

Advancing Avionics Through: Innovation, Safety, Integrity

Texas Aerospace Technologies delivers NextGen aviation products that enhance the safety of flight through distribution and certification. We provide quick fulfillment of quality products and services while maintaining the highest level of integrity. We are more than a supplier; we are your partner, product consultant, technical support, and developer team. We put our 90+ years of combined avionics experience to work for your sustainability and growth.

Products | Services | Solutions

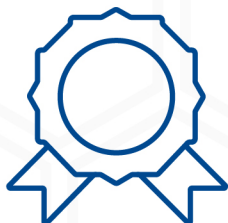

Our Key Offerings Include:

- PMA, MFG and kitting services
- Collaborative product development
- Guidance on parts obsolescence and aircraft sustainment solutions
- STC development and certification
- Engineering services
- Value-added distribution - items in immediate stock

What You Can Expect

Stocking Distributor

As a stocking distributor, our technical team is equipped to address integration questions and troubleshoot issues. We don't stop there - we also serve as the face of your product to the customer/dealer base. We are experienced marketers, and communicate the value of your work through multiple channels, including direct-end user campaigns, dealer relationships, HTML campaigns, website presence, print advertising, and trade events.

STC Development & Certification

Texas Aerospace Technologies invests in STC development, removing that burden from OEM partners. We offer 30+ years of combined experience and are known for our ability to turn projects around in a timely manner. Additionally, we have:

- A proven track record with creating AML STC's in many aircraft categories including (Part 23, 25, 27, 29)
- STC development through standard ACO application methods as well as ODA designees.

PMA Manufacturing and Kitting Services

Texas Aerospace Technologies has the ability to produce commercial and military parts. We provide turn-key kitting solutions with STC programs through PMA manufacturing. Pre-packaged and clearly labeled part components simplify the installation process and reduce man hours - saving you time, frustration, and money.

Engineering Services

Texas Aerospace Technologies provides expertise and guidance for new product development, including discovery and design phase of mechanical, electrical and software development, testing and certification. We offer DO-160 and DO-178 testing for STCs and PMA approvals.

Collaborative Product Development

Texas Aerospace Technologies wants to partner with you to design, build, certify and launch your next new product. Our team of experts will ensure a streamlined design and certification process.

We understand that funding a certification or new product can be challenging. Texas Aerospace Technologies seeks opportunities to work with your company to collaborate on new product launches and certifications to bring these products to market.

Aircraft Sustainment Solutions

Concerned with legacy components or parts obsolescence? Reduce downtime and maintenance costs through component replacement programs. With our PMA Manufacturing capabilities and OEM relationships, we will collaborate with your team to produce and certify parts that will help keep your aircraft flying. Upgrading your aircraft is a fast, reliable and efficient way to prolong and protect the life of your investments.

The Difference Is Ours

Texas Aerospace Technologies was created and designed to engineer success - for our buyers, our clients, inventors, and partners. Whether it's getting your organization over the next hurdle or engineering the next big concept- consider us an extension of your team to get the job done. Contact us today to start the conversation. Together, we take flight.
