

# Patient-181

**Patient-181 went to Dr. Michael Bradford at Nevada Orthopedic & Spine Center. He had hip replacement by Dr. Bradford only two years ago and it failed, so now he needed a hip revision. Surgery was a disaster. He came out of surgery with his mouth busted up and no explanation. He is in worse condition -- cannot sit in chairs, can barely walk and his balance is terrible.**

Patient-181 went to Dr. Michael Bradford at Nevada Orthopedic for a hip revision. It has been only two years since Dr. Bradford did the original hip replacement which has failed, so the patient now needed a hip revision.

Here are the patient's comments after the hip revision:

**After having the front of my mouth busted up and a broken bridge during surgery, and no answers why or how, I'm in worse condition now than before the revision surgery.**

**When I tell a doctor I've been running into walls, I can't sit in any chairs, barely walking, and my balance is terrible, I expect the doctor not to change the subject.**

**I wish I never had this man operate on me!!**

And 20 days to get MRI results is insane!

**Another patient with a bad surgical experience with Dr. Michael Bradford at Nevada Orthopedic**

**The patient had hip replacement surgery by Dr. Bradford only two years ago. The device failed, so now the patient needed hip revision.**

**Dr. Bradford did the hip revision surgery.**

**The patient is now in worse condition. He cannot sit in chairs, can barely walk and his balance is terrible.**

**And the patient came out of surgery with his mouth busted up, but Dr. Bradford provided no explanation for what happened.**

**DO NOT GO TO DR. MICHAEL BRADFORD AT NEVADA ORTHOPEDIC!!**
