

ABACUS

SPRING LINSEED

AHDB
DESCRIBED

Abacus spring linseed combines early maturity with good on farm seed yields.

The basis for its yield comes from an intense and prolonged flowering period. Abacus shows excellent resistance to the onset of powdery mildew and is suitable for all areas and conditions. The vigorous lateral branching of Abacus interlocks to provide a self-supporting canopy, with good standing power and even maturity to facilitate combining.

Abacus is a medium height, white flowered variety, which produces medium-small brown seeds.

SEED YIELD

UK Untreated Yield (2.1 t/ha)	94
-------------------------------	----

SEED QUALITY

Oil content %	40.4
---------------	------

ANNUAL YIELDS

2020 (2.7 t/ha)	[95]
-----------------	------

2021 (2.1 t/ha)	[98]
