

Patient-241

Patient-241 went to Sunrise Hospital on July 19, 2026, with shortness of breath. The hospital initially treated the patient, incorrectly, by giving her two pills of Xanax (a potent tranquilizer). Patient has a documented history, at Sunrise Hospital, of asthma and COPD (chronic obstructive pulmonary disease). After waiting for several hours, the hospital finally gave the patient a breathing treatment.

Patient-241 went to Sunrise Hospital on July 19, 2026, with shortness of breath and a documented history at Sunrise Hospital of asthma and COPD (chronic obstructive pulmonary disease).

Here are the patient's comments:

When I arrived at the ER, everyone who I had an encounter with was friendly, professional, and kind, except for the attending physician who treated my shortness of breath as if I had a mental challenge and had the nurse to give me 2 Xanax pills.

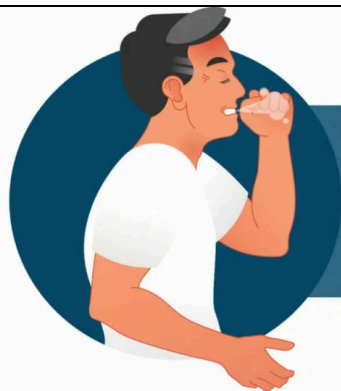

🚨 Spoiler Alert: The medicine didn't work!!

I waited hours for a breathing treatment.

I shouldn't have had to wait especially since I have a documented history of asthma, COPD (chronic obstructive pulmonary disease), and respiratory infection with the hospital.

The doctor also made a snide remark about me being allergic to contrast dye.

It's amazing how lab results can change a negative attitude.

COPD

Chronic Obstructive Pulmonary Disease

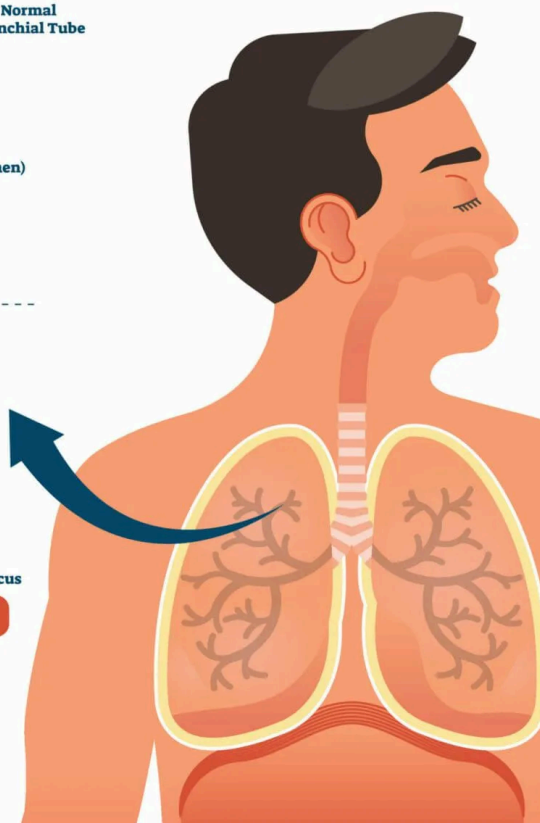

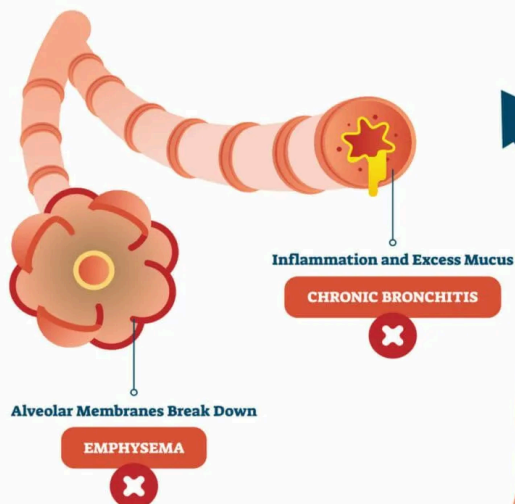

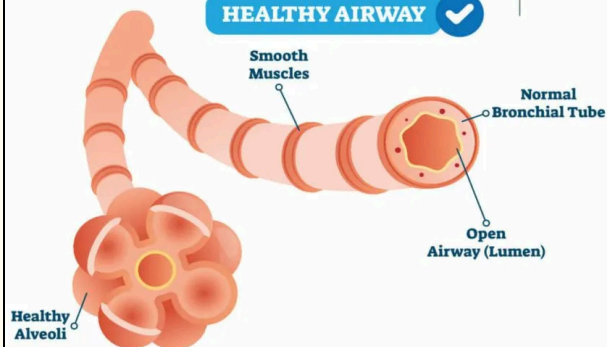

COPD Symptoms

- Chronic Cough
- Production of Mucus
- Fatigue
- Shortness of Breath
- Dyspnea
- Chest Discomfort

COPD Causes
