3 MONTH – MAJESTY DEBUT

6 MONTH – CROWN SIGNATURE

12 MONTH – ROYAL REGENESIS

Includes a complimentary private consultation with our Esthetician, Crystal, to assess your skin and create a tailored treatment plan.

PEPTIDE SPOTLIGHT PT-141 (Bremelanotide)

IGNITE DESIRE. RESTORE CONNECTION. SUPPORT BRAIN-DRIVEN LIBIDO.

February is all about connection—and PT-141 is one of the most exciting peptides we offer for libido, intimacy, and sexual wellness in both women and men.

Unlike traditional therapies that focus on blood flow or hormones alone, PT-141 works directly on the brain, activating melanocortin receptors involved in desire, arousal, and sexual response.

We will evaluate:

Hormones, Neurotransmitters, Stress and sleep, Metabolic health, and Emotional well-being

Benefits:

- Increased sexual desire
- Improved arousal and sensitivity
- Enhanced orgasm quality
- Greater confidence and intimacy
- Renewed mind-body connection

Reignite Your Spark

If intimacy, desire, or connection feels off, your body may be asking for support—not judgment.

MODALITY SPOTLIGHT

FEMIWAVE®

FemiWave® is an advanced, non-invasive acoustic/pulse-wave therapy that uses gentle sound waves to improve blood flow and tissue health in the vaginal and vulvar areas. It's designed specifically for women to support sexual wellness, comfort, and intimate function without surgery, drugs, or downtime.

FemiWave is suitable for women experiencing:

- Decreased vaginal sensitivity and libido
- Vaginal dryness
- Discomfort or pain during sex
- Post-childbirth vaginal changes
- Urinary incontinence or pelvic floor weakness
- Changes related to perimenopause or menopause
- Desire for enhanced intimate function and confidence

GAINSWAVE®

GAINSWave® is a non-invasive shockwave therapy that uses high-frequency, low-intensity sound waves to enhance male sexual health by improving blood flow and stimulating the body's natural regenerative processes. There are no pills, injections, or surgery, and minimal to no downtime is required.

GAINSWave® may provide:

- Improved erectile function and firmer erections
- Enhanced sexual performance and sensitivity
- Increased spontaneity (less reliance on medications)
- Reduced symptoms of Peyronie's disease (by breaking down scar tissue)
- Boosted sexual confidence and quality of life
- Long-lasting results for many men after completing the treatment series
