## What is Medicaid Planning?

Medicaid Planning is the legal process of arranging your assets so that you will qualify for Medicaid benefits to cover the costs of long-term care needs (nursing home care, home care, assisted living) without having to spend down all of your assets. Early planning is key but it is never too late to take action to protect your hard-earned assets.

## The Benefits of Medicaid Planning are:

- Preserving assets for a spouse
- Protecting assets for children, heirs and other beneficiaries
- Saving funds for quality of life items not covered by Medicaid
- Protecting the home from a Medicaid lien
