

Patient-228

Patient-228 went to Dr. Arthur Taylor at Nevada Orthopedic & Spine Center for carpal tunnel syndrome. On surgery day, she noticed Dr. Taylor was shaking bad and wished she had ran out the door. She had surgery on her left hand, but it never healed properly. Other doctors reviewed the MRIs and found that the surgery was done incorrectly. She is in severe pain and cannot do much with her left hand. Patient does NOT recommend Dr. Arthur Taylor.

Patient-228 went to Dr. Arthur Taylor at Nevada Orthopedic & Spine Center.

I DO NOT RECOMMEND!!!!!! ZERO STARS!!

When I wrote this review, it was before I knew better and before I let him do surgery.

I received surgery on my left hand and was planning to get surgery on my right. My left hand never healed properly.

After my follow-ups after surgery, I never went back to this doctor.

On surgery day, I should have went with my gut instinct and ran out the door. He was shaking so bad, and I never noticed in my previous visits. He hides it well by having others do everything on your office visits.

Now other doctors have seen my new MRIs and the reason I am still in pain is because the surgery wasn't completed correctly and I still have carpal tunnel.

He was supposed to fix my thump from triggering and now my bone sticks out and I can't even bend my thumb.

My pain now is 10 times worse than before surgery and so is the inflammation.

I'm so upset I trusted this doctor.

I am now in severe pain 24/7 and cannot do much with that hand.

Be careful who you trust with your medical care.

Patient-228 went to Dr. Arthur Taylor at Nevada Orthopedic & Spine Center for carpal tunnel syndrome. On surgery day, she noticed Dr. Taylor was shaking bad and wished she had ran out the door. She had surgery on her left hand, but it never healed properly. Other doctors reviewed the MRIs and found

that the surgery was done incorrectly. She is in severe pain and cannot do much with her left hand. Patient does NOT recommend Dr. Arthur Taylor.

Note to readers: Read the story of Patient-187 who also went to Dr. Arthur and noticed he was shaking. One of his assistants said Dr. Taylor is in the early stages of Parkinson's Disease.

**Just say NO to Nevada Orthopedic
and just say NO to Dr. Arthur Taylor**
