FOR EVERY TURN

Born in 1907, Rossignol, at the heart of the mountain, has grown beyond winter sports into a global mountain sports brand. Spanning sports, seasons and terrain, our range of products- from equipment to apparel and footwear – is designed and crafted with passion, technical expertise and know-how.

TURN is our **brand Invitation** to live in the moment and experience the mountain. At Rossignol, we live to **turn**.

- Turn** on the Mountain.
- Turn** on skis. Turn on bikes.
- Turn** through trails.
- Turn** inspiration into innovation.
- Turn** wild. Turn fast.
- Turn** first-times into lifetimes.
- Turn** together.

SEGMENTATION

RACE EXPERT

FOR COMPETITORS AND CHAMPIONS

- Carbon-reinforced structures
- Rossignol Fit system
- High precision, performance and speed

RACE PERFORMANCE

FOR SPORTY, ENERGETIC SKIERS

- Precision performance efficiency
- Glide

SPORT TOURING

HEALTH, PLEASURE

- R-Skin
- Stable, comfortable, easy to use

BACKCOUNTRY

FOR LOVERS OF WIDE-OPEN SPACES AND OFF-PISTE

- R-Skin, Positrack
- Safety, stability, reliability

JUNIOR

FROM YOUNG BEGINNERS TO YOUNG COMPETITOR

- Performance and speed

LESS IS MORE

Giving life and form to a concept. This ambition is in Rossignol's DNA. It is reflected in the Quest for innovation in order to meet the expectations of competitors and skiers looking for high performance and technical characteristics.

This is how the development department envisioned the innovations of the X-IUM ski series. The X-IUM Premium+ and WCS+ ski line with Capless Light+ Technology was born from the idea that you can do more with less.

Weight reduction was the focus of our research. By eliminating the top layer of the ski (cap or top sheet), 80 grams per pair could be saved. Performance was improved with a more efficient, easier to handle ski. The athletes at Rossignol wanted to develop a ski with better race acceleration and less energy loss for a stronger, more efficient race setup. With the X-IUM Premium+ and WCS+, Rossignol has delivered them a safe and high performance product.

By producing a softer and more tolerant ski in a lighter package, the aim is to guarantee optimal skiing enjoyment for all skiers, not just those focused on competition. While the performance of the product is the main focus, skiability is the biggest benefit.

This approach goes hand in hand with Rossignol's stated intention to evolve as part of its Respect program, taking into account the protection of the mountains as a whole.

The X-IUM Premium+ and WCS+ ski constructions are an important part of the company's plan to continuously reduce industrial waste and reduce its carbon footprint by 30% by 2030. By eliminating the topsheet over the entire length of the ski, Rossignol limits the use of plastics and promotes the use of more environmentally friendly technologies.

Between innovation and modernity. Rossignol breaks with market habits and responds to the needs of all who want to enjoy adventure in the outdoors.

TECHNOLOGIES SKI

EXTERNAL CONSTRUCTION

EDGE ENERGY SENSOR
A stiffer waist to increase acceleration.

CENTRAL-EDGE
Helps to focus the skier's energy beneath the waist and optimises efficiency and energy transmission.

3D CARBON PROFILE
A more consistent ski structure for superior control.

SUPRA EDGE
Reinforced edges for greater stability.

LOWER TIP
Softer and lighter tips and tails for a more balanced ski.

ACTIV'CAP
Combination of two materials (RossiCap + multidirectional fibreglass).

AIR TIP
The AIR TIP base lightens the ski and improves acceleration whether using the double push or alternative technique.

LESS+
Lightweight structure concentrated only on the elements involved in the performance of the ski: removal of the Cap.

INTERNAL CONSTRUCTION

NOMEX
Construction of a honeycomb core for extreme lightness.

LDC CORE
Lighter structure.

WOOD AIR
Wood construction with air channels.

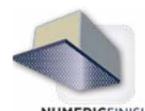

SOLE

SKATING DOUBLE GUIDE GROOVE
Stabilizes the ski and facilitates tracking whatever its position.

R-SKIN WAXLESS PATTERN
The synthetic waxless pattern behaves almost identically to a waxed ski, boasting easy grip on all types of snow and excellent glide performance whatever the conditions.

NUMERIC FINISH
This base preparation technology offers a limitless range of ready-to-ski finishes that will improve glide. World Cup base finishes for everyone!

AR POSITRACK WAXLESS PATTERN
Thermoformed waxless pattern delivering very pleasant glide and excellent grip.

STONE FINISH
Milled base finish.

AR PLUS WAXLESS PATTERN
Cut into the base itself, this AR waxless pattern is the perfect compromise between retention and gliding. Perfect for rental use.

TECHNOLOGIES BINDINGS

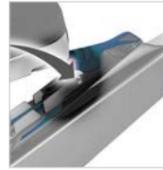

TURNAMIC®

Turnamic bindings have become essential on the market as the benefits to consumers and distributors are numerous and well known: ease and speed of assembly, customization to the needs of skiers, adaptation to the requirements of the slope profile, stability, control, behavior.

TURN LOCK

The ergonomic design of the lever with secure-grip soft components enables intuitive handling when stepping in and out of the binding. Haptic and acoustic response when opening and closing. Protected against unwanted opening.

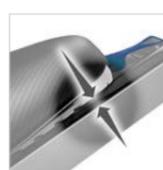

STEP IN

The step-in latches the boot in the binding without having to touch the lever. The closing click ensures that the binding is properly closed.

HEEL PRE-ADJUST

Adjustable heel section where the boot size is preselected using snap hooks on the heel rails. The heel is automatically positioned with it when the position is adjusted so no separate adjustments are necessary later.

LOW PROFILE

The minimalistic design height ensures a low stand position and maximum stability as a result. This means a more stable gliding phase and a direct feel or the snow at the same time.

FLEXOR SKATING

With flex grade 11.0 and progressive power flow. Pre-load technology ensures the best ski control from the beginning of the motion. 40° working angle (amplitude), tool-free changeover, secure fit inside binding housing and low-wear material are what make this highperformance absorber stand out.

TORSION PROOF BODY

The geometric design of the binding body delivers excellent torsional rigidity for direct and effective power transfer.

FLEXOR CLASSIC

With flex grade 5.0 and slightly progressive power flow. Pre-load technology ensures the best ski control from the beginning of the motion. 45° working angle (amplitude), tool-free changeover, secure fit inside binding housing and low-wear material are what make this high-performance absorber stand out.

DOUBLE LOCK SLIDER/CLIP LOCK

Double locking clip for easy and safe fixation and adjustment of the binding on the IFP (Integrated Fixation Plate). The step-in mechanism makes it extremely easy to step into the binding. You can hear the "click" when the binding is closed properly.

SAFE LOCK

It provides an extra level of safety for racers who start in a line and need to be sure there is no risk of unexpected prereleasing, even in the event of crushing at a mass start or a long-distance start.

FLOWFLEX

The two part-plate and click-in setting with two closely arranged pins not only guarantees double the safety but also that the binding is fixed on one point. The rest of the binding housing has a floating bearing design along the entire length which has no negative effect on ski performance.

TECHNOLOGIES BOOTS

This year Rossignol completes its range of TURMANIC® soles with two new carbon COURSE soles. Thanks to the CARBON THERMODURE technology, the sole-back stiffener becomes one unit, for precision and maximum energy transmission. This sole-back stiffener unit creates an extremely highperformance carbon chassis when it comes to steering the ski.

SOLES

A range of seven different soles segments our boot range to meet to the varying expectations of users.

CARBON PREMIUM SKATING
Technology: CARBON THERMODUR
Rigidity and flex skating.

CARBON PREMIUM CLASSIC
Technology: CARBON THERMODUR
Rigidity and flex classic.

CARBON EXPERT SKATING
Technology: CARBON
Rigidity and flex skating.

EXPERT SKATING
The rigid central "Carbon Aspect" insert provides strengthened torsional rigidity.

EXPERT CLASSIC
The flexible central insert allows for a natural foot roll during propulsion.

SPORT
The bi-injection insert provides optimum feel for sports skiers.

TOURING
The flexible central insert gives the boots optimum comfort as well as torsional rigidity for added stability.

THE CHASSIS

3 POSITIONS SENSOR
The sole is built around three fundamental support points: the front of the first and fifth metatarsal bones and the heel to maximise the performance and comfort of the boot.

AXIS PROTECTOR
Our competitors mould the binding axis directly into the sole. Rossignol has adopted a different approach by integrating the axis into an independent and extremely hard-wearing plastic part, which is then incorporated into the chassis to avoid stiffening the front of the boot while retaining all the flexibility and roll of the foot during classic cross-country skiing. This technology is available in all the ranges and gives classic boots a similar feel to running shoes with greater sensations when propelling.

LOW PROFILE
The sole boasts a slim-line design, so that the skier's foot is as close to the snow as possible, thereby delivering lightness, feeling and superior control.

GRIP TECH
Crampons with a unique design and composition for comfortable and safe walking.

THE CENTRAL INSERT

Rossignol has designed various inserts to give each sole a specific set of attributes tailored to each technique (skating/classic) and the level of use (race/sport/touring). By manipulating their materials and their density and altering the shape of the central insert, each sole excels in behaving exactly how skiers need them.

FOR SKATING MODELS
A "Carbon Aspect" central insert increases the sole's torsional rigidity. Its specific Skating shape improves efficiency during propulsion and increases stability when striding.

FOR CLASSIC MODELS
A soft plastic central insert allows for natural foot roll during propulsion and a double guide groove across the entire length of the sole offers better control for groomed trails.

FOR SPORT PERFORMANCE MODELS
A bi-technical insert brings the best compromise to boots designed for our sports customers.

FOR TOURING MODELS
An extremely soft and flexible central insert produces a comfortable boot with excellent torsional rigidity for even greater stability.

THE MID SOLE

The mid sole acts as an interface between the external sole and the boot. It determines the required flexibility and rigidity. Their importance is such that Rossignol is focusing its development efforts on the comfort and ergonomics that mid soles can procure.

BOOTS CONSTRUCTION

CARBON THERMODUR CHASSIS

Sole unit made from a single piece of 100% carbon THERMODUR.

- Maximised torsional rigidity
- Optimised front flexion
- Energy transmission

DUAL CORE

Injection-molding using different densities of material in the same mold.

- Precision of movement
- Prevents energy wastage
- Optimal contact

CARBON CUFF

- 100% carbon cuff
- Optimal power transfer

THERMO ADJUSTABLE FIT

Thermoformable materials are heated so that boot volume can be changed. The boot adapts itself to the foot. Tailor-made!

- Comfort
- Precision

MOBILE CUFF

Optimal freedom of fore/aft movement combined with torsional rigidity for total control.

SOFT TOUCH

Ultra-comfortable control thanks to the interface membrane.

- Comfort
- Control
- Fit

ASYMMETRIC BACK STIFFENER

Stiffener to suit every situation.

- Arch support
- Torsional rigidity
- Well-supported, stable platform

LOW VOLUME FIT (LVF)

A unisex alternative for more slender feet (Low Volume Fit).

- Personal attention!
- Easy foot entry and close fit
- 100% feel
- Total envelopment of the foot

TECH CONTROL WRAP

A light and effective concept that opens up real sensations in Classic together with stability and easier ski control.

THE SPIRAL ZIPPER CONCEPT

The zip spirals around the calf to allow more freedom of movement around the ankle for the skier, with greater freedom for the foot at the front and back of the boot.

ADJUSTMENT

DOUBLE LACING SYSTEM

A single system provides independent control of mid and forefoot closure for more comfort and precision.

SPEEDLACE LOCK

Rapid, easy closure for better support of the foot and more precision.

ADJUSTABLE STRAP

For more support and control.

BOA® Fit System featuring Li2

The BOA® Fit System delivers micro-adjustable, precision fit engineered to perform in the toughest conditions.

LI2: A BREAKTHROUGH IN PRECISION FIT

BOA's new, breakthrough Li2 dial platform brings a sleek, low-profile design, unprecedented durability, and improved sustainability to the L-SERIES. With incremental micro-adjustability, Li2 is the ultimate in fast, effortless, precision fit.

PRIMARY BENEFITS

- **LOW-PROFILE:** Sleek and lightweight for performance without sacrificing power.
- **DURABLE:** Unprecedented durability, built to withstand the toughest conditions.
- **SUSTAINABLE:** Developed with sustainability at the forefront of design, manufactured to reuse and reduce material waste.
- **MICRO-ADJUSTABLE:** Fine-tune fit with incremental tightening and loosening.

Shaft : 30% CARBON

Grip : R-Clip Natural Cork 2.0

R-clip

R-clip technology allows you to click in and out of your pole grips with the same ease as bindings, providing perfect hand positioning and a far more sturdy connection to the pole. Compatible with carbon shafts, the alpine grip is made from a single plastic so the grip can be recycled, the Nordic grip is made from cork with a redesigned strap that's more ergonomic than ever.

PA CLIP

PA INSERT

PC GRIP

Using mono-material grip so it can be recycled
