

CARBINE HARDWARE

Carbine is the next generation in locking. Carbine is a high-end brand of locking and hardware that is chosen by locksmiths and installers. Until Carbine, developments in mechanical locking systems had been few and far between. Even when a way was found of improving a current series of locks, there was little desire on the part of the manufacturers to change what 'always has been

the way'. Carbine pushes the boundaries and looks to solve the problems that have dogged the industry for years. The Carbine Hardware range incorporates door hardware and trim plates, cabinet and furniture locking, window & patio door locks. All Carbine products feature innovative designs and modular functionality so you get a product that solves problems.

T HANDLE

Carbine T handles bring cabinet locking to a new level of security. The additional strength of the lock body ensure maximum resistance to attack. The lock also features a completely modular system for changing locking position and a cylinder that can be removed from the front while in the unlocked position. Features include:

- Heavy duty construction
- Simple to adjust
- Can suit either 90 degree CW turning, 90 degree ACW turning and 180 degree CW or ACW turning
- All are rear fixed to minimize tampering of the lock
- Supplied with screws for solid and sheet steel doors
- 6 pin 530 cylinder on the Keyline LKW9 (Silca LW5) profile
- Standard 75mm spindle length
- High corrosion resistance
