Institute, University of Iowa, University of Hong Kong and the Chinese National Human Genome Center in Shanghai.

This series of patents detail ever single attribute that is supposed to be unique to SARS-CoV-2, according to the paper, "A Novel Bat Coronavirus Reveals Natural Insertions at the S1/S2 2 Cleavage Site of the Spike Protein and a Possible Recombinant 3 Origin of HCoV-19."

This paper has routinely been used to identify the so-called novel coronavirus that is SARS-CoV-2. Yet there are 73 patents, issued between 2008 and 2019, that describe the very elements that are said to be unique to SARS-CoV-2. Patents have been filed for SARS-CoV-2's polybasic cleavage site, the ACE2 receptor binding domain, and the spike protein.

"So, there was no 'outbreak' of SARS, because we had engineered all of the elements of that," Martin says. And by 2016, when Baric published a paper warning that SARS coronavirus was "poised for human emergence," the virus in question had already been patented for commercial exploitation 73 times!

### **The Pandemic Virus Industrial Complex Is Swimming in Profit**

Baric is one of the few people who has profited significantly from this pandemic, which he appears to have been part of creating. Another is Fauci. The same drug companies that hold patents on not-so-novel SARS-CoV-2 features are also raking in profits from their COVID shots.

In 2015, [Dr. Peter Daszak](#), head of the EcoHealth Alliance that funneled research dollars from the NIAID to the Wuhan Institute of Virology for coronavirus research, who has promoted the official narrative that SARS-CoV-2 has a natural origin, stated:<sup>9</sup> *“We need to increase public understanding of the need for medical countermeasures such as a pan-coronavirus vaccine. A key driver is the media and the economics will follow the hype. We need to use that hype to our advantage, to get to the real issues. Investors will respond if they see profit at the end of the process.”*

Sounds an awful lot like what we’re facing right now, doesn’t it? At the end of the day, this pandemic has primarily been about profit and the [shifting of wealth](#), from the lower- and middle-classes to the already ultra-wealthy. This is a war on the public, waged using biological weapons and information warfare, with the ultimate goal of [“resetting” life and commerce](#) as we know it.

### **Intentional Weaponization of Spike Protein**

Martin says:

*“There wasn’t a lab leak. This was an intentional bio-weaponization of spike proteins to inject into people, to get them addicted to a pan-coronavirus vaccine. This has nothing to do with a pathogen that was released, and every study that’s ever been launched to try to verify a lab leak, is a red herring.*

*[There are] 73 patents on everything clinically novel — 73, all issued before 2019. And I’m going to give you the biggest bombshell of all to prove that this was actually not a release of anything, because Patent No. 7279327, the patent on the recombinant nature of that ‘lung-targeting’ coronavirus, was transferred mysteriously from the University of North Carolina Chapel Hill to the National Institutes of Health in 2018.*

*Now, here’s the problem with that. Under the Bayh-Dole Act, the U.S. government already has what’s called a march-in right provision. That means if the U.S. government has paid for research, they are entitled to benefit from that research at their demand or at their whim.*

*So, explain why, in 2017 and 2018, suddenly the National Institutes of Health have to take ownership of the patent that they already had rights to, held by the University of North Carolina Chapel Hill. And how did they need to file a Certificate of Correction to make sure that it was legally enforceable, because there was a typographical error in the grant reference in the first filing?*

*They needed to make sure that not only did they get it right, but they needed to make sure every typographical error that was contained in the patent was correct on THE SINGLE PATENT REQUIRED, to develop the Vaccine Research Institute’s mandate, which was shared between the University of North Carolina Chapel Hill and Moderna in November of 2019, when UNC Chapel Hill, NIAID and Moderna began the sequencing of a spike protein vaccine — a month before an outbreak ever happened.”*

### **‘New Normal’ Coined by Merck at 2004 Bioterrorism Conference**

The more we learn, the grimmer it gets. Clearly, plans for our current-day predicament were laid well over a decade ago. According to Martin, the slogan “The New Normal” was coined by Merck during a January 6, 2004, conference called “SARS and Bioterrorism, Emerging Infectious Diseases, Antimicrobial Therapeutics, and Immune Modulators.”

This term has now become a branded campaign adopted by the World Health Organization, the Global Preparedness Monitoring Board and the rest of the [pandemic virus industrial complex](#).

Incidentally, Fauci is on the board of directors of the Global Preparedness Monitoring Board, as is Dr. Chris Elias, president of the Global Development Program at the Bill & Melinda Gates Foundation, and George Fu Gao, Ph.D., director-general of the Chinese CDC and a Chinese communist party member.<sup>10</sup>

It's a long interview, but it does not disappoint. I urge you to take the time to listen to it, as Martin really lays out the timeline of when and how this pandemic virus came to be. He's also published a 205-page paper<sup>11</sup> detailing Fauci's involvement that you can download from [archive.org](#).

It now seems clearer than ever that everything we're experiencing was planned and executed with a profit motive in mind. Armed with this new knowledge, I urge you once again to reclaim your life, your freedom and independence, and resist this manufactured notion of a "new normal." A new normal will surely be established if we persist, but it will be the converse of what the pandemic virus industrial complex is hoping for.

We will resurrect medicine and science from the induced coma these fields are currently in, and usher in a new era of medical freedom, personal liberty, responsible and transparent government, fiscal stability and health care that actually promotes health rather than slow death. It may take a while, but together, we can do it. To get there, keep sharing information such as that provided by Martin in this mind-blowing interview in any way you can. In the end, truth will prevail. Believe it.

This now ends where it started. Three proofs, COVID-19 was first detected in China, It was made in labs, and it even has a patent in China and U.S. None of this work was done by me.

1 of 3

Proof that the virus called COVID-19, WIV1 or even US Patent 9193780 started here.

Dr. Martin: Specifically they targeted what was called the poly basic cleavage site for SARS COV, the novel Spike protein and the ACE-2 receptor binding domain which is allegedly novel to SARS COV-2. And all of that was patented on the 5th of June 2008, and those patents, in sequence were issued between ->November 24th of 2015, which was US Patent 9193780, so that one came out after the gain-of-function moratorium, that one came after the MERS outbreak in the Middle East.

Dr. Martin There was no outbreak of SARS, because we had engineered all of the elements of that, and by 2016, the paper that was funded during the gain-of-function moratorium, that said that the "SARS coronavirus was poised for human emergence", written by none other than "Ralph Barrack", was not only poised for human emergence, but it was patented for commercial exploitation, 73 times.

Message from PLA Vaccine Patent.  
Zhiyan-Le, 2021-03-15.

Patents of nCov S-Gene by PRC Wuhan Institute of Virology (WIV), and that of nCov vaccine by PRC PLA doctor Chen Wei team, sent a clear message that the SARS-2/Covid-19 virus can be man-made. Dr. Chen Wei especially emphasized that the single gene GC quantity and

distribution have a significant contribution to the stability of the virus and its affinity with human ACE2. Such message suggests that the SARS-2 origin comes from artificial chimera WIV1 (Wuhan Institute of Virology, No. 1 virus), that is, the source of the pandemic does not come from natural animals such as bats in PRC Yunnan province or in South-East Asia communities.

First, sampling for the S-gene sequence, chosen from NIH GenBank and WIPO:

NC-045512: Base sample, from Wuhan patient, collected at a local hospital in December 2019.

WIV1: A synthetic nCov by Wuhan Institute of Virology (WIV), completed in 2015.

RaTG13/S: Bat sample, said that was collected by WIV on September 2013 and released on February 2020, reported as the source of this pandemic.

WIV-CN101100680: S-Gene patent by WIV, 2007.

WIV-CN102690336: S-Gene patent by WIV, 2012.

BJ\_WO2006136084: S-Gene patent by PRC Academy of Medical Science, 2006.

CW\_CN111218459/DNA: Chen Wei vaccine gene sequence patent, on the production line on February 2020.

CW\_CN111218459/S: Chen Wei vaccine virus gene patent, on the production line on February 2020.

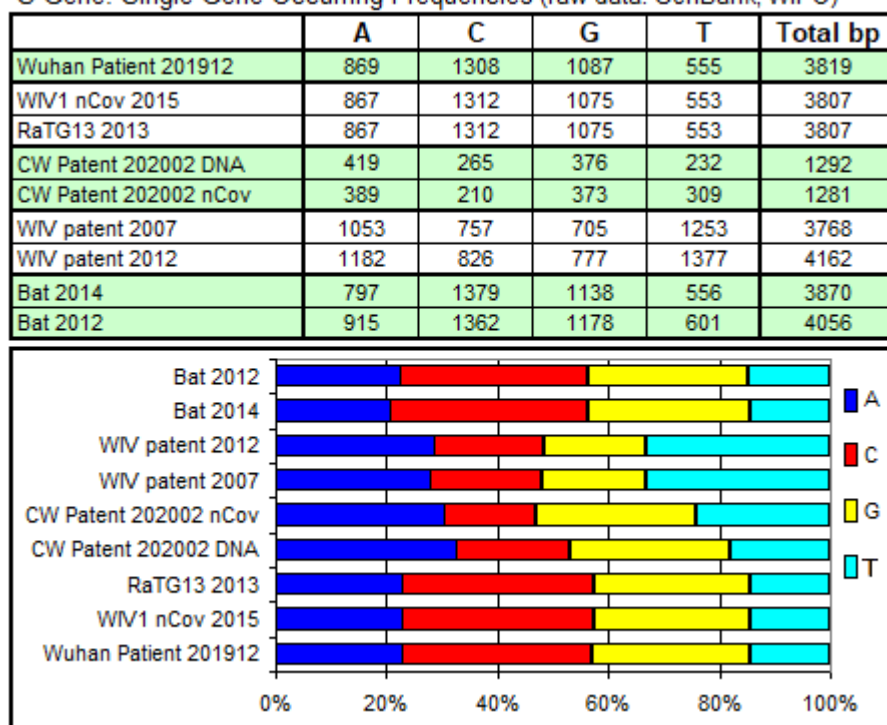

MG916902.1: Yunnan bat sample, collected in 2012.

NC\_030886.1: Yunnan bat sample, collected in 2014.

The above samples, and their single gene (basic gene) GC and AT of the S-protein, can be found in NIH GenBank and WIPO, as follows:

MIT Virologist Tells UK Parliamentary Committee That SARS-CoV-2 Was Likely Engineered, Originated at the Wuhan Institute of Virology

By Scott Hounsell | Dec 17, 2021 7:00 PM ET

While the rest of the scientific community have conveniently forgotten that their role is to question and explore without having a foregone conclusion in mind, one scientist has been at the forefront of questioning the origins of COVID-19, but her work has been largely ignored by the media and scientific community. Alina Chan, a molecular biologist at the Broad Institute of MIT and a postdoctoral fellow at Harvard, told the UK Parliament Science and Technology Select Committee this week that the SARS-CoV-2 virus was likely engineered, and likely originated at the Wuhan Institute of Virology.

Yet more confirmation a BSL-2 Lab was being used, where a BSL-4 Lab should have been used and “WIV had developed its own reverse-genetics system, following the Americans’ lead”.

#### Brand-new pathogens

In 2014, the NIH awarded a five-year, \$3.75 million grant to EcoHealth Alliance to study the risk that more bat-borne coronaviruses would emerge in China, using the same kind of techniques Baric had pioneered. Some of that work was to be subcontracted to the Wuhan Institute of Virology.

Two years later, Daszak and Shi published a paper reporting how the Chinese lab had engineered different versions of WIV1 and tested their infectiousness in human cells. The paper announced that the —>WIV had developed its own reverse-genetics system, following the Americans’ lead. It also included a troubling detail: the work, which was funded in part by the NIH grant, had been done in a BSL-2 lab.<— That meant the same viruses that Daszak was holding up as a clear and present danger to the world were being studied under conditions that, according to Richard Ebright, matched “the biosafety level of a US dentist’s office.”

—>Even if there is no link to covid-19, allowing work on potentially dangerous bat viruses at BSL-2 is “an actual scandal,” says Michael Lin, a bioengineer at Stanford University.<—

Did you really think they were standing around for the completion of their first BSL-4 Laboratory (level 4 lab) for one and one half years. Then it's time for you to look at the date on this email.

Note: The Wuhan China's first BSL-4 Laboratory (level 4 lab) was accredited in February 2017 by the China National Accreditation Service for Conformity Assessment, and began working on live viruses by 2018.

How does this work with Chinese GOF experiments. According to the email shown below, bioweapon experiments should have taken place in a BSL-4 Laboratory. However, the first and only BSL-4 Laboratory in China with accreditation occurred in February 2017 by the China National Accreditation Service for Conformity Assessment. And, so it is that work on a live virus could not start until 2018.

Then where were the China bioweapons GOF experiments done, for the next year and one half, in a BSL-2 Laboratory (reference below) in China by Director Shi Zhengli.

It was to be China's first high-containment laboratory.

Construction began in 2004 and took 11 years and \$44 million to complete.

Spread out over 3,000 sqm and covering four floors, it was accredited in February 2017 by the China National Accreditation Service for Conformity Assessment, and began working on live viruses by 2018.

**Note:** you remember WIV1, US Patent 9193780 or COVID-19.

Daszak and Shi published a paper reporting how the Chinese lab had engineered different versions of WIV1 and tested their infectiousness in human cells. The paper announced that the WIV had developed its own reverse-genetics system, following the Americans' lead. It also included a troubling detail: the work, which was funded in part by the NIH grant, had been done in a BSL-2 lab. That meant the same viruses that Daszak was holding up as a clear and present danger to the world were being studied under conditions that, according to Richard Ebright, matched "the biosafety level of a US dentist's office."

Ebright believes one factor at play was the cost and inconvenience of working in high-containment conditions. The Chinese lab's decision to work at BSL-2, he says, would have "effectively increase[ed] rates of progress, all else being equal, by a factor of 10 to 20"—a huge edge.

The Bid

**Note:** The CDC or Shi Zhengli could provide the gene sequence for "The Bid" based on the **patent 9193780** of 2015 or the COVID-19 virus.

What do you need in order to develop a vaccine? You require the gene sequence of the virus in order to estimate the cost for-->**The Bid**.

Note: the “Special Project” requires a Bid. Reference the image below.

**Dr. Martin:** The CDC paid an appeal fine in 2006 and again in 2007. They also paid an additional fee to keep the application private. In the end, the CDC overrode the patent examiner’s rejection and secured the patent in 2007.

“Last time I checked, if you’re trying to make information available for the public research, you would not pay a fee to keep the information private,” Martin says. According to Martin, the gene sequence filed by the CDC in 2003, 2005 and 2006 is 89% to 99% identical to the sequence identified as SARS-CoV-2.

**Note:** the date —>**2018** and **Shi Zhengli’s** bat coronavirus research.

In 2018, Chinese Academy of Sciences initiated a “Special Project” to develop, among other things – new vaccines.

Saying this out loud: In **2018**, Chinese Academy of Sciences (CAS) initiated a “Special Project” to develop – among other things – new vaccines based on Shi Zhengli’s bat coronavirus research.

How did Moderna and the Wuhan Lab know, that it needed a COVID-19 vaccine almost 2 years before it was released in 2020?

Starting with the realization that Moderna required time, money and effort to develop the mRNA product based on someone else’s patents long before there was even a proven market for COVID-19 vaccine. One of the two critical patent claims was filed on March 5, 2018, and the other on January 9, 2019. As you will see, these patents belonged to Arbutus Biopharma Corporation.

These two patents prove the Vaccine and the Virus were made and planned.

Arbutus’ U.S. Patent No. 9,364,435 (IPR2018-00739 filed March 5, 2018: claims 1-6, 9, 12, 14, and 15 found unpatentable),

Arbutus’ U.S. Patent No. 8,058,069 (IPR2019-00554 filed January 9, 2019: no challenged claims found unpatentable),

Now remember “The Bid”

As you would expect, Moderna was ready to begin work, *but not on an end product they didn’t completely own*. The Arbutus LIPIDS.

*Why is this so called – nCov19 patented under the false narrative of being a virus when the patent clearly states that this is a manmade thing.*

*A physic channeler of white light in origin was told that this is the same thing and virology study that killed a Mr. and Mrs. Anthony Michael Furfaro in Hawaii by Dr failing to allow Mr. Furfaro to bank his own blood and inferring it to be that of an urgent life or death matter. Mr. Furfaro was told that he had to make a decision within 3 days or he would need to find another Dr to do the 5-valve open heart surgery.*

*The blood bank of Hawaii did not get notified in a timely manner of the mandatory blood testing that all other US blood banks were given back in the mid 1986. The Dr. was notified about a year later and was asked if he knew how to get in touch with the Furfaros. The reply was NO his is no longer our patient, try the blood bank or Queen's Hospital for medical record information. It should be on the registration forms and patient information intake forms and documentation.*

*This lead the only female daughter of this couple, parentless when they died; she was under the age of 24. when that happened making her the only living orphan of the Queens documentation of claiming 100% orphan of the state Hawaii. These forms were given and signed by the immigrant families that were in charge of the sugar cane fields in Koloa Kauai, and a few others on the island of Maui. The Pacarro record keepers should have those papers still in hand.*

*At the time of their untimely death the family was planning a trip to introduce and show their love child aka "Tweety Bird" to the family of Blue Island IL. whom was named after her father "little Buddy the errand boy of the docks" to see the US and visit the family back in Chicago, and across the country before they destroyed it according to the "play" called an agenda to start a conspiracy written back in the early 1930s [and adjenda that was not supposed to come to be – Michelle doesn't know where the documents of last will and testaments for her estate and land title for the Disney estate and Campbel industrial estate with the orange pamphlet for the show is.] Mr. Furfaro worked fro the family as an errand boy on the docks in Blue Island IL for the Rockafeller oil barrons in the 1930s and then served as the Head Oil Refining engine/machinist and ran the family business there in Hawaii, the company changed its name from Standard Oil based in IL to that of Standard Oil Co of CA.*

*Mr. Anthony "Bud" or "Buddy" Furfaro as friends and family in Hawaii knew him helped bring the Hawaiian Islands into the Industrial Revolution age. To also bring the agreement of the gov't for their healthcare cemente buildings for healthcare in the US and abroad, for all military branches and including the French Foreign Legion and the British Military along with NATO.*

*His only daughter Michelle was just coming into her 20's when they passed because of CDC and Faucci's code name Faucci Ouchey. History is repeating itself and now I am forced to either take this nCov-19 man made virus of Blood Platelet manipulation. or risk losing my JOB and lively hood and lose my second set of children again by trying to correct the injustice to me and my familia and get me out of living in squaller and poverty like*

Michelle's family did back in the days of the depression and Spanish Flu, late 1890s early 1900s.

Anthony Fauci and the CDC and WHO along with the UN Created this AIDs circus then changing the terminology to HIV/Aids inferring that you get HIV first then it changes to Aids. Which is a complete false hood based, it is the other way around. This can be found on the CDCs archived files and in the vault in Colorado, Hills – her code was escape from which mountain, and when she was all alone after they found out Mr. and Mrs. Furfaro had died and met Carla, they made the movie Return to which mountain. Michelle never saw that movie but was trained well and was able to self-program herself according to her programing at the Tavi stock institute in CA called Laurel Canion. Her enlistment agreements were scribbled in red and then redone at her grandmother's house in Makaha where they used a blood checker to verify her blood and then dipped her pen into the spot and had her scribble her initials MA F . She is and was coded as Dawn Delta by way of hypnotic programing when they gave the child over 16 shock treatments and other things that she is not fully aware of yet.

She actually IDed the man that would create the virus that would kill her father, she was told that this was like an ESP traning where she met yuri geller and showed him how to mind bend the spoon as shown in the Matrix movie. She has been able to hold on to her full mental capasities while doing this all alone but closely observed undercover military protection.

She is now trying to stop Fauci's latest DNA splicing to manipulate and change humans into mRNA – rDNA forms to bring out and create supersoldiers with the coal color eyes, and minds not functioning properly. Commonly referred to as "Black Eyed' children which are now being borne

Monsanto has the patent and owns the rights to all non-organic altered DNA, commonly known as GMO. They have a law in the court system that says that no-one can bring a law suit against Monsanto or Big Pharma unless she reveals herself and takes her chances of being exterminated. As shown in the Terminator 2 movie.

At the time of the first court case in Hawaii around this known disease, Michelle would have been sharing the happiness of her first-born son by her then boyfriend Honorio Cortez Madriaga Junior. That resided in Kalihi.

**Could someone please contact then president William Clinton to further grant back the Hawaiian Isles as according to the Akaka Land Bill, Barak Obama and former sweetheart crush David Fasi that attended Iolani High School and went to Harvard to become an attorney for this matter, and also please could someone please contact T. Proof that the virus called COVID-19, WIV1 or even US Patent 9193780 was born here. It has been said that a rose by any other name is still a rose. Well, this is not a rose but a murderous weapon.

Dr. Martin: Specifically they targeted what was called the poly basic cleavage site for SARS COV, the novel Spike protein and the ACE-2 receptor binding domain which is allegedly novel to SARS COV-2. And all of that was patented on the 5th of June 2008, and those patents, in sequence were issued between ->November 24th of 2015, which was US Patent 9193780, so that one came out after the gain-of-function moratorium, that one came after the MERS outbreak in the Middle East.

Dr. Martin There was no outbreak of SARS, because we had engineered all of the elements of that, and by 2016, the paper that was funded during the gain-of-function moratorium, that said that the "SARS coronavirus was poised for human emergence", written by none other than "Ralph Barrack", was not only poised for human emergence, but it was patented for commercial exploitation, 73 times.

Google Patents: EP1694829B1; US20070128224A1. Why did the French Hospital in Vietnam take a Corona virus to their level 4 lab? Why did they add 4 parts of AIDS?. (According to Nobel in AIDS research, French scientist Luc Montagnier.) In the state of Florida there is aggressive marketing urging citizens to test themselves for AIDS and the medicine for AIDS has made a strong comeback from a marketing point of view.

Actually the true reason for the Big push to get tested for HIV in Florida is because they have one of the largest populations of the elderly living there and People in that age group have had a significant increase in HIV. We believe it's due to lack of knowledge in using protection from all STD's when having intercourse and many in this population had been married to just 1 spouse for many years, then their spouse dies and they begin dating again and not use to being so concerned about contracting STD's.

I got sick Oct 2019. By Nov I thot I was dying of the flu. But just a few days earlier I tried to go to a doctor and was told to stay home the flu was an epidemic and they couldnt see me. I started looking up my symptoms and found a whole list of tampered viruses in ths SARS Corona family including PEDV2 which had similar symptoms and cause havoc in the pork industry for a decade surrounding 2013. I wound up on ER Nov 29 2019, unable to breathe. I'd already thought my kids might find my body. The doc scoped my lungs and told me they were very red and looked "dry". Dry not just as in the absence of excess mucous but dry as in not moist! MONTHS later I learned I'd been diagnosed with a COLD! Since when did a cold become a killer like Ruebella Measles? I had Ruebella and CLEARLY recall every symptom. I was sicker this time than in the 1960s. But the moment I had overcome this was exactly the same physical feeling I had the moment my body conquered the Ruebella disease. Within a few days a US Senator was warning us of a loose virus in China. Interestingly it was patented as a new virus in 2019! But its not new. Its a decade old tampered strain. Its doesnt take a genius to follow the trail. It wasn't bread crumbs. Its scientific research that was published snd accessible ONLINE. I read dozens of documents! Of course after it became a pandemic most of these docs were wiped from the web or buried likely by owners of search engines that can change algorithms to avoid keywords I'd used to locate those pages. But PEDV2 research is available, atleast for now. Check it out. The symptoms pigs had will shock you.

There is a virus. A man made virus that was released so a vaccine could be pushed. The vaccine wasn't made for CoVid-19. CoVid-19 was made for the vaccine.

Fauci was also directly involved with the testing of Remdesivir through the NIH in Africa (because 'they' always test their toxic drugs in in Africa), the mandated protocol for all hospitals in the treatment of COVID. After 6 months, the trials with Remdesivir had to stop because the adverse reactions (including death) were so high!

Yet, while knowing this, Fauci immediately implemented Remdesivir as the sole protocol for hospitals to use on diagnosed patients. Why? People are not dying from COVID in hospitals, they are dying from the 'treatment'.

There is so much information out there to prove this. I strongly suggest people do their own due diligence and never, ever rely on the 'medical advice' of doctors, the CDC, or Fauci.

You are absolutely correct! Fauci did fund this research through the NIAID. One of the Grants number 1 RO 1 AI 110964-01, list all involved in the research and who should be number one, but Daszak. I find it flabbergasting no back ground checks are completed on individuals wanting grant money and US tax dollars are paying for grant money being funded to countries who in all reality could and would used the material as a bioweapon against the very people who gave them the research money in the first place. This is only one of the grants. In addition, what sickens me the most about Fauci, is his attitude toward the whole situation and the countess lives lost. As if the rest of the world is stupid and only his opinion matters. I cannot stand to look at him. In my eyes, he has set medicine and the ethics of care back centuries. But how would he know or begin to comprehend this notion? He has never practiced bedside medicine. He has never created a bond between doctor and patient. He reminds me of the storyline of Dr Jekyll and Mr Hyde. Evil prevailed!

I watched Dr. Martin's video interview several weeks ago and immediately sent it to 15 embassies of 15 major countries. I emailed it to several governors including my Governor, Ron DeSantis, who is fighting Biden's vax mandates at every step of the way. I also emailed several news organizations and 200 friends and family. You are absolutely right about Dr. Fauci. After graduating from medical school he went straight to NIH as a researcher and administrator. He's never cared for a single patient in his pathetic life. Dr. Lee Merritt believes he operates as a "bagman" for several various entities. She pointed out that \$800 billion has crossed Fauci's desk. That's almost a trillion taxpayer dollars Fauci has doled out to his associates doing gain of function research into three bioweapons

we know of: HIV, SARS, and MERS. Read the book "AIDS, EBOLA, and Other Emerging Viruses" by Dr. Leonard Horowitz. Dr. Horowitz proves in this book that HIV/AIDS was manmade and released into the gay community so they could follow the rate at which the disease spread using gay men as guinea pigs. San Francisco and the Village in NY City bore the brunt of Fauci's evil work. After the Hep virus outbreak among the gay community in 1977, Horowitz theorizes that Fauci used the Hepatitis B virus vaccine to spread the HIV virus. Five years later, 1982, what became known as the gay disease AIDS began ripping through the gay community, killing thousands! Ft Detrick is the suspected level 4 bioweapon lab that was used to develop the HIV virus. Dr. Robert Gallo claimed he discovered it. In reality, Gallo created the retrovirus known as HIV. Every one of these Genocidal maniacs and their sponsors must be held accountable. Check out Dr. Richard Flemming. He is another great human being working diligently on bringing them all to justice. His videos are uplifting and very informative.

I read that in 3rd world countries in the 80s were having outbreaks of Hepatitis after getting vaccinated. Turns out the monkeys used to create the vaccines had Hepatitis. I don't believe in coincidence. I do believe there are people in this world who think in terms of 'us and them' and from their point of view "them" are collateral damage. They do not believe other people in the world have any value outside of how much asset they can gain from their labor, their purchases and by gaining as much \$ as possible by keeping them sick. It's the Hegelian Dialectic. It's been used by the elites since the Roman Era. All their generational wealth comes from using people and creating events from which they can amass great fortunes. Follow the money. All the same names are on the list for decades.

**Ralph Baric, professor of microbiology and immunology, successfully created “an infectious clone of the urbani strain of the SARS coronavirus” by July 2003 at the U.S. “Army’s top bio-level three labs in Maryland,” according to an article published by UNC-Chapel Hill in 2003.**

Ralph Baric’s 2015 paper, “A SARS-like cluster of circulating bat coronaviruses shows potential for human emergence,” was a tour de force, utilizing bleeding-edge genetic technology to alert the civilized world to a looming danger on its periphery. It also revived concerns about gain-of-function experiments, which Baric had known it would. In the paper, he spelled out the extra precautions he’d taken and held up the research as a test case. “The potential to prepare for and mitigate future outbreaks must be weighed against the risk of creating more dangerous pathogens,” he wrote. “Scientific review panels may deem similar studies building chimeric viruses based on circulating strains too risky to pursue.”

The NIH decided the risk was worth it. In a potentially fateful decision, it funded work similar to Baric’s at the Wuhan Institute of Virology, which soon used its own reverse-genetics technology to make numerous coronavirus chimeras.

Regardless of the Factcheck report or not. Nobody has addressed Fauci's testimony that the point of the Bat Coronavirus research was to cause a spillover into humans. Someone leaked that information and now I can't find his testimony anywhere on the internet. Plus, what about the claim that President O'bama wouldn't allow the Coronavirus research to continue in America so Fauci moved it to Wuhan China and continued to fund it? Those things are not mentioned in the labeling of this pandemic's cause as conspiracy theory. I would like to see that testimony and the evidence that O'bama did halt Coronavirus research on American soil AND evidence that Fauci simply moved the research to China and continued to fund it. If these two items can be proven by evidence, I may be inclined to believe the conspiracy

theory. However, being a Public Health Professional and holding an MPH degree, I did learn that we follow medical “interventions” to be healthy. A vaccination for whatever disease is a medical intervention.

Too true.

Reuters is part of the “Trusted” (ha ha) News Initiative along with a host of other big-tech and media companies that are busy censoring, dispelling concerned healthcare professionals worldwide, and running their own misinformation campaigns.

<https://www.bbc.com/mediacentre/2020/trusted-news-initiative-vaccine-disinformation>

"The partners currently within the TNI are: AP, AFP; BBC, CBC/Radio-Canada, European Broadcasting Union (EBU), Facebook, Financial Times, First Draft, Google/YouTube, The Hindu, Microsoft, Reuters, Reuters Institute for the Study of Journalism, Twitter, The Washington Post."

Interestingly, Jim Smith (current Chairman of the Thomson Reuters Foundation and the former president) is also \*conveniently\* on the Pfizer Board. He's also a member of the International Business Council of the World Economic Forum. So influential fingers in influential pies.

<https://www.thomsonreuters.com/en-us/posts/authors/jim-smith/>  
[https://www.pfizer.com/people/leadership/board-of-directors/james\\_smith](https://www.pfizer.com/people/leadership/board-of-directors/james_smith)  
<https://www.weforum.org/agenda/authors/jim-smith>

"People all over the world are desperate for unbiased information that they can trust. However, when the chairman of a media company like Reuters also sits on the board at Pfizer how can we believe that there isn't any form of bias occurring in their coverage of the vaccine rollout? Are we to really believe that there is no conflict here? Do people really believe someone can sit on the board of a major vaccine manufacturer and still provide unbiased coverage of that same vaccine? I don't think you can remain unbiased – but that's just my take."

At the top levels, these sorts of incestuous relationships are rife.  
Time to wake up people.

A gene sequence is NOT an isolated virus. And using the word “reportedly” is NOT fact. This is gibberish “*We took the reported gene sequence, which was reportedly isolated as a novel virus,*”

Ah, this goes into the definition of the word “isolated” on the patent itself. In the official patent of “Coronavirus isolated from humans” patent number:

US7220852B1 <https://patents.google.com/patent/US7220852B1/en> SARS-COV. Under the definitions section the term isolated is written as such:

“Isolated: An “isolated” microorganism (such as a virus, bacterium, fungus, or protozoan) has been substantially separated or purified away from microorganisms of different types, strains, or species. Microorganisms can be isolated by a variety of techniques, including serial dilution and culturing. An “isolated” biological component (such as a nucleic acid molecule, protein or organelle) has been substantially separated or purified away from other biological components in the cell of the organism in which the component naturally occurs, such as other chromosomal and extra-chromosomal DNA and RNA, proteins, and organelles. Nucleic acids and proteins that have been “isolated” include nucleic acids and proteins purified by standard purification methods. The term **also** embraces nucleic acids and proteins prepared by recombinant expression in a host cell, **as well as chemically synthesized nucleic acids or proteins, or fragments thereof.**

**The last sections in bold being the most important distinctions to be made in the definition. Hope this helps.**

Joseph Mercola is a successful anti-vaccine entrepreneur, peddling dietary supplements and false cures as alternatives to vaccines. He is an osteopathic physician and his medical claims have been debunked by most of the medical and scientific communities. He is listed by Quackwatch.

you should actually do research on Big (p)Harma because they are killing more people than anyone listed on "Quackwatch".

To date the so called vaccine has killed 14000 people. Your description of Dr. Mercola is BS. He has guests on his pod cast like Dr. Peter McCullough (650 peer reviewed medical reports and articles) and Dr. Peter Breggin, Dr Robert Malone co inventor of the mRNA delivery system, etc who are experts and have the real information of the crimes being done by what did you call them most of the medical and scientific communities. I have witnessed hospitals sending Covid patients home who are told to come back if the symptoms get worse with absolutely no early therapeutics which have been proven can keep people out of the hospital. Then when the person returns to the hospital they are on deaths door step. You mean the vitamin D and Zinc Dr Mercola sells does not stop the virus from entering the cell or improve your immune system? You are a stupid idiot. Big Pharma recently reported a 17 percent rise in their profits yet their non vaccine allows vaccinated to get infected, causes strokes, heart attacks. blood clots in capillaries, blindness, death. Why aren't you talking about the profit of Big Pharma? Your Senators and House Members, FDA, CDC, NIH World Heath Organization all profiteers on orchestrated misery and misinformation. Are these on Quackwatch? If not Quackwatch is a fraud!

Mercola, the same "Doctor" that said Infrared lights and coconut oil could cure ailments? Yeah sounds like a reputable guy.

Give it up people, this guy is a grifter like your lord and savior Agent Orange Cheeto, but bless your little hearts since you need confirmation bias and need to learn how to actually read scientific literature, and yes, you can even do research for real articles on DuckDuckGo since google is "evil". Jokes on you if want to give this wack job money for him to tell you to take vitamin C or to link you to a video about little tentacle monsters under the glass

Keep in mind that the number does not include people who have not died...yet. The damage to the heart muscle is permanent, as is the damage to other organs caused by the spike protein. And, we don't even know what the lipid nanoparticles used to force the mRNA into cells are comprised of! It's mad science.

Thank you for exposing these nefarious activities...  
This helps fill in a lot of the head-scratching issues that have been so perplexing about this life-disrupting series of events and developments...  
Lord Fauci the virus midget has a LOT of explaining to do, but this also explains his continual tap-dancing, obfuscations and outright lies...
