Patient-146 went to Dr. Ronald Hillock at Nevada Orthopedic & Spine Center for a hip replacement.

Here is the patient's story:

**Dr. Ronald Hillock is the most arrogant doctor I have ever met.**

**I never recovered from surgery. I went into the operating room able to walk, and now I am unable to walk -- even with a walker or a cane.**

**The last time I was hospitalized for an emergency for my hip, Dr. Hillock showed up in my room and talked to me from 12 feet away. He said, "That hip is broken. Bye."**

I am suffering extreme pain, and I am afraid to see this surgeon again.

At this time, I don't know what to do.

The same thing happened to me as other reviewers. After surgery, forget about talking to him because he will not bother to visit you when you are in recovery or a regular room.

**Dr. Hillock thinks he is the king of hip and knee replacements. He needs some counseling to help him eliminate that ego and arrogance.**

**I hate this incompetent surgeon.**

He will only do surgery at Centennial Hills or Sunrise Hospital.

God will take care of him and make him pay for all the abuse to his patients.
