

Patient-101

Patient-101 had a broken femur and a bone sticking out the right side of her knee. She saw Dr. Holman Chan at Nevada Orthopedic & Spine Center who said he didn't understand why she came to see him. Dr. Chan did nothing to help. Patient says DO NOT go to this hellish place (Nevada Orthopedic).

Patient-101 went to Dr. Holman Chan at Nevada Orthopedic & Spine Center.

Patient says:

This is the worst doctor's office I have ever encountered.

They had me see Dr. Chan who is a foot and ankle surgeon.

I have a fractured femur and a bone sticking out the right side of my knee.

Dr. Chan said he didn't understand why my Primary Care doctor sent me to this clinic. He asked me what I thought the problem is with my leg and did NOTHING TO HELP ME!!!!

I have to go there because of my HMO (health insurance plan).

I have been trying for days to see another doctor for a second opinion.

There are 16 doctors available (at Nevada Orthopedic).

I CANNOT GET THROUGH ON THE PHONE OR ON THE WEBSITE.

THE PAIN, SUFFERING AND LOSS OF WORK THIS CLINIC HAS COST ME IS BEYOND WORDS.

Please do yourself a favor....DO NOT GO TO THIS HELLISH PLACE!!

Patient says DO NOT go to this hellish place (Nevada Orthopedic).

The photo above is a stock photo of a femur, and the photo below is a stock photo of a distal femur fracture (closer to the knee).

Distal femur fracture: The distal femur is part of the femur bone that flares out like the mouth of the funnel. A distal femur (top part of knee joint) fracture is a break in the thighbone that occurs just above your knee joint.

Femoral shaft fracture: A femoral shaft fracture is a break that occurs anywhere along the femoral shaft, long, straight part of the femur.

Just say NO to Nevada Orthopedic and just say NO to Dr. Holman Chan
