

Patient-313

Patient-313 went to Dr. Michael Bradford at Nevada Orthopedic & Spine Center. Extremely disappointed with the knee replacement surgery by Dr. Bradford. Patient is still in pain one year later, with numbness in his shin and foot. Staff would NOT respond to phone calls, so the patient went to a better doctor.

Patient-313 went to Dr. Michael Bradford at Nevada Orthopedic & Spine Center for a knee replacement surgery.

Here are the patient's comments:

Based on the results of my knee replacement surgery, I am extremely disappointed in the results to date.

I have rehabbed it (physical rehabilitation) for almost a year religiously, and it always feel as if I have a sprained knee.

I feel it should be much better after a year.

Additionally, I have numbness in my shin and foot when standing for more than 5 minutes.

Nevada Orthopedic staff did NOT respond to requests for an appointment, so I gave up and went to a better doctor.

This is a stock photo of a patient after knee replacement surgery.

**Just say NO to Nevada Orthopedic
and just say NO to Dr. Michael Bradford**

Alternatives to Knee Replacement Surgery

Knee replacement surgery is a common procedure used to alleviate severe knee pain caused by arthritis. While the surgery aims to improve mobility and reduce discomfort, it can also cause complications after the procedure. Some possible complications include:

- Infection
- Blood clots
- Stiffness
- Instability
- Nerve damage
- Implant failure
- Bone fractures

While knee replacement surgery is an effective treatment option for some patients, [non-surgical alternatives](#) can help relieve discomfort and improve quality of life. These alternatives may be suitable for individuals who prefer non-invasive interventions or are not ideal candidates for surgery.

If you're seeking a solution for arthritis knee pain that doesn't involve surgery or opioids and requires no downtime, look no further than the [Arthritis Knee Pain Center](#). With over 60,000+ patients who have experienced relief, our advanced knee pain relief treatment is designed to increase mobility, reduce pain, delay surgery, and decrease the need for pain medications.
