

THE SAFER YOUR FACILITY IS, THE MORE PRODUCTIVE & EFFICIENT IT CAN BE.

We partner with you to provide a wide range of solutions that increase workplace safety, reduce downtime, and mitigate risk.

ELECTRICAL SAFETY

ARC FLASH RISK ASSESSMENT

- Compliance
- Training & Written Procedures
- Equipment
- Electrical Glove Certification

LOCKOUT TAGOUT (LOTO)

- Inventory
- Visual Procedures
- Customized Programs
- Gap Analysis

SIGNAGE & SYSTEM IDENTIFICATION

- Custom & Standard Signage
- Signage Printers

SLIP & FALL PREVENTION

FALL ARREST

- Harnesses
- Lanyards
- Engineered Systems

FLOORING

- Ergonomic & Anti-Fatigue Matting
- ESD Matting
- Entrance, Modular & Non-Slip Solutions

PERSONAL PROTECTION & TOOLS

- Ladder Inspections
- Slings
- Hoists

HEALTH & HYGIENE

ERGONOMICS

- On-Site Evaluations
- Design And Installation Of Sit-Stand Workstations & Seating

SAFETY & HYGIENE ANALYSIS

- 'Head To Toe' PPE & Safety Analysis
- Heat & Cold Environment Analysis
- Comprehensive Product Support

PERSONAL PROTECTION & TOOLS

- Showers & Eye Wash Stations
- Hand Hygiene & Contact-less Solutions
- Eye, Ear, & Respiratory PPE

EMPLOYEE SAFETY

CONFINED SPACE & ENTRY

- Instrumentation
- Breathing Air & Supplied Air Equipment
- Ventilation Solutions

GAS INSTRUMENTATION

- Certified Repair Center
- Calibration
- Product Solutions

PERSONAL PROTECTION & TOOLS

- Respiratory Fit Testing
- Respiratory Products Including SCBAs
- Respiratory Product Repair
- Intrinsically Safe Products
- Fire Resistant Apparel

ARC FLASH & ELECTRICAL SAFETY

Workers exposed to live electricity and working in potential arc flash environments need specialized personal protection equipment including garments, head protection, foot protection, hand protection and tools to use on the job. Our team can help you identify the appropriate head-to-toe PPE solutions, and recommend steps you can take to keep your team safe.

ARC FLASH RISK ASSESSMENT

- Completed by electrical engineers using NFPA 70E standard to collect data to perform calculations
- Infrared thermography is utilized to identify minor to major areas of concern so proactive measures can be taken and catastrophic breakdown prevented

ARC FLASH COMPLIANCE REVIEW

- Our certified electrical engineers will review your existing program, including current labeling and signage, to identify any related arc flash or compliance issues
- Product recommendations and documentation will be provided

ARC FLASH TRAINING

- We offer a wide range of arc flash training options, each tailor-made to your specific needs, including:
- Introduction to existing NFPA 70E standards & best practices
 - 'Refresher' Courses
 - Qualified Persons, and 'Train the Trainer' Courses

ELECTRICAL GLOVE CERTIFICATION

- We test all brands of electrical gloves to ASTM standards, Class 00 - Class 4
- We test sleeves, blankets & other electrically insulative items
- Documented test results provided

SIGNAGE & SYSTEM IDENTIFICATION

- Custom & Standard Signage
- Signage Printers
- Lockout Tagout

A&M Industrial is a full line distributor of head-to-toe PPE solutions and electrical testing and safety equipment from industry-trusted brands including:

800.864.2660 | WWW.AM-IND.COM

LOCKOUT TAGOUT (LOTO)

Lockout Tagout, or LOTO, is the OSHA standard for the control of hazardous energy. This procedure protects employees by addressing the necessary steps to disable machinery or equipment that could release hazardous energy or unexpectedly start. Lockout means to place a lock on a device in order to prevent a potentially dangerous energy release. Tagout means to place a tag on a switch or other shut off device to warn employees not to start that piece of equipment.

LOCKOUT PROCEDURE

- Visual Lockout Procedures: Using knowledge of OSHA's 1910.147 to create visual procedures and templates
- Annual Audit: we can review your existing procedures to ensure they meet current OSHA requirements
- Alternative Method Procedures

LOTO PROGRAM GAP ANALYSIS

- We can identify gaps in your current program while offering solutions to fill the gaps & strengthen procedures
- Lockout Machine Inventory Services: Identify equipment requiring LOTO

A&M Industrial is a leader in LOTO development and implementation. Our team of experts delivers unparalleled service, support, and solutions via our partnership with manufacturers including:

SLIP, TRIP & FALL PROTECTION

A&M Industrial delivers solutions that proactively protect your team against workplace accidents and injuries, and we can help you determine and take preventative measures to make your facility safer.

FALL ARREST

A personal fall arrest system prevents a worker in mid-fall from hitting the ground. We can provide:

- Harnesses, Lanyards & Anchors
- Engineered Systems

FLOORING

We partner with industry leaders to provide standard and custom:

- Ergonomic & Anti-Fatigue Matting
- ESD Matting
- Entrance, Modular & Non-Slip

LADDER INSPECTION

Our convenient ladder inspections are:

- Conducted in accordance with the ANSI & Manufacturer Specifications
- Performed On-Site By Specialists

**OVER 200,000
WORKPLACE FALLS
ARE REPORTED
ANNUALLY IN THE U.S.**

**OVER 104,000,000
LOST WORK DAYS
A YEAR ARE RELATED TO
SLIP & FALL INJURIES**

A&M Industrial proudly partners with safety leaders and innovators including:

HEALTH, HYGIENE & PPE

EAR PROTECTION • EYE PROTECTION • FULL BODY PROTECTION • HAND PROTECTION • HEAD PROTECTION • RESPIRATORY PROTECTION

A&M Industrial is your partner in creating and maintaining a safe work environment that is not only compliant, but also helps maintain your safety culture. Our manufacturing partners help us offer the best solutions in the business.

HEAD-TO-TOE PPE

- PPE & Safety Analysis: we can perform PPE Hazard Assessments, identify ineffective PPE and gaps in your safety program, and make product recommendations
- Showers & Eyewash Stations: rely on us for product selection assistance, inspections, and compliance review

ERGONOMICS

- On-Site Evaluations: we work with trusted partners to identify opportunities for improvement
- Wide Range Of Solutions: from Sit/Stand workstations, to anti-fatigue matting, we help you enhance both employee safety and productivity

Our team of experts delivers unparalleled analysis and service via our partnership with manufacturers including:

EMPLOYEE SAFETY

A&M Industrial can help you take preventative measures to make your team & facility safer.

RESPIRATORY PROTECTION

- Respiratory Fit Testing: we follow OSHA protocols and can perform both Qualitative & Quantitative Fit Tests
- Supplied Air Systems: designed to ensure safety, mobility, and maneuverability
- Respiratory Product Repair: we are a MSA C.A.R.E. (Certified Air Mask Repair) distributor/service center

GAS INSTRUMENTATION

- Certified Gas Instrument Calibration & Repair: we are a MSA R.I.T.E. (Repairing Instruments Training & Education) certified distributor/service center
- We service BW Technologies by Honeywell and other brands of gas detection instruments
- Calibration Gas
