

# Paquita

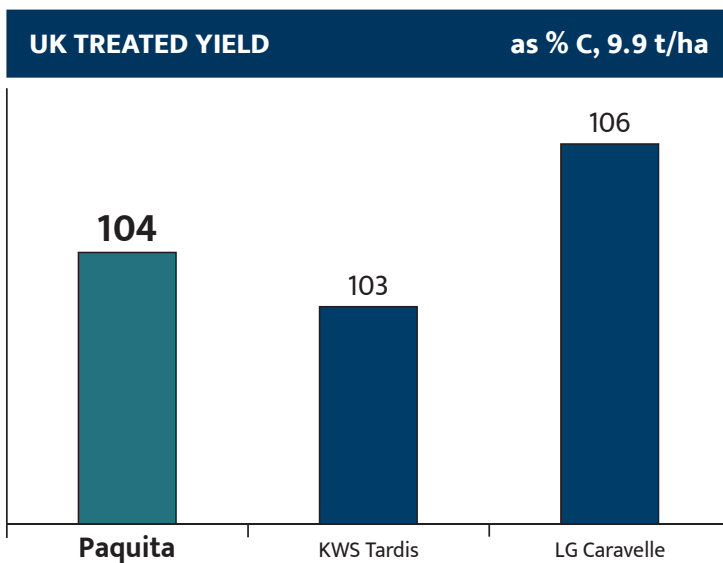

WINTER BARLEY

AHDB  
CANDIDATE

## Paquita is a new BYDV tolerant two-row winter barley candidate H2026.

It combines competitive two-row feed yields, with stiff straw and early ripening, good disease resistance and a high specific weight. Paquita importantly also has BYDV tolerance, offering growers the attributes of a top performing feed barley with the added security of protection from BYDV, reducing costs and risks.

REGIONAL YIELDS	East (9.6 t/ha)	West (10.0 t/ha)	North (10.3 t/ha)
<b>Paquita</b>	<b>[106]</b>	<b>[102]</b>	<b>[103]</b>
KWS Tardis	103	101	103
LG Caravelle	107	105	103

ANNUAL YIELDS	2024 (% T C, 9.7 t/ha)	2025 (% T C, 10.1 t/ha)
<b>Paquita</b>	<b>106</b>	<b>103</b>
KWS Tardis	103	102
LG Caravelle	105	105
