

Patient-195

Patient-195 went to Sunrise Hospital in March 2026 for surgery relating to a car accident. Nursing staff are horrible and negligent. The surgeons placed the hardware incorrectly in her leg. Patient acquired MRSA infection, causing an abscess, big sores and a hole in her leg, and the infection is eating into her bone. Sunrise Hospital should be SHUT DOWN.

Patient-195 went to Sunrise Hospital for surgery relating to a car accident.

Patient's husband says:

My wife went to this hospital for surgery due to her being hit by a drunk driver while she was a pedestrian.

This hospital is NOT a warm, welcoming, comforting place.

The nursing staff are horrible and negligent.

The surgeons who did her surgery put her hardware in her leg wrong causing irreparable damage to where she won't ever fully heal.

My wife has been battling the horrors of what the accident left her for around two years now and keeps coming down with MRSA because Sunrise Hospital (and Scottsdale) keep discharging her while she still has the infection.

She was just admitted into the hospital again a little over a week ago because it was the only place that would take her.

She has MRSA so bad that it has created an abscess and has opened up big sores and holes in her leg as well as eating away at her bone.

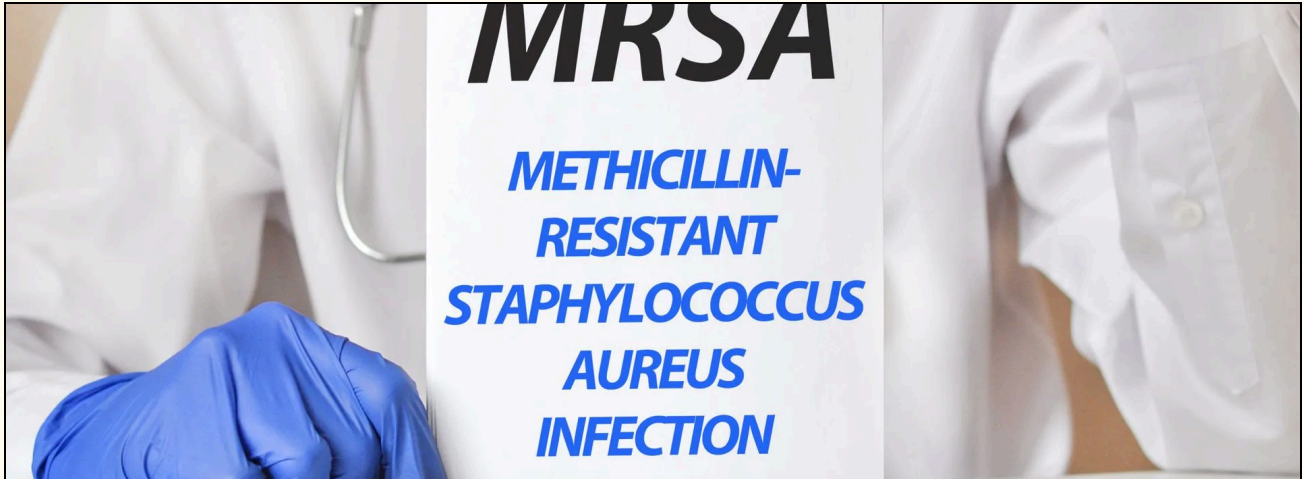

They treated her horribly while she was there and then 3 days later discharged her again with this huge open wound and MRSA is highly contagious.

The MRSA is getting worse and neither of these two hospitals will take her.

ISN'T THIS AGAINST THE LAW?!?

People need to know that this place does not treat people right.

Sunrise Hospital SHOULD BE SHUT DOWN!!!
