

# NEXUS DR

## Digital Image Acquisition

Nexus DR is an advanced digital image acquisition system designed to automate patient work flow. It is a cost effective solution that includes advanced image processing algorithms for optimal image quality and reliability.

Designed to provide fast and accurate diagnostic images with minimal user interaction, Nexus DR is an efficient solution for your digital radiography needs. Optimized work flow with this product will allow X-ray technologists to focus on the patient while seamlessly capturing images.

### Advanced Image Quality

- Processing and enhancement tuned to each anatomical protocol
- Site specific tuning capability

### Cost-effectiveness

- Nexus DR is designed to be packaged and resold to end users by our customers
- Nexus DR package options can include a Varex Flat Panel detector and a complete workstation computer kit. When a complete hardware and software kit are purchased, Varex Imaging will setup and test the system with the flat panel prior to shipment.
- Varex Imaging also saves you time to market by obtaining regulatory clearance for our Nexus DR package

### Easy to Use

- IOS-like look and feel with multi-touch monitor
- Easy patient worklist selection when integrated with RIS
- Extensive pre-loaded exam protocols
- System guidance through defined protocol with seamless image transfer to DICOM server
- DICOM 3.0 compliant

### Integration Capabilities

- Nexus DR can be integrated with the generator to eliminate the generator console<sup>2</sup>
- Available in-room console is optimized for use with a small, overhead-mounted touchscreen

## Acquisition features

- User input via touchscreen or keyboard & mouse
- Simple patient selection from work list
- Exposure Index for technique optimization
- Auto advance to acquisition upon patient selection
- Auto acquisition advance based on custom protocols
- Highly optimized DR image acquisition work flow
- Auto send to DICOM upon completion of exam
- Multi-Panel Support - up to 3 panels
- Dose measurement with dose meter<sup>1</sup>
- Generator integration<sup>2</sup>
- Autonomous Mode (up to 500 images)

## Software Features

- HIS/RIS work list support
- Configurable automatic study advance
- Over 500 preloaded exam profiles
- Accept/reject functionality
- Auto region of interest (ROI)
- Thumbnail image display
- Left/right markers with smart positioning
- Optimized work flow for fast patient throughput
- Image measurement and annotation tools
- Free Rotation
- Support for multiple languages
- Background multi-tasking hard copy allows simultaneous processing and printing during acquisition
- Online and remote service diagnostics
- Auto-Stitching - combines multiple images into one large image
- Customizable Printing
- Basic Radiation Structured Dose Report
- JPEG export (including email)

## Image Processing Software

- Utilizes advanced image processing algorithms for optimum image quality
- Imaging parameters tied to customizable APR-based acquisition profiles
- Grid detection and suppression
- Extensive post-processing features
- vSharp® - Scatter correction (optional)

## Nexus DR Hardware Specifications

### Our Recommended Hardware as follows:

- Tablet, all-in-one, or small desktop PC
- Intel Core family CPU (4th generation or later)
- Windows 10 & 11 Professional® - 64 bit operating system
  - Direct X 11 or higher
- 256 GB HD or SSD (not intended to be an archive device)
- 8 GB RAM
- Multi-touch monitor to enable touch capability
- Keyboard and mouse fully supported

## Flat Panel Detector

Nexus DR is integrated with Varex's latest 43x36cm (17x14 inch), 43x43cm (17x17 inch), and 25x30cm (10x12 inch) Radiographic Flat Panel Detectors in both wireless and tethered connections.

- Cesium iodide or GadOx scintillators available
- Varex 139 µm pixel pitch for up to 3.6lp/mm spatial resolution
- 16 bit A/D contrast resolution
- vTrigger (AED) or hardwire exposure synchronization with integrated generator

<sup>1</sup> Contact your account manager for currently supported or any future supported dose meters.

<sup>2</sup> Contact your account manager for currently supported or any future supported generators.

## More Information

As a market leader and independent supplier of medical X-ray components, we have extensive experience providing high-quality, safe, and effective products.

For more information, please contact a Varex Imaging sales representative at [NexusSoftware.cs@vareximaging.com](mailto:NexusSoftware.cs@vareximaging.com).

All promotional material and the information provided herein is for planning purposes only. Commercial sale is dependent upon regulatory clearance.
