

Patient-15

Patient-15 is another patient who had hip replacement surgery by Dr. Michael Bradford at Nevada Orthopedic & Spine Center, resulting in long-term pain and suffering for the patient. Long delays, no pain meds, phone calls not returned. Patient had to go back to the hospital to get the staples removed. One year later and still in pain.

This is a first-person account by Patient-15.

My experience with **Dr. Michael Bradford** at **Nevada Orthopedic** & Spine Center started on 7-23-16. I fell and broke my left hip. Dr. Bradford told me I needed a complete hip replacement.

I lay in the hospital for 2 1/2 days. My surgery kept getting moved back, and my hospital pain doctor was not kept abreast of the changes, so I went without medication for pain way too long.

Finally at midnight, they took me to the surgery center where I was to be operated on then. But they took another girl ahead of me again. So again, I waited and still had no pain meds.

After 5 weeks, I expected a call to see about getting my staples out. I called the office and left a message for Rafael to please call me back as I needed to get my staples out after my hip replacement.

I got no call back. I called back several more times and explained it was very important. Still no reply.

I went back to the hospital, and the nurse called Dr. Bradford. He told her to go ahead and take out the staples.

I had rehab and home care, but after 7 months, I was still in extreme pain, so I called Dr. Bradford's office for an appointment.

your muscle, causing significantly greater pain and longer recovery time, damage to the muscle, greater chance of hip dislocation, longer hospital stay, and more risks.

**Just say NO to hip replacement surgery
and just say NO to Nevada Orthopedic and just say NO to Dr.
Michael Bradford**
