Success stories

We have now helped over 400+ Players over the last 5+ years get trials directly with Professional and Semi Professional Clubs across the UK and abroad. Everyone involved with our Company has played either Professionally or Semi Professionally.

We understand it's great having a trial, however being Players, we want to receive something substantial off the back of a trial. We want to get offered to sign or be offered a contract. We put our Players into an environment not just where we can secure them a trial.

We put our Players into an environment where we believe they can sign with the club.
