

# How to Purchase a Havana Bucks Digital Gift Card

## 1. Go to Yiftee's website

Visit the Yiftee portal for your community's gift card

<https://app.yiftee.com/gift-card/havana-main-street--fl> OR

## 2. Choose a gift card amount

Select from preset amounts (e.g. \$25, \$50, etc.) or enter a custom value if that's allowed.

## 3. Pay the e-Delivery fee

Yiftee assesses a small processing fee for sending a digital gift card (typically \$1 plus 5% of the gift card value).

## 4. Send to the recipient

You can send the e-gift card directly to yourself or someone else via email or text.

- If giving it to yourself, treat it like a digital voucher for future use.
- If giving to another, they'll receive an email/text with instructions and a link.

## 5. Check email / spam folder for the voucher

Sometimes Yiftee's delivery email may land in spam — so check all folders.

---

## How to Use / Redeem Havana Bucks (via Yiftee)

Once you (or your recipient) have the digital voucher, here's how to redeem it:

### 1. Activate the voucher

Use the link provided in the email/text. The voucher must be activated before spending.

### 2. Choose how to present the voucher at checkout – you have three main options:

- **Tap-to-Pay:** Add the card to your mobile wallet (Apple Wallet or Google Pay), then tap at the payment terminal if the merchant accepts contactless payments.
- **Print Voucher:** Print the digital voucher and bring the paper copy to the store.
- **Use via Yiftee App:** **For Apple users:** download the Yiftee mobile app (if you haven't already), log in with the email that received the voucher — your card will appear under "My Gifts." Show it at checkout or use Tap-to-Pay if supported.

- **For Android users:** log-in to Yiftee.com and create an account. You will need to enter your name, email and create a password. Once you are logged in on your dashboard you will be able to track gifts you've sent, cards in your wallet and balances available on each card.

### 3. **Merchant Redeems It Like a Payment Card**

At the register, the merchant enters the 16-digit card number, expiration date, and CVV into their POS (point-of-sale) system as if processing a Mastercard-type payment.

- The card cannot be swiped — manual entry or tap-to-pay only.

### 4. **Be prepared for “split-payment” if needed**

If your purchase exceeds the available balance on the card, you'll need to pay the difference using another payment method.

### 5. **Check your balance**

You or the cardholder can check the remaining balance at any time by entering the card number on Yiftee's “Check Gift Balance” page.

### 6. **Refunds are allowed**

If a merchant issues a refund for a purchase made with the card, the funds can be returned to the same Yiftee card — just like with a regular credit card refund.

---

## **Why “Havana Bucks via Yiftee” Makes Sense for Our Community**

- The cards are designed to support **local small businesses**, encouraging gift-card spending at participating merchants instead of national chains.
