Ramidro

Copper hydroxide-based defense process activator

EC FERTILIZER

SOLID MIXTURE OF MICRO-NUTRIENTS

RAMIDRO is a wettable powder foliar fertilizer that rapidly prevents and treats copper and manganese deficiencies. These micro-elements are essential for normal plant physiology, playing a fundamental role in photosynthesis, respiration, nitrogen fixation, protein and carbohydrate synthesis, and cell wall formation.
Copper hydroxide is the most refined form of copper. From an agronomic standpoint, its key advantage is the rapid release of copper ions, making RAMIDRO highly effective at stimulating the plant's natural defenses against pests.
Like iron, manganese acts as a catalyst in the formation of chlorophyll and proteins, and also plays a role in redox reactions within plant tissues. In many plants, manganese deficiency manifests as general leaf chlorosis.
Regular use of RAMIDRO helps ensure healthier, stronger plants.

- *Treats and prevents damage caused by copper and manganese micro-deficiencies.*
- *Acts against fungal diseases.*
- *Reduces imbalances caused by nutritional deficiencies.*
- *Healthier, stronger crops.*

REGISTRATION
SIAN Registration No. 0023684/18

COMPOSITION (% w/w)
Copper (Cu) 20
Manganese (Mn) 0.5

PHYSICAL PROPERTIES
pH (1% solution) 7.5
Color: Light blue

FORMULATION
Wettable powder

PACKAGING
1 kg bag
5 kg bag
10 kg bag

APPLICATION
Foliar

1 kg

5 kg

10 kg

MODE OF USE	***CULTURE***	***WHEN TO APPLY IT***	***DOSES***
Foliar	*Fruit, Vine, and Olive Crops / Vegetable Crops* *Floricultural Crops* *Industrial Crops*	*To be used only when a need has been established.* *Do not exceed the appropriate doses.*	*300 – 400 g/100 L of water*

Precautions: Use only when there is a recognized need. Adhere to the specified dosages. The product is non-combustible and stable under ordinary temperatures and pressures. Store the product in well-ventilated areas at temperatures between +5°C and +35°C.
