

Patient-266

Patient-266 went to Sunrise Hospital with leg pain from a previous fracture. Patient was kept waiting for hours. No feedback from the doctor. Nurses have the nerve to say there is no fracture even though it is previously documented. Patient tells others to avoid coming to Sunrise Hospital for emergencies.

Avoid coming here for adult emergencies.

They will have you waiting for hours after doing your labs, X-rays and ultrasound just to not have the doctor tell you anything.

And they don't call your name when you come here early.

They leave you waiting for hours.

Then you go check and find out that -- all along, your discharge papers are there while you are starving and can't drink or eat anything.

Terrible!!!

Came in with an old 2019 fracture which I feel pain on and like it wants to snap again.

No feedback from a doctor and nurses have the nerve to tell me there's no fracture and that it's healed.

Oh really, then why do I feel pain and like my whole leg gets stiff.

Very upsetting!!!

I got here at 9 p.m. (Saturday, August 1), and I'm still here at 4:17 a.m. (now it's Sunday, August 2, 2026).

This is a stock photo showing people waiting a long time at the hospital.

Just say NO to Sunrise Hospital
