

CARBINE DIGITAL

The Carbine Digital Locksets are a next generation product. Here's why: Incorporating a full lever handle on the inside rather than just a small knob, it is user-friendly. It is also the first digital lockset to come with its own stainless steel fitting plate. In this way you can easily retrofit a standard lockset. The existing

hole in the door will be covered without the installer having to custom-make a fitting plate. In addition, this lock is fire-rated! Carbine Digital locks have been improved on the standard market offerings and are tried and tested to offer you an edge in mechanical digital lock fitting.

ELECTRONIC TOUCH PAD

Features include:

- Fits in standard 54 mm lockset or deadbolt hole, no additional drilling required
